Smart Questions

offers an entirely new framework for creating solutions.

Drawn from the authors' many years of research and field experience, the Smart

Questions Approach

reveals how the leading creators of solutions in almost every profession and

walk of life—including

business, government, education, and even in families—think and approach their

assignments. The

author's holistic thinking approach

shows how to use

three "foundation" questions—focusing on

uniqueness,

purposeful

information, and

systems—which must be explored for every

problem. These three questions, an

essential starting point for exploring

problems, in turn

lead to other key

questions that will ultimately create

effective solutions.

Critical Thinking provides language teachers with a dynamic framework for encouraging critical thinking skills in explicit, systematic ways during their lessons. With the proliferation of fallacious arguments, "fake news," and untrustworthy sources in today's multimedia landscape, critical thinking skills are vital not only in one's native language, but also when engaged in the task of language learning. Written with the language teacher in mind, this book provides a springboard for teaching critical thinking skills in multicultural, multilingual classrooms. Suitable for graduate students, in-training teachers, and language curriculum developers interested in purposeful applications of critical thinking pedagogy for the second-language classroom, this volume presents classroom activities, suggestions for lesson planning, and ideas for researching the impact of critical thinking activities with second-language learners. This book is ideal as an invaluable resource for teacher-directed classroom investigations as well as graduate dissertation projects.
