In this innovative, interdisciplinary study, James Elkins argues against the assumption that images can be adequately described in words. In his view, words must always fail because pictures possess a residue of 'meaningless' marks that cannot be apprehended as signs. On *Pictures and the Words that Fail Them* is a 1998 text which provides detailed, incisive critiques of fundamental notions about pictures: their allegedly semiotic structures; the 'rational' nature of realism;

and the ubiquity of the figure-ground relation. Elkins then opens the concept of images to non-Western and prehistoric ideas, exploring Chinese concepts of magic, Mesopotamian practices of counting and sculpture, religious ideas about hypostasis, philosophical discussions concerning invisibility and blindness, and questions on the limits of the destruction of meaning.

The Italian Renaissance was a creative period for art criticism as well as for art itself. The early efforts to give verbal accounts of visual representations and their quality throw light not only on the art of the period but also on art criticism at any time. This collection of papers by art historian and critic Michael Baxandall represents his thinking over the past forty years on the relation between language and art. He offers seven thought-provoking pieces, three of which are new and written specifically for this book. Focusing on works of the fifteenth century, Baxandall shows with fresh insight how words match the experience of looking at paintings and sculptures. The author introduces the basic Renaissance framework for art criticism and proceeds to explore various humanist critical writings of the fifteenth and early sixteenth centuries. He concludes with a major new essay on Piero della Francesca's Resurrection of Christ in which he probes the visual experience of a painting that

criticism seeks to verbalize.

Ricci's book ranges widely over Calvino's oeuvre to illustrate the accuracy of the idea articulated by Calvino himself that a visual image lies at the origin of all his narrative. The book's main theme is the difficult interface between word and image that Calvino struggled with throughout his career, the act of perception that rendered visible that which was invisible and transformed what was seen into what is read. Ricci holds that Calvino's narrative has an 'imagocentric' program and that his literary strategy is 'ekphrastic' i.e. it is characterized by literary description of visual representation, real or imaginary. The book is interdisciplinary in nature and will interest not only scholars of literature but also those who work with the visual arts and with information technology.
