Student Workbook and Selected Solutions Manual for Introductory Chemistry Longman

This workbook has been written to accompany the Agresti/ Franklin textbook, "Statistics". It contains, essentially, the notes that students will need to be successful in an introductory statistics course.

Concepts that are presented within the text are built upon and additional unique examples are introduced to solidify students understanding. This Workbook allows students to feel confident that, during lecture, they can simply listen to the Instructor and need not busy themselves with taking copious notes. This Workbook is written to foster student success. There is an instructor version (with answers) available for download from the IRC. This Workbook is ideal for people who are teaching introductory statistics for the first time, graduate students, adjunct professors, or professors who are mathematicians, not statisticians.
