The authors of VOYAGES IN WORLD HISTORY never forget that history is made up of the stories of people. Each chapter of the text centers on a story -- a traveler's account that highlights the book's main theme, the constant movement of people, goods, and ideas. The travelers include merchants, poets, rulers, explorers, soldiers, missionaries, and scholars, and their voyages provide a framework for each chapter that will capture students' interest and draw them into the stories of the people, places, and events crucial to understanding world history. Special features highlight connections across chapters, societies, and periods, helping students understand historical events in a global context. Available in the following split options: VOYAGES IN WORLD HISTORY, Third Edition Complete, Volume 1: To 1600, and Volume 2: Since 1500. Are There More Worlds Than One? Why are countless worlds swinging in the endless regions of space? Description of a novel city of over 60,000 Moonites, described as dwarfs having no noses because they live by eating solid air. Marsites described as giants needing four arms. The author captured by Marsmen. A Glimpse of Jupiter. Jupiterites described as colossal giants. Their language a marvel of simplicity far surpassing the English language. Beautiful Saturn. Marvelous language-music. Churches on Saturn far better than those on Earth. The inhabitants of Alpha Centaurus live as comfortably in fire as Earthites live in air or fishes in water. On Stazza the people live in water about as fishes do on Earth. Fishing for land animals. A Problem in Political Economy. On Ainess the inhabitants live on liquid air, and hence have neither noses nor lungs. Monopolists control liquid air on Ainess as petroleum is controlled on Earth. Method of breaking up the power of monopolies. This chapter is worth reading by millions of American men and women. Floating Cities. Palaces and large cities built on water. A World of Ideal Cities. Inhabitants described. Author made captive. Rich and poor. Ideal cities, how governed. A World of High Medical Knowledge. On Dorelyn four billions of inhabitants all enjoy perfect health. The government controls the whole field of medical science just as we do the post office department. No patent medicine on Dorelyn. Many new ideas picked up in medicine and surgery. A World of Low Life. On Scum exist the lowest conditions of life found in any stellar world. "Notched Rod" language explained. Lizard like human forms. No Scumite knows who is his father or mother. A big Scumite battle witnessed. A World of Highest Invention. A fertilizer invented making possible the raising of six crops in one of our years. A Tube Line for passenger and freight traffic. Wonderful storage batteries. A telephone that not only carries sound, but transmits the gestures and faces of the speakers. Thought photography. A Singular Planet. On Zik decisive

battles between nations are not fought by armies on land or navies on the sea, but by flying war ships called Flying Devils sailing in the air. A battle witnessed. A practical way of settling the strife between capital and labor. The art of maintaining youthful vigor in old age. The Diamond World. On the brightest planets of the universe diamonds are as plenty as soil is on our Earth, but soil is as scarce and valuable as diamonds are in our world. The heart-rending oppression of the "Soil Trust" in the Diamond World portrayed. Illustration. The insatiable greed of "Trusts" follows the poor people into their sepulchers. Triumphant Feat of Orion. Description of a tunnel through the center of Hohen, a globe 500 miles in diameter. The Mute World. Muteites have no audible language. They converse by pure thought transmission, and no one can conceal evil thoughts. When a Muteite criminal is brought before a Court of Justice the doors of his soul are unlocked so that all past thought-images, photographed on the sensitive living plates of his mind, are thrown open to view. No hypocrisy, no conventional lying. The world of Brief sustains the shortest lived human beings of our universe. What we in our world crowd into seventy or eighty years of life the Briefites crowd into the narrow compass of about four years of our time. Journalism, footwear, raiment, transportation, public highways, business, religious life, etc., portrayed under such mad-rush environments. The Life on Wings. The inhabitants of Swift are charmingly beautiful, and many of them can be seen gracefully moving on wings through the air. A charming conversation with Plume, the most beautiful woman in the universe. Heaven. Its greatness, permanency, inhabitants, degrees, seven typos of intelligences, unity, employments, transportation, sexual affinities, structural aspects, etc., uniquely portrayed.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

The History of the United States Liveright Publishing

Revealing the central yet intentionally obliterated role of Africa in the creation of modernity, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the "New World." Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, ad infinitum. The history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping

narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe's dehumanizing engagement with the "dark" continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe's yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who heroically battled seventeenth-century European powers, to the ex-slaves who liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more often, elision in depictions of African history throughout the last five hundred years. As French shows, the achievements of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siloes and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic "rise of the West" theories that have endured to this day.

