A solid vocabulary is crucial for testing, writing, and the precise communication required by daily life. Using a contextual

approach, Wordly Wise 3000 students are taught to say unfamiliar words and identify any possible similarities to other words, use the word in context, break the word down into parts, and finally look it up. Three thousand carefully selected words taken from literature, textbooks, and SAT-prep books form the backbone of this vocabulary series. Each lesson begins with a Word List that includes pronunciations, parts of speech, and concise definitions, and uses each word in an interesting, contextual, sentence. Wordly Wise 3000, Book 7 is made up of 20 lessons with 15 words in each lesson. In Book 7, vocabulary instruction focuses on preparing students with strategies to unlock the meaning of words they will encounter in content area texts, literature, and high-stakes tests. Comprehension of the vocabulary words is facilitated and reinforced through Greek and Latin word studies with an emphasis on prefixes, suffixes, parts of speech, synonyms, antonyms, and analogies. This third edition features the same word lists as the second edition, however, the passages and questions that follow the passages have been updated and assigned measures from The Lexile Framework for Reading. Wordly Wise 3000, 3rd Edition is not compatible with 2nd Edition teacher's guides and resources. Wordly Wise 3000, Book 7 contains 20 lessons; words taught in book 7 include: flabbergast, formidable, grueling, illustrious, lavish, maneuver, naive, perturb, replenish, smolder, ungainly, vulnerable and more. 216 two-tone pages, softcover.

Billions of years ago, humans abandoned their cradle and are now scattered across the galaxies. But the legends speak of a time when the sun threatened to burn away the inner worlds of the solar system when it became a red giant, and a remnant of mankind returned to Earth from the farthest stars to install a machine to move humanity's cradle out of danger. Since then, the remnant communities built settlements in the cracked and broken slopes of the old continental plates, exposed to the elements when the Earth was moved. Now nestled in the outer reaches of the solar system, Earth faces a new challenge--the sun has begun to collapse into a white dwarf. As the sun grows smaller and the world gets colder, the quest for the mythical machine that can move the planet closer to the fading sun becomes a race to save the planet from final extinction.
