Investment Banking,  
UNIVERSITY EDITION  
is a highly accessible and  
authoritative book  
written by investment  
bankers that explains  
how to perform the  
valuation work at the  
core of the financial  
world. This body of work  
builds on Rosenbaum and  
Pearl ' s combined 30+  
years of experience on a  
multitude of transactions,  
as well as input received

from numerous  
investment bankers,  
investment professionals  
at private equity firms  
and hedge funds,  
attorneys, corporate  
executives, peer authors,  
and university professors.  
This book fills a  
noticeable gap in  
contemporary finance  
literature, which tends to  
focus on theory rather  
than practical application.  
It focuses on the primary  
valuation methodologies  
currently used on Wall  
Street—comparable  
companies, precedent

transactions, DCF, and  
LBO analysis—as well as  
M&A analysis. The ability  
to perform these  
methodologies is  
especially critical for  
those students aspiring to  
gain full-time positions at  
investment banks, private  
equity firms, or hedge  
funds. This is the book  
Rosenbaum and Pearl  
wish had existed when  
we were trying to break  
into Wall Street. Written

Fad-Free Strategy provides a  
ground-breaking approach to  
making better business  
strategy decisions: more  
efficient, open to out-of-the-

box opportunities and evidence-based. Most strategy books  
focus on Grand Strategy, the  
process that leads to high-level  
recommendations or, more  
accurately, hypotheses about  
where and how to compete.  
While this book briefly covers  
critical Grand Strategy  
practices, it deep dives into  
Operational Strategy, the  
process of validation,  
adaptation and possible  
rejection of those hypotheses.  
Operational Strategy is based  
on an in-depth understanding  
of customer preferences and  
anticipating the choices they  
make. Those choices rather  
than managers' ambitions  
determine whether a strategy

will generate the aspired  
financial results. The book  
explains, by means of detailed  
real-world cases across  
industries, how to generate  
validated solutions to any  
strategic problem such as: how  
to enter successfully into new  
markets, either as an innovator  
or as a latecomer? How to  
defend one's position against  
aggressive new entrants? Or  
how to sustain margins when  
price is the only thing  
customers seem to care  
about? This remarkable book  
contains expert advice from  
accomplished strategic  
advisors and thought leaders

will be a useful tool for smart business executives at mainstream companies who are disappointed with strategy fads and simplistic solutions based on cherry-picked, anecdotal evidence from today's hero companies. It will also appeal to economics faculty members teaching graduate courses in business strategy who are looking for an economics-based strategy textbook that is both rigorous and comprehensive. The book's core ideas have been taught successfully in continuing and executive education programs at Harvard University and Hult International Business School.

Secured transactions law has been subjected to a close scrutiny over the last two decades. One of the main reasons for this is the importance of availability of credit and the consequent need to reform collateral laws in order to improve access to finance. The ability to give security effectively influences not only the cost of credit but also, in some cases, whether credit will be available at all. This requires rules that are transparent and readily accessible to non-lawyers as

well as rules that recognise the needs of small and medium-sized enterprises. This book critically engages with the challenges posed by inefficient secured credit laws. It offers a comparative analysis of the reasons and the needs for a secured transactions law reform, as well as discussion of the steps taken in many common law, civil law and mixed law jurisdictions. The book, written under the auspices of the Secured Transactions Law Reform Project, informs the debate about reform and advances novel arguments written by world renowned experts that will build upon the existing

---

literature, and as such will be of interest to academics, legal practitioners and the judiciary involved in secured transactions law around the world. The text considers reform initiatives that have taken place up to the end of April 2016. It has not been possible to incorporate events since then into the discussion. However, notable developments include the banks decree passed by the Italian Government on 29th June 2016, and the adoption of the Model Law on Secured Transactions by UNCITRAL on 1st July 2016.
