"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.

This book explores major similarities and differences in the structure, conduct, and performance of the national technology transfer systems of Germany and the United States. It maps the technology transfer landscape in each country in detail, uses case studies to examine the dynamics of technology transfer in four major technology areas, and identifies areas and opportunities for further mutual learning between the two national systems.

Southern Dalmatian islands
(Rough Guides Snapshot Croatia)
Hachette Books

This is one of the most significant military books of the twentieth

century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Charting their training, travels,
and performances, this innovative
study explores the role of the
artists that roamed the Chinese
countryside in support of Mao's
communist revolution. DeMare
traces the development of Mao's
'cultural army' from its genesis in
Red Army propaganda teams to its
full development as a largely

civilian force composed of amateur
and professional drama troupes in
the early years of the People's
Republic of China (PRC).
Drawing from memoirs, artistic
handbooks, and rare archival
sources, Mao's Cultural Army
uncovers the arduous and complex
process of creating revolutionary
dramas that would appeal to
China's all-important rural
audiences. The Communists
strived for a disciplined cultural
army to promote party policies,
but audiences often shunned
modern and didactic shows, and
instead clamoured for traditional
works. DeMare illustrates how
drama troupes, caught between the
party and their audiences, did their
best to resist the ever growing reach
of the PRC state.

In Las Vegas, there's a family-
owned business called the Gold
& Silver Pawn Shop, run by
three generations of the
Harrison family: Rick; his son,
Big Hoss; and Rick's dad, the
Old Man. Now License to Pawn
takes readers behind the scenes

of the hit History show Pawn Stars and shares the fascinating life story of its star, Rick Harrison, and the equally intriguing story behind the shop, the customers, and the items for sale. Rick hasn't had it easy. He was a math whiz at an early age, but developed a similarly uncanny ability to find ever-deepening trouble that nearly ruined his life. With the birth of his son, he sobered up, reconnected with his dad, and they started their booming business together. License to Pawn also offers an entertaining walk through the pawn shop's history. It's a captivating look into how the Gold & Silver works, with incredible stories about the crazy customers and the one-of-a-kind items that the shop sells. Rick isn't only a businessman; he's also a historian and keen observer of human nature. For instance, did you know that pimps wear lots of jewelry for a reason? It's because if they're arrested,

jewelry doesn't get confiscated like cash does, and ready money will be available for bail. Or that WWII bomber jackets and Zippo lighters can sell for a freakishly high price in Japan? Have you ever heard that the makers of Ormolu clocks, which Rick sells for as much as \$15,000 apiece, frequently died before forty thanks to the mercury in the paint? Rick also reveals the items he loves so much he'll never sell. The shop has three Olympic bronze medals, a Patriots Super Bowl ring, a Samurai sword from 1490, and an original Iwo Jima battle plan. Each object has an incredible story behind it, of course. Rick shares them all, and so much more--there's an irresistible treasure trove of history behind both the Gold & Silver Pawn Shop and the life of Rick Harrison. Journal of the History of Ideas (2008) The French revolts of May 1968, the largest general strike in twentieth-century Europe, were among the most famous and colourful episodes of the twentieth century. Julian Bourg argues that during the subsequent decade the revolts led to a remarkable paradigm shift in French thought -

the concern for revolution in the 1960s was transformed into a fascination with ethics. Challenging the prevalent view that the 1960s did not have any lasting effect, *From Revolution to Ethics* shows how intellectuals and activists turned to ethics as the touchstone for understanding interpersonal, institutional, and political dilemmas. In absorbing and scrupulously researched detail Bourg explores the developing ethical fascination as it emerged among student Maoists courting terrorism, anti-psychiatric celebrations of madness, feminists mobilizing against rape, and pundits and philosophers championing humanitarianism. *From Revolution to Ethics* provides a compelling picture of how May 1968 helped make ethics a compass for navigating contemporary global concerns. In a new preface for the second edition published to mark the fiftieth anniversary of the events, Bourg assesses the worldwide influence of the ethical turn, from human rights to the return of religion and the new populism. *The Struggle in Iliomar* Dorling

