From USA Today & Wall Street Journal Bestselling Author Jewel E. Ann comes Undeniably You, an angsty and unforgettable romance. Sydney Montgomery doesn't plan to make a career out of house-sitting. It's just the means to an end. In a month, she's off to visit the galleries of Europe and finish up the degree she needs to make her career as a museum curator. The life she's been working for is finally within reach. In the meantime, she's getting paid to sip margaritas and wrangle a naughty dog poolside in California. When the pool guy shows up with his hot body, cool persona, and eyes like iridescent blue oceans, she's mesmerized. Except Dr. Lautner Sullivan isn't the pool guy at all. He's a college wide receiver turned pediatric resident that fate delivered to the wrong house. Lautner is every girl's dream, but Sydney is not every girl. She's immune to rainbows, fairytales, surf-side picnics, and the "L" word. Thirty days is all she plans to give him, but fate wants to give them forever.

Taking the Heat Harper Collins

The untold story of Albert Einstein's role as the father of quantum theory Einstein and the Quantum reveals for the first time the full significance of Albert Einstein's contributions to quantum theory. Einstein famously rejected quantum mechanics, observing that God does not play dice. But, in fact, he thought more about the nature of atoms, molecules, and the emission and absorption of light—the core of what we now know as quantum theory—than he did about relativity. A compelling blend of physics, biography, and the history of science, Einstein and the Quantum shares the untold story of how Einstein—not Max Planck or Niels Bohr—was the driving force behind early quantum theory. It paints a vivid portrait of the iconic physicist as he grappled with the apparently contradictory nature of the atomic world, in which its invisible constituents defy the categories of classical physics, behaving simultaneously as both particle and wave. And it demonstrates how Einstein's later work on the emission and absorption of light, and on atomic gases, led directly to Erwin Schrödinger's breakthrough to the modern form of quantum mechanics. The book sheds light on why Einstein ultimately renounced his

own brilliant work on quantum theory, due to his deep belief in science as something objective and eternal.

Before the heyday of the Food Network, there was Chef Tell—nickname of Friedemann Paul Erhardt, America's first TV showman chef. Big on personality and flavor, Chef Tell was once called by Philadelphia magazine the "affably roguish Bad Boy of the Philadelphia restaurant world." Chef Tell explores how a young German American chef became America's biggest TV celebrity chef of his time. Most of Chef Tell's forty million baby boomer viewers—a number comparable to Julia Child's—never knew his fascinating, hardscrabble life story. Until now. This winning biography brings us "behind the line" into his kitchen and into his, at times, turbulent personal life. Tell was known as a charmer, as he worked the audience for live television shows, but also a quick-witted perfectionist, who demanded only the freshest ingredients for his life of food, fame, fortune, and women. Chef Tell's life—his colleagues would agree—was a managed, complicated, and mercurial affair, which changed two industries and millions of home cooks. An absorbing account of an extraordinary man, Chef Tell takes us through his personal and professional highs and lows; and his glorious successes that explain why so many loved, or hated, him then and miss him now. The day Chef Tell died messages of surprise and shock flooded the media, including "Chef Tell has died? Stick a fork in him, he's done." Chef Tell would have loved that. Readers will know why and agree.

A sharp, funny, informative and deliciously captivating book about writer, Bill Buford's year-in-training as a cook at Mario Batali's famous New York restaurant, Babbo, his apprenticeship to a Tuscan butcher, and his quest to make the perfect pasta. Highly acclaimed writer and editor, Bill Buford, left his job at The New Yorker for a most unlikely destination: the kitchen at Babbo, the revolutionary Italian restaurant created and ruled by superstar chef Mario Batali. Finally realizing a long-held desire to learn first-hand the experience of restaurant cooking, Buford soon finds himself drowning in improperly cubed carrots and scalding pasta water on his quest to learn the tricks of the trade, becoming—in his words—Batali's "kitchen bitch." Bill started out of curiosity, of wanting

to know how professional chefs cooked and in what ways that differed from what home cooks do. But he quickly became obsessed, and ended up spending a year “locked inside a hot, windowless room,” living “a weirdo life” while going through “kitchen boot camp” -- “a long, arduous, confidence-bashing, profoundly humiliating experience.” His love of Italian food then propelled him on journeys further afield: to Italy, to discover the secrets of pasta-making and, finally, how to properly slaughter a pig. Throughout, Buford stunningly details the complex aspects of Italian cooking and its long history, creating an engrossing narrative stuffed with insight and humor.

