Going beyond the message of Lean In and The Confidence Code, Gannett's Chief Content Officer contends that to achieve parity in the office, women don't have to change—men do—and in this inclusive and realistic handbook, offers solutions to help professionals solve gender gap issues and achieve parity at work. Companies with more women in senior leadership perform better by virtually every financial measure, and women employees help boost creativity and can temper risky

---

behavior—such as the financial gambles behind the 2008 economic collapse. Yet in the United States, ninety-five percent of Fortune 500 chief executives are men, and women hold only seventeen percent of seats on corporate boards. More men are reaching across the gender divide, genuinely trying to reinvent the culture and transform the way we work together. Despite these good intentions, fumbles, missteps, frustration, and misunderstanding continue to inflict real and lasting damage on women's careers. What can the Enron scandal teach us about the way men and women communicate professionally? How does brain circuitry help explain men's fear of women's emotions at work? Why did Kimberly Clark blindly have an all-male team of executives in charge of their Kotex tampon line? In *That's What She Said*, veteran media executive Joanne Lipman raises these intriguing questions and more to find workable solutions that individual managers, organizations, and policy makers can employ to make work more equitable and rewarding for all professionals. Filled with illuminating anecdotes, data from the most recent relevant studies, and stories from Lipman's own journey to the top of a male-dominated industry, *That's What She Said* is a book about success that persuasively shows why empowering women as true equals is an essential goal for us all—and offers a roadmap for getting there.

Barry Joe McDonagh ("Joe Barry"), a native of Ireland, developed his anti-anxiety plan while studying at the University College of Dublin (UCD). His thoughts on anxiety and panic disorders were first published in 2001. Based on hard science and years of experience helping people who suffer from anxiety, Barry McDonagh has perfected the way to overcome anxiety and get people back to living life to the fullest. You will not only learn how to end your anxiety problem, but you will also discover how to turn this problem into personal triumph. Barry says "I teach people how to heal their anxiety so they can get back to living their life again to the fullest."

Hardbound. Until this century, there was no scientific method for developing and testing agents for the treatment of epilepsy. Physicians would often, from analogy to other conditions, try remedies which appeared to affect systems thought to be important in the onset of seizures. The many developments and treatment concepts in epilepsy research in the last half-century have culminated in the short reign of popularity of monotherapy. Monotherapy is now being challenged by rational polypharmacy, based on the theory that two or more antiepileptic agents with different mechanisms of action may be more beneficial. This volume addresses areas in which monotherapy may be made more rational, and proposes that rational polypharmacy is the natural

extension of rational monotherapy. Numerous issues are explored which need further delineation with a goal of a comprehensive antiepileptic drug management program to be developed for each patient.

Pain in later life is both quite common and disabling, and it differs significantly in terms of its aetiology, diagnosis and treatment from pain in the general adult population. Older people often have complicated co-morbidities, have a high prevalence of mental health problems (e.g., anxiety, cognitive impairment, and depression) and respond to treatment in different ways compared to younger people. Their specific needs are rarely discussed specifically in more general texts. Part of the "Oxford Pain Management Library," this pocketbook will serve as a concise companion for healthcare professionals who manage older patients suffering with pain. Concise chapters will summarise up-to-date research literature in a practical style that will have direct relevance to busy clinicians. Introductory chapters will include the epidemiology of pain in older people as well as the proper assessment of older patients with pain conditions. Later chapters will focus on specific painful conditions common in the elderly, including arthritis and rheumatism, osteoporosis, abdominal pain, and cancer. The book will appeal to a wide variety of health care professionals in both primary care and secondary care services such as geriatric medicine, rheumatology, orthopaedics, surgery, pain management and palliative medicine. The book will also be of relevance to nurses, physiotherapists, occupational therapists, clinical psychologists, pharmacists and other health care providers.

This book, first appearing in German in 2004 under the title *Spezielle Relativitätstheorie für Studienanfänger*, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions. 'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she

found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

A wedding. A trip to Spain. The most infuriating man. And three days of pretending. Or in other words, a plan that will never work. Catalina Martín, finally, not single. Her family is happy to announce that she will bring her American boyfriend to her sister's wedding. Everyone is invited to come and witness the most magical event of the year. That would certainly be tomorrow's headline in the local newspaper of the small Spanish town I came from. Or the epitaph on my tombstone, seeing the turn my life had taken in the span of a phone call. Four weeks wasn't a lot of time to find someone willing to cross the Atlantic—from NYC and all the way to Spain—for a wedding. Let alone, someone eager to play along with my charade. But that didn't mean I was desperate enough to bring the 6'4 blue eyed pain in my ass standing before me, Aaron Blackford. The man whose main occupation was making my blood boil had just offered himself to be my date. Right after inserting his nose in my business, calling me delusional, and calling himself my best option. See? Outrageous. Aggravating. Blood boiling. And much to my total despair, also right. Which left me with a surly and extra large dilemma in my hands. Was it worth the suffering to bring my colleague and bane of my existence as my fake boyfriend to my sister's wedding? Or was I better off coming clean and facing the consequences of my panic induced lie? Like my abuela would say, que dios nos pille confesados. The Spanish Love Deception is an enemies-to-lovers, fake-dating.