The book is a civil engineering handbook on winch and cable systems. The handbook may be used as textbook for university studies in civil engineering and forestry and as the basis for studies in schools on a technical level. It should be a useful reference book for construction engineers, civil engineers, logging engineers, foresters and leaders of operational activities under difficult terrain conditions. The content in the book is based on more than 35 years experience with practical winch and cable operations. As a leader of the Norwegian Institute of Forest Operations, the author has carried out research work in this field since 1947. The Institute is the owner of yarders, winches, cable cranes etc., and with its own cable crews the Institute operates as a contractor in its own research forests as well as in other state or privately owned forests throughout Norway. The research work also includes other cable crane operations in Norway and other countries. As the leader of the Joint FAO/ECE/ILO Study Group on Mechanized Forest

Operations the author studied cable operations in most of the Eastern and Western European countries. As president of the International Union of Forestry Research Organizations the author visited most forest countries in the world. Information from research and practical cable crane operations were collected. The handbook is based on material on winch and cable systems used in Japan, New Zealand, Soviet Union, Central Europe, Northern Europe, Eastern United States, Western United States and British Columbia. Nero & Other Plays Society of Automotive Engineers Provides extensive information on state-of-the art diesel fuel injection technology. The Galapagos Independently Published Fiction. "BOUND BY BLUE by Meg Tuite sparkles darkly with dense, poetic prose also resembling a hidden knife or gag in the deepest shade of indigo. At the heart of Tuite's work is memory—specifically, often, the memory of sexual

trauma. From externally successful medical student Audrey in 'The F Word,' whose revisited sexual past spurs a destructive eating disorder that nearly debilitates her current romantic relationship, to the sweet seven year old Marliss in 'The Tooth Fairy,' writing with a child's literacy to the Tooth Fairy in the nearly impossible hope of being saved from her brother's molesting friend, Tuite deftly runs the gamut of characters emerging from the camp of life's walking wounded. Often, I found, while reading this collection, that I had to pause and absorb, spend a moment away after reading one particular story or another. Tuite's work is that dark, trenchant, and powerful. The binding garotte here is that of forced silences, of invisible shames, of acts of violence done by one individual to another, the cumulative maimed butterfly effect of these agents—and be forewarned, with the aid of

Tuite's deft skill, the monsters are out of the closets, lingering with lambs, in this explosive collection where even the darkest of her characters is acerbically revealed as human, multi-faceted, and just flawed enough to be somewhat sympathetic in a horrifying and double-edged way that only increases the reader's understanding of their abuse's terrifying resonance for their victims."—Heather Fowler [Ford KA Petrol 2008-2014](#)

Pivotal to modern warfare, tanks have dominated the battlefield for over a century. Get up close to more than 400 military colossuses with this definitive visual guide to armoured vehicles. In 1916, the British built a vehicle that could pound the battlefield impervious to enemy fire, crushing obstacles and barbed wire in its path. The first tank, or "Mother" as it was known, had arrived. In *The Tank Book* you can view it in detail, along

with other iconic models including the German Panzer, the legendary Tiger, the Vickers Medium Mark II, the Centurion, and the Hellcat - the fastest armoured fighting vehicle ever. This comprehensive volume takes you through the most exciting story in recent military history with the development of heavy artillery, anti-tank weaponry, and the men - such as Mikail Koshkin and Sir William Tritton - who designed these awe-inspiring beasts. Produced with The Tank Museum, The Tank Book traces the tank's development in response to two world wars, Korea, Vietnam, the Cold War and many other conflicts. It shows each model in detail, highlighting details such as their performance, specification, armour, weaponry, and much more. If you are interested in modern warfare, The Tank Book is truly unmissable reading.
