The Inverted-U Model. There's a potential conflict of ideas between the Flow Model and the Inverted-U Model - a popular and widely respected model that helps explain the relationship between performance and pressure.. In the inverted-U graph, the vertical axis represents someone's level of performance, while the horizontal axis represents the pressure that he or she is under.

Welcome to state.gov. We recently modernized our website. Part of this modernization was to reduce the number of pages on the current state.gov website by not moving items that are in existence on our archive sites. This keeps the content on the current state.gov current while older content remains intact and fully accessible on our [...]

My 10-Year Plan: the plan for my future: Pages

At some point in the day, everyone is a pedestrian, and unfortunately pedestrian fatalities remain high. There was a more than 3% increase in the number of pedestrians killed in traffic crashes in 2018, totaling 6,283 deaths - the most deaths since 1990. NHTSA raises awareness of the dangers to pedestrians by providing safety tips, educational material and other resources. Find out how to ...
