*Cracking the AP Human Geography Exam, 2020 Edition* Galore Park

"Dee Fink challenges our conventional assumptions and practices and offers an insightful approach to expanding our learning goals, making higher education more meaningful. This is a gem of a book that every college teacher should read." —Ken Bain, author, *What the Best College Students Do Since the original publication of L. Dee Fink's Creating Significant*

*Learning Experiences*, higher education has continued to move in two opposite directions: more institutions encourage faculty to focus on research, obtaining grants, and publishing, while accreditation agencies, policy-makers, and students themselves emphasize the need for greater attention to the quality of teaching and learning. Now the author has updated his bestselling classic, providing busy faculty with invaluable conceptual and procedural tools for instructional design. Step by step, Fink shows how to use a taxonomy of significant learning and systematically combine the best research-based practices for learning-centered teaching with a teaching strategy in a way that results in powerful learning experiences. This edition addresses new

---

research on how people learn, active learning, and student engagement; includes illustrative examples from online teaching; and reports on the effectiveness of Fink's time-tested model. Fink also explores recent changes in higher education nationally and internationally and offers more proven strategies for dealing with student resistance to innovative teaching. Tapping into the knowledge, tools, and strategies in *Creating Significant Learning Experiences* empowers educators to creatively design courses that will result in significant learning for their students. "As thought-provoking and inspiring today as it was when it was first published, it is a 'must' for anyone serious about creating courses that challenge students to learn deeply."—Elizabeth F. Barkley, author, *Student Engagement Techniques*

**Princeton Review AP Human Geography Premium Prep 2021**

Princeton Review

There are many books about teaching in Geography, but this is the first dealing specifically with Pedagogic Research, its methods and practices. Pedagogy research concerns the processes of learning and the development of learners. It is a learner-centred activity that aims to evaluate and improve the ways that students learn and learn to manage, control and comprehend their own learning processes, first as Geographers in Higher Education but equally as future educated citizens.

---

This book collects together some key research papers from the Journal of Geography in Higher Education. They concern original research and critical perspectives on how Geographers learn, critical evaluations of both new and traditional frameworks and methods used for Pedagogic research in Geography, and some case studies on the promotion of self-authorship, learner autonomy, in key Geography Higher Education contexts such as fieldwork and undergraduate project work. This book is a compilation of articles from various issues of the Journal of Geography in Higher Education.