"Capacious and compelling" (Laurent Dubois), *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest "commodity" of them all, the twelve million people who were brought in chains from Africa to the "New World," whose reclaimed lives shed a harsh light on our present world.

What do we know about ordinary people in our towns and cities, about what really matters to them and how they organize their lives today? This book visits an ordinary street and looks into thirty households. It reveals the aspirations and frustrations, the tragedies and accomplishments that are played out behind the doors. It focuses on the things that matter to these people, which quite often turn out to be material things – their house, the dog, their music, the Christmas decorations. These are the means by which they express who they have become, and relationships to objects turn out to be central to their relationships with other people – children, lovers, brothers and friends. If this is a typical street in a modern city like London, then what kind of society is this? It's not a community, nor a neighbourhood, nor is it a collection of isolated individuals. It isn't dominated by the family. We assume that social life is corrupted by materialism, made superficial and individualistic by a surfeit of consumer goods, but this is misleading. If the street isn't any of these things, then what is it? This brilliant and revealing portrayal of a street in modern London, written by one of the most prominent anthropologists, shows how much is to be gained when we stop lamenting what we think we used to be and focus instead on what we are now becoming. It reveals the forms by which ordinary people make sense of their lives, and the ways in which objects become our companions in the daily struggle to make life meaningful.

An Indigenous Peoples' History of the United States for Young People Routledge

This is Volume I: To 1877 of *LIBERTY, EQUALITY, POWER*, Fourth Edition. *LIBERTY, EQUALITY, POWER* offers students a clear understanding of how America transformed itself, in a relatively short time, from a land inhabited by hunter-gatherer and agricultural Native American societies into the most powerful industrial nation on earth. The authors promote this understanding by telling the story of America through the lens of three major themes: liberty, equality, and power. This approach helps students understand not only the impact of the notions of liberty and equality, which are often associated with the American story, but also how dominant and subordinate groups have affected and been affected by the ever-shifting balance of power. This Fourth Edition retains the narrative clarity, unparalleled coverage, and thematic unity that are the hallmarks of *LIBERTY, EQUALITY, POWER*. It updates the text's proven ability to cover social and cultural history with such timely topics as globalization, the impact of science and technology, evolving roles for religion, and expands upon the text's extensively multicultural coverage. Backed by an ancillary package unmatched in this market, *LIBERTY, EQUALITY, POWER* makes its thorough, memorable coverage equally accessible to students and instructors. It's available in the following volume splits: *LIBERTY, EQUALITY, POWER: A HISTORY OF THE AMERICAN PEOPLE*, Fourth Edition (Chapters 1-31) ISBN: 0534627307 *LIBERTY, EQUALITY, POWER: A HISTORY OF THE AMERICAN PEOPLE*, Volume I: To 1877, Fourth Edition (Chapters 1-17) ISBN: 0534627315 *LIBERTY, EQUALITY, POWER: A HISTORY OF THE AMERICAN PEOPLE*, Volume II: Since 1863, Fourth Edition (Chapters 17-31) ISBN: 0534627323.

