The Social Science Encyclopedia, first published in 1985 to acclaim from social scientists, librarians and students, was thoroughly revised in 1996, when reviewers began to describe it as a classic. This third edition has been radically recast. Over half the entries are new or have been entirely rewritten, and most of the balance have been substantially revised. Written by an international team of contributors, the Encyclopedia offers a global perspective on the key issues within the social sciences. Some 500 entries cover a variety of enduring and newly vital areas of study and research

methods. Experts review theoretical debates from neo-evolutionism and rational choice theory to poststructuralism, and address the great questions that cut across the social sciences. What is the influence of genes on behaviour? What is the nature of consciousness and cognition? What are the causes of poverty and wealth? What are the roots of conflict, wars, revolutions and genocidal violence? This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society.

Hearings on family-friendly workplaces for fathers were held in an effort to help create a corporate culture that allows fathers to take advantage of and support different workplace policies. Fathers' impact on children's development, and the reasons why it is important for fathers to be part of the parenting process, are examined. Representative Patricia Schroeder, who presided, cited America West Airlines, Merck, and DuPont as examples of family-friendly corporations. A fact sheet included for the record summarizes relevant national data, including data on fathers' attitudes toward balancing work and family, fathers' involvement in children's well-being, and employer responses to family responsibilities. Family-oriented work policies prepared by the Bureau of National Affairs are also presented in fact-sheet style. The policies cover options in the areas of the time and place of work, counseling programs, child care, leave, information and seminars, telephone access, and financial support. Prepared statements and testimony from witnesses representing such organizations as the City of Los Angeles, the Families and Work Institute, the Family Research Council, the University of Michigan, CBS (Columbia Broadcasting System, Inc.), the Association of Part-Time Professionals, and the Society for Human Resource Management are

Resources in Education Routledge Arnstine shows how schools have been distracted from education by reformers urging higher standards the code word for higher test scores. But education is revealed in the dispositions a person has: sensitivity and resourcefulness, amiability and responsibility, taste, wit, and a disciplined intelligence. This book examines the conditions needed to foster dispositions like these, for they are not acquired by having the young spend more time studying standard academic subjects in preparation for competitive tests. Without recourse to esoteric jargon, Democracy and the Arts of Schooling shows why test scores are less significant than the quality of the experiences students have in school. When that quality is high when it has the richness and the absorbing character we associate with the aesthetic then learning takes place.
