From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of

high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and

promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

A career engineer at Studebaker, Harold E. Churchill became president of

the recently merged Studebaker-Packard Corporation in 1956, at a time when finances were shaky and an aging product line was losing ground to the Big Three. Quickly launching a program of "realism and common sense," he focused the company's energies on a few selected market segments where he saw opportunities for gain. His vision for a compact economy car led to the Lark, the hit model that Studebaker desperately needed. This thorough examination of Churchill's

leadership of Studebaker-Packard draws upon Board of Directors minutes, internal documents, oral histories and media reports in constructing a detailed account of these crucial years. In addition to covering the cars and trucks produced under Churchill in detail, it closely traces Churchill's actions as president and analyzes his motivations, the pressures he faced, his leadership style and the success or failure of his tenure. *The Complete Book of Porsche 911*
