The book reflects the advanced level and high quality of research which Building Engineering, and Building Physics/Science in particular, have reached at the beginning of the twenty-first century. It will be a valuable resource to: engineers, architects, building scientists, consultants on the building envelope, researchers and graduate students.

The First-time Manager's Guide to Performance Appraisals Jones & Bartlett Publishers  
Praise for A-HA! Performance "Since I wrote Choice Theory many years ago, I have come to the conclusion that there is only one major human problem: we have yet to figure out how to get along well with each other. In this book, Walker supports this conclusion with humor, creativity, and great insight. Managers who both follow his suggestions and teach them to those they manage will be rewarded with a happy and profitable workplace. And do it at less cost than the company is spending now." --William Glasser, MD, President and founder, William Glasser Institute, and author of Choice Theory and Reality Therapy "If ever there was a title that perfectly matched the content of a book, this is it. I have never experienced more a-ha's from a book in my life. One of the biggest a-ha's is that you don't build a motivated workforce--you already have one! If you manage people--and especially if you aspire to truly lead people--then this book is required reading. Rock-solid ideas from a master on motivation." --Joe Calloway, author of Work Like You're Showing Off! "An amazingly practical and prodigiously useful resource to help create and bolster a world-class sales force, but also a blueprint for better living in general. An absolute mandatory read for all my employees, not to mention friends and family members. I don't know anyone who couldn't benefit from applying the A-HA model. The title might be more apropos if it were 'Holy cow! Where's this been my whole career?'" --Robert H. Fleet, Branch Manager, National Builder Division, Countrywide Home Loans "A-HA! Performance should be mandatory reading for every manager. Each chapter offers simple and compelling methods for building and managing a self-motivated workforce. The realistic examples presented throughout the book reinforce the steps in the A-HA model and provide the foundation for easy application to professional and personal situations." --Ann Owens, Vice President, Total Rewards Management, QUALCOMM "Avoiding a fight-or-flight reaction from an employee who needs coaching on improved performance or behavior changes requires the manager understand the employee's vested interest. Walker teaches the skills required to

effectively create three wins: for the company, the employee, and the manager. It's a must-read for all leaders who want to be more proficient in getting needed performance changes from their employees by improving their own nurturing, coaching, or mentoring skills. I'm reading it for the third time and still gleaning more tips and insights. Even though it's constructed as a managerial self-help book, it's really an insightful, powerful textbook, and as such needs to be studied." --Ron Cook, National Accounts Manager, 3M

Eine Übersicht für Architekten, die auch die Bedeutung der Baustoffwahl für die sinnliche Wahrnehmung von Architektur wie Haptik, Geruch, Farbe, Oberflächenstruktur berücksichtigt, gab es bisher nicht. Mit dem Baustoff Atlas wird diese Lücke nun geschlossen. Als ein auf die Interessen von Architekten und Bauingenieuren gleichermaßen abgestimmtes Grundlagenwerk wird er alle genannten Betrachtungsebenen vereinen. Dabei werden sowohl grundsätzliche Nachhaltigkeitsfragen wie Lebensdauer, Umweltbelastung und Stoffkreislauf ebenfalls als auch Materialinnovationen vorgestellt. Alle wesentlichen herkömmlichen und neuartigen Baustoffe werden hinsichtlich Herstellung, Verarbeitung, Oberflächen, Anschlüssen und Kenndaten umfassend dokumentiert. Internationale Beispiele, deren Erscheinungsbild sich häufig aus jeweils einem Material definiert, veranschaulichen die Anwendung in der Architektur. Der Baustoff Atlas unterstützt damit die tägliche Arbeit von Architekten und Ingenieuren bei der Baustoffauswahl auf eine umfassende, zugleich anschauliche und anregende Weise.

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.