NEW YORK TIMES BESTSELLER • More than 2.7 million copies sold! • “ A deeply spiritual book [that] honors what is tough, smart and untamed in women. ” —The Washington Post Book World Book club pick for Emma Watson ’ s *Our Shared Shelf* Within every woman there lives a powerful force, filled with good instincts, passionate creativity, and ageless knowing. She is the Wild Woman, who represents the instinctual nature of women. But she is an endangered species. For though the gifts of wildish nature belong to us at birth, society ’ s attempt to “ civilize ” us into rigid roles has muffled the deep, life-giving messages of our own souls. In *Women Who Run with the Wolves*, Dr. Clarissa Pinkola Est é s unfolds rich intercultural myths, fairy tales, folk tales, and stories, many from her own traditions, in order to help women reconnect with the fierce, healthy, visionary attributes of this instinctual nature. Through the stories and commentaries in this remarkable book, we retrieve, examine, love, and understand the Wild Woman, and hold her against our deep psyches as one who is both magic and medicine. Dr. Est é s has created a new lexicon for describing the female psyche. Fertile and life-giving, it is a psychology of women in the truest sense, a knowing of the soul.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, *Nada*, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

The Stairway To Life Princeton University Press

Old ways are pitted against new horrors in this compellingly crafted, “ atmospherically beautiful ” (Kirkus Reviews) dystopian tale about a girl who is both healer and seer. Two hundred years from now, blood has become the most

valuable commodity on the planet—especially the blood of aboriginal peoples, for it contains antibodies that protect them from the Plague ravaging the rest of the world. Sixteen-year-old Cassandra Mercredi might be immune to the Plague, but that doesn't mean she's safe—government forces are searching for those of aboriginal heritage to harvest their blood. When a search threatens Cassandra and her family, they flee to the Island: a mysterious and idyllic territory protected by the Band, a group of guerilla warriors—and by an enigmatic energy barrier that keeps outsiders out and the spirit world in. And though the village healer has taken her under her wing, and the tribal leader's son into his heart, the creatures of the spirit world are angry, and they have chosen Cassandra to be their voice and instrument... Incorporating the traditions of the First Peoples as well as the more familiar stories of Greek mythology and Arthurian legend, *Shadows Cast by Stars* is a haunting, beautifully written story that breathes new life into ancient customs.

Like many modern-day Christians, Dr. Collins struggled with what seemed to be a clash between his belief in the Bible and the research regarding ancient history--a crisis of faith that inspired him to embark on an expedition that has led to one of the most exciting finds in recent archaeology.

Women Who Run with the Wolves Harper Collins

WINNER OF THE SHAUGHNESSY COHEN PRIZE FOR POLITICAL WRITING From the National Business Book Award winner and GG finalist, a very different book about facing the climate crisis, and what awaits us on the other side. Chris Turner has reported from the places where the sustainable future first emerged—from green islands in Denmark and green office parks in southern India, to solar panel factories in California and idealistic intentional communities from Scotland to New Mexico. Here, he condenses the first quarter century of the global energy transition into bite-sized chunks of optimistic reflection and reportage, telling a story of a planet in peril and a global effort already beginning to save it. This is a book that moves past the despair and futile anger over ecological collapse and harnesses that passion toward the project of building a twenty-first century quality of life that surpasses the twentieth-century version in every way. *How to Be a Climate Optimist* overflows with possibility in a moment of great panic, upheaval and uncertainty over a world on fire.

Einstein and the Quantum Simon and Schuster

This book is intended as an introductory logic design book for students in computer science, computer engineering, and electrical engineering. It has no prerequisites, although the maturity attained through an introduction to engineering course or a first programming course would be helpful.

The Mindful Attraction Plan Current

This book provides a broad overview on the different aspects of solar energy, with a focus on photovoltaics, which is the technology that allows light energy to be converted into electric energy. Renewable energy sources have become increasingly popular in recent years, and solar is one of the most adaptable and attractive types – from solar farms to support the National Grid to roof panels/tiles used for solar thermal heating systems, and small solar garden lights. Written by Delft University researchers, *Solar Energy* uniquely covers both the physics of photovoltaic (PV) cells and the design of PV systems for real-life applications, from a concise history of solar cells components and location issues of current systems. The book is designed to make this complicated subject accessible to all, and is packed with fascinating graphs and charts, as well as useful exercises to cement the topics covered in each chapter. *Solar Energy* outlines the fundamental principles of semiconductor solar cells, as well as PV technology: crystalline silicon solar cells, thin-film cells, PV modules, and third-generation concepts. There is also background on PV systems, from simple stand-alone to complex systems connected to the grid. This is an invaluable reference for physics students, researchers, industrial engineers and designers working in solar energy generation, as well those with a general interest in renewable energy.
