These questions are addressed in *Nursing Staff in Hospitals and Nursing Homes*, a thorough and authoritative look at today's health care system that also takes a long-term view of staffing needs for nursing as the nation moves into the next century. The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and presents recommendations about staffing decisions, nursing training, measurement of quality, reimbursement, and other areas. The volume also discusses work-related injuries, violence toward and abuse of nursing staffs, and stress among nursing personnel--and examines whether these problems are related to staffing levels. Included is a readable overview of the underlying trends in health care that have given rise to urgent questions about nurse staffing: population changes, budget pressures, and the introduction of new technologies. *Nursing Staff in Hospitals and Nursing Homes* provides a straightforward examination of complex and sensitive issues surround the role and value of nursing on our health care system.

Managing the Aging Workforce is one of the crucial topics for many of the world s enterprises. The increasing average age of populations does not only affect social systems, countries and communities, but also has a strong impact on the work of businesses and companies. The decline in demographic fitness will not only hit countries like the U.S., the Western European countries, or Japan, but also the upcoming societies in China or in the Eastern European

countries. In many of these countries, during three or four decades the average age will grow from about 40 years now to about 50 years. Where experts are needed, this may result in an increase of the workforce's age of between 5 and 10 years in only one decade. For companies thus, a number of challenges arise that have to be overcome fast and continuously. The main topics in this field will be new strategies in leadership, new concepts in health management, new ways in knowledge management and learning, as well as new models how to drive ideas for diversity and innovation. On the one hand, enterprises therefore will have to invest in their aging employees for supporting their talents, helping them to learn and keeping them in the company. On the other, they will have to increase productivity, keep on searching for new products, and integrate experts from abroad. This has to be combined with new ways of strategies and HR management. This book presents an analysis of the present and upcoming situation, and an introduction into the strategic concepts enterprises will need to survive in aging societies.

"Good government" is commonly seen either as a formidable challenge, a distant dream, or an oxymoron, and yet it is the reason why Wisconsin led America toward welfare reform. In this book, Lawrence Mead shows in depth what the Badger State did and--just as important--how it was done. Wisconsin's welfare reform was the most radical in the country, and it began far earlier than that in most other states. It was the achievement of legislators and administrators who were unusually high-minded and effective by national standards. Their decade-long struggle to overhaul welfare is a gripping story that inspires hope for better solutions to poverty nationwide. Mead shows that Wisconsin succeeded--not just because it did the right things, but because its government was unusually masterful. Politicians collaborated across partisan lines, and administrators showed initiative and creativity in revamping welfare. Although Wisconsin erred at some points, it achieved promising policies, which then had good outcomes in terms of higher employment and reduced dependency. Mead also shows that these lessons hold nationally. It is states with strong good-government traditions, such as Wisconsin, that typically have implemented welfare reform best.

Thus, solutions to poverty must finally look past policies and programs to the capacities of government itself. Although governmental quality is uneven across the states, it is also improving, and that bodes well for better antipoverty policies in the future.

No one understands the intersection of talent and technology better than Allan Schweyer and, as this book demonstrates, no one tells us the story as clearly as he. This is an essential read and an important work in the now-critical discipline of human capital management." —Michael Foster, CEO, AIRS, and Author of Recruiting on the Web "Allan Schweyer has been on the leading edge of recruitment technology since the dawn of the Internet. In many ways the Internet has created more confusion than solutions for the world of recruiting and talent management. It has certainly made things more complex. HR professionals and even company presidents have become desperate for clarity on the future of talent management—Allan Schweyer's book provides that clarity and establishes him as the authority on web-based hiring and talent management. No major implementation decision should be made without this invaluable guide." —Graham Donald, President, Brainstorm Consulting "Talent management has suddenly gone from being a nice idea to a core business function. No one knows more about this new function, and the technologies that make it possible, than Allan Schweyer." —David Creelman, Senior Contributing Editor, HR.com, and Independent Human Capital Analyst "Once again, Schweyer has produced the best writing in North America on this subject, which I've covered for fifteen years." —Bill Kutik, Technology Columnist, Human Resource Executive "As corporate executives quickly come to the shocking realization that the global workforce—and how that talent is managed and developed both locally and globally—will almost unilaterally determine their future success in global markets, few workforce experts have bothered to provide business leaders with a useful compass and map for the next chapter of workforce management. Mr. Schweyer generously and eloquently provides the talent compass and workforce map for the first pragmatic steps of the new global journey." —John Chaisson, CEO, Global Workforce Solutions
