"Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan's books."—The Washington Post Book World (front page review) In *Cosmos*, the late astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. "Takes readers far beyond *Cosmos* . . . Sagan sees humanity's future in the stars."—Chicago Tribune

World Civilizations, AP® Edition encourages students to grasp concepts and patterns across a huge breadth of time and space and helps to facilitate global understandings and connections in the classroom. This text captures a truly global approach by discussing and comparing major societies and focusing on their interactions. *World Civilizations, AP® Edition* presents a clear factual framework while stimulating analysis about global contacts, regional patterns, and the whole process of change and continuity on a world stage. This text identifies six periods in world history. Each period is determined by three basic criteria: a geographical rebalancing among major civilizational areas, an increase in the intensity and extent of contact across civilizations (or, in the case of the earliest period, crossregional contact), and the emergence of new and roughly parallel developments in many major civilizations. Based on "comparative work and focuses on global processes," this text helps students see the history of the world as one based on multiple disciplines. - Publisher.

World Past to World Present: A Sketch of Global History provides an unusually brief and present-focused treatment of human history beginning with the advent of agriculture and ending with considerable attention to world history developments since World War II. This accessible and concise text covers a very real but selected history of the human experience. The book emphasizes the importance of contacts and exchanges among different cultures and economies up to contemporary globalization, and consistent attention is devoted to comparisons among major regional societies. The characteristics of agricultural, and later industrial, societies help establish a larger framework within the text. Peter N. Stearns works to connect past developments to contemporary global patterns and problems, explicitly balancing major changes with significant continuities. Key features include: A "no-frills" approach to an expansive stretch of human history Encourages students to understand the importance of studying history by focusing on aspects of the past that are particularly useful in assessing the current state of the world Invites instructors to combine the advantages of systematic summary coverage with varied supplementary reading Nine maps illustrate important movements and civilizations throughout the world. Truly international in coverage, this book has been specifically designed as a core text for Global History survey courses.

In February 1861 Tsar Alexander II issued the statutes abolishing the institution of serfdom in Russia. The procedures set in motion by Alexander II undid the ties that bound together 22 million serfs and 100,000 noble estate owners, and changed the face of Russia. Rather than presenting abolition as an 'event' that happened in February 1861, The Abolition of Serfdom in Russia presents the reform as a process. It traces the origins of the abolition of serfdom back to reforms in related areas in 1762 and forward to the culmination of the process in 1907. Written in an engaging and accessible manner, the book shows how the reform process linked the old social, economic and political order of eighteenth-century Russia with the radical transformations of the late nineteenth and early twentieth centuries that culminated in revolution in 1917.

Most general histories of technology are Eurocentrist, focusing on a main line of Western technology that stretches from the Greeks is through the computer. In this very different book, Arnold Pacey takes a global view, placing the development of technology squarely in a "world civilization." He portrays the process as a complex dialectic by which inventions borrowed from one culture are adopted to suit another.

Western civilization and world history are often seen as different, or even mutually exclusive, routes into historical studies. This volume shows that they can be successfully linked, providing a tool to see each subject in the context of the other, identifying influences and connections. Western Civilization in World History takes up the recent debates about the merits of the well-established 'Western civ' approach versus the newer field of world history. Peter N. Stearns outlines key aspects of Western civilization - often assumed rather than analyzed - and reviews them in a global context.
