This individual
Shop Manual is one
unit of a series on
agricultural wheel
type tractors.
Contained in it are
the necessary

specifications and the
brief but terse
procedural data
needed by a
mechanic when
repairing a tractor
on which he has had
no previous actual
experience. The
material is arranged
in a systematic order
beginning with an
index which is
followed
immediately by a
Table of Condensed
Service
Specifications.
These specifications
include dimensions,
fits, clearances and
timing instructions.
Next in order of
arrangement is the
procedures section.
In the procedures
section, the order of
presentation starts
with the front axle
system and steering

and proceeds toward the rear axle. The last portion of the procedures section is devoted to the power take-off and power lift systems. Interspersed where needed in this section are additional tabular specifications pertaining to wear limits, torquing, etc.

Haynes Manuals N. America, Incorporated

Using a Haynes manual is like having a mechanic in every book. Our mechanics and writers work together on the project vehicle to arrive at the best possible procedures for the home mechanic and then photograph the actual work and write instructions so the reader can easily follow along. Haynes manuals include procedures for everything from routine maintenance to complete engine overhaul, and include wiring diagrams in the back of each book.