This latest addition to the *Greenwood Histories of the Modern Nations* series explores the history of a nation close to home: the United States. *The History of the United States* explores our young nation's precolonial history through present day. The first chapter establishes the central theme of the book--the struggle to define the meaning of "We the People." Chapters 2 and 3 focus on America between 1400 and 1763, highlighting the diversity of early America and the interactions and conflicts between Native Americans, Africans, and various Europeans. Chapter 4 focuses on the Revolutionary Era (1763-1815), emphasizing the republican ideas that sparked the Revolution and debates over the shape of the new nation. Chapters 5-7 take the story through the antebellum years, the political crisis of the 1850s, and the Civil War and Reconstruction, with issues of slavery at the center. Chapters 8-9 discuss the social, political, and economic conflicts of the Gilded Age and the Progressive Era, concluding with America's participation in World War I and the 1920s. Chapters 10-12 cover the 1930s through the present, focusing on the expanding role of the United States in the world and the competing progressive and conservative impulses of the era. Offers a comprehensive but concise and thematically coherent narrative history of the United States Highlights the diversity of the American people over time Documents the efforts of reformers of many different stripes to make the promises of America's founding documents real in the lives of all Americans

The Comfort of Things Macmillan

New York Times Bestseller Now part of the HBO docuseries "Exterminate All the Brutes," written and directed by Raoul Peck Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, *An Indigenous Peoples' History of the United States* is an essential resource providing historical threads that are crucial for understanding the present. In *An Indigenous Peoples' History of the United States*, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular

culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative. *An Indigenous Peoples' History of the United States* is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature.

Leaving the World to Enter the World focuses on the fictional and theoretical writings of Han Shaogong, one of the most striking voices in contemporary Chinese literature. Han played a central role in the 'root-seeking' trend that dominated the literary scene of the People's Republic of China in the mid-1980s. His work has won him acclaim from a wide range of readers in Chinese and other languages, a highlight being the 1996 novel Dictionary of Maqiao. Critics have labeled Han the leader of a nationalist movement in search of a cultural identity. Mark Leenhouts shows that Han's role is much more complex, demonstrating that his literary practice is a highly individual, creative continuation of Chinese tradition. Han's personal style transcends the narrow boundaries of root-seeking as it has been portrayed in literary histories and criticism to date. This rectification of the one-sided image of Han Shaogong has profound implications for the significance of root-seeking literature, and for questions of tradition and modernity that have been among the most hotly debated topics in Chinese literary, intellectual and political thought throughout the 20th century. Leaving the World to Enter the World does justice to the individuality of the literary author by taking the intrinsic structure of the literary work as its starting point. Leenhouts' close textual analysis, as intelligent and pragmatic as it is sensitive, will help counterbalance the socio-political orientation typical of much recent research. By seeing Han Shaogong as a writer rather than a mouthpiece of historical forces, this book opens up new perspectives for enjoying his literary mastery.

Power to the People examines the varied but interconnected relationships between energy consumption and economic development in Europe over the last five centuries. It describes how the traditional energy economy of medieval and early modern Europe was marked by stable or falling per capita energy consumption, and how the First Industrial Revolution in the eighteenth century--fueled by coal and steam engines--redrew the economic, social, and geopolitical map of Europe and the world. The Second Industrial Revolution continued this energy expansion and social transformation through the use of oil and electricity, but after 1970 Europe entered a new stage in which energy consumption has stabilized. This book challenges the view that the outsourcing of heavy industry overseas is the cause, arguing that a Third Industrial Revolution driven by new information and communication technologies has played a major stabilizing role. Power to the People offers new perspectives on the challenges posed today by climate change and peak oil, demonstrating that although the path of modern economic development has vastly increased our energy use, it has not been a story of ever-rising and continuous consumption. The book sheds light on the often lengthy and complex changes needed for new energy systems to emerge, the role of energy resources in economic growth, and the importance of energy efficiency in promoting growth and reducing future energy demand.

Japan has enormous economic power and yet is a minor player in international politics. In part this has been due to the partnership with US, but now with the end of cold war there is a fierce debate going on in Japan regarding the international political role for the nation. This book is a response to the issues raised and was originally published in Japanese for a Japanese audience. Ronald Dore provides a full analysis of Japan's post war international position and in particular its role within the UN, the use of armed force and constitution. Japan, Internationalism and the UN provides a unique insight into Japan's foreign policy and its related domestic politics. It is the product of nearly half a century of study and discussion with the Japanese themselves about their place in the world.
