What, exactly, do you know about your body? Do you know how your immune system works? Or what your pancreas does? Or the myriad -- and often simple -- ways you can improve the way your body functions? This full-color, visually rich guide

answers these questions and more. Matthew MacDonald, noted author of *Your Brain: The Missing Manual*, takes you on a fascinating tour of your body from the outside in, beginning with your skin and progressing to your vital organs. You'll look at the quirks, curiosities, and shortcomings we've all learned to live with, and pick up just enough biology to understand how your body works. You'll

learn: That you shed skin more frequently than snakes do Why the number of fat cells you have rarely changes, no matter how much you diet or exercise -- they simply get bigger or smaller How you can measure and control fat That your hair is made from the same stuff as horses' hooves That you use only a small amount of the oxygen you inhale Why blood pressure is a more important health measure than heart rate -- with four ways to lower dangerously high blood pressure Why our bodies crave foods that make us fat How to use heart rate to shape an

optimal workout session -- one that's neither too easy nor too strenuous Why a tongue with just half a dozen taste buds can identify thousands of flavors Why bacteria in your gut outnumber cells in your body -- and what function they serve Why we age, and why we can't turn back the clock What happens to your body in the minutes after you die Rather than dumbed-down self-help or dense medical text, *Your Body: The Missing Manual* is entertaining and packed with information you can use. It's a book that may well change your life. Reader comments for *Your*

This book tells the story of HMS New Zealand, a battlecruiser paid for by the government of New Zealand at the height of its pro-Imperial 'jingo' era in 1909, when Britain's ally Japan was

perceived as a threat in Australasia and the Pacific. Born of the collision between New Zealand's patriotic dreams and European politics, the tale of HMS New Zealand is further wrapped in the turbulent power-plays at the Admiralty in the years leading up to the First World War. The ship went on to have a distinguished First World War career, when she was present in all three major naval battles – Heligoland, Dogger Bank and Jutland – in the North Sea. The book 'busts' many of the myths associated with the ship and her construction, including the intent of the gift, New Zealand's ability to pay,

deployment, and the story behind the piupiu (skirt) and tiki (pendant) that, the crew believed, bestowed special protection upon the vessel. All is inter-woven with the human and social context to create a 'biography' of the ship as an expression of human endeavour, in significantly more detail than any of the summaries available in prior accounts. Extensively illustrated, this is a book with appeal to a wide audience, from naval enthusiasts and historians to the general reader with a wider interest in the story of Empire. The use of archival material available only in New Zealand, including the

Ship's Book, adds a dimension and novelty not previously included in histories of this great battlecruiser.
