2014) White Rose University Press From the award-winning and bestselling author of Cod comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured – all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a large

part of the Earth ' s rock fairly close to the surface. From pre-history until just a century ago – when the mysteries of salt were revealed by modern chemistry and geology – no one knew that salt was virtually everywhere.

Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry. Canada, Kurlansky tells us, is the world ' s sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans ' insatiable demand. As he did in his highly acclaimed Cod, Mark Kurlansky once again illuminates

---

the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before.

What happened to the Roman Empire? Why was the Magna Carta so important? What led to the First World War? Why did the USSR collapse? World History in Minutes provides succinct answers to these questions - and many more - in 200 simple and accessible essays. From the 100 Years War to the Gulf Wars, and from the wisdom of Aristotle to the Civil Rights movement, this book distils the major events in human history into easily digestible chunks. Each essay is accompanied by an image -

or a clear diagram to illustrate complex ideas - and will plug the gaps in your knowledge of the most important eras, movements and events in the history of humankind. World History in Minutes is the perfect introduction to this expansive subject. Contents include: Neanderthals, Babylonians, Attila the Hun, Abyssinian Empire, Magna Carta, Black Death, Inca, Henry VIII Reformation, Ulster Plantations, Rousseau and the Enlightenment, Declaration of Independence, French Revolution, Tonga Civil War, Universal Suffrage, Spanish Influenza, Great Depression, Pearl Harbour, The Space Age, Civil Rights, Environmentalism, Oligarchs and Tiger Economies.

Author and Title Index

University of Toronto Press  
History is . . . (a) more or less bunk. (b) a nightmare from which I am trying to awaken. (c) as thoroughly infected with lies as a street whore with syphilis. Match your answers: (1) Stephen Daedalus of James Joyce's Ulysses (2) Henry Ford (3) Arthur Schopenhauer It turns out that answer need not be bunk, nightmarish, or diseased. In the hands of mental\_floss, history's most interesting bits have been handpicked and roasted to perfection. Packed with little-known stories and outrageous—but accurate—facts, you'll laugh yourself smarter on this joyride through 60,000 years of human civilization. Remember: just because it's true, doesn't mean it's boring!

Hunter Publishing, Inc

• These great-value guides cover destinations far and wide around the globe. Established in 1990, Nelles Guides sought to provide travelers with comprehensive destination coverage in a handy, take-along format. Today, the tradition continues. Nelles Guides are researched and written by local correspondents and are updated regularly. Each book has a well-rounded introduction that delves into the country's history and culture, tempting the reader to explore. The "What to See & Do" section for each area can cover anything from sightseeing and driving tours to jungle treks and visits to the local museums. You'll find detailed entries for restaurants, shopping,

---

entertainment, festivals and more. All accommodations are categorized by price level, making it easy for the reader to select a place to suit his/her budget. Practical travel issues -- health concerns, climate & clothing, visa requirements, currency, transportation, etc. -- are also addressed. The United States Catalog; Books in Print January 1, 1912 Harper Collins This first volume of Star Carr provides an interpretation of the Star Carr site, one of the most important Mesolithic sites in Europe. Discovered in the late 1940s

by John Moore and then excavated by Grahame Clark from 1949-1951, the site is famous in the archaeological world for its wealth of rare organic remains, including significant wooden artefacts. However, since the original excavations there has been much debate about how the site was used: was it a residential base camp, a hunting camp or even a ritual site? The 2003-2015 excavations directed by Conneller, Milner and Taylor aimed to answer these

---

questions. In use for around 800 years, the Star Carr site is much larger and more complex than ever imagined. The excavations show that Mesolithic groups were highly invested in this place and continued to occupy the site despite changes in climate. The findings include the oldest evidence for 'houses' in Britain, large wooden platforms along the edge of the lake, antler headdresses and a unique, engraved shale pendant which represents the earliest form of Mesolithic art in

Britain. There is evidence for activity areas, such as crafts and tool repair associated with structures, an axe factory, as well as a number of caches. New finds of antler frontlets have increased our understanding of the diversity of human interactions with animals. "If these do not get a gong, something will have to be done about archaeology book awards." Mike Pitts, British Archaeology Despite the degradation, these excavations have provided a new understanding of

---

life in the Early Mesolithic, particularly enhancing our understanding of how important wood (a material rarely recovered) was for Mesolithic people. The findings challenge many of the preconceived views of this period in terms of the character and scale of activity and the degree of investment in a particular place in the landscape.

A fully illustrated social history profiling forty historic hotels spread over five regions of the southern interior of British Columbia, covering the time period of the 1890s to 1950s. Room at the Inn reveals the long-forgotten histories of

British Columbia's early hospitality industry, through the riveting stories of the men and women who built, ran, and frequented hotels, hostelries, resorts, and roadhouses in the southern Interior. From the Similkameen town of Keremeos to Spences Bridge at the confluence of the Thompson and Nicola Rivers, east to the Alberta border along the Trans-Canada Highway, and south to the Canada-US border, the history of these hotels mirrors the history of BC's mining towns and boom-bust economy of the late nineteenth and early twentieth centuries, as waves of prospectors, settlers, and eventually tourists shaped the culture of the province that we know

---

today. Of the forty historic hotels profiled in this book, all contributed to their communities in various ways. They provided more than just a roof over the heads of weary travellers; they were often the sites of live entertainment, places where community members could meet and socialize. Some even doubled as makeshift hospitals during wildfires and floods. Through colourful anecdotes, meticulous research, and fascinating archival photography, *Room at the Inn* transports readers to a bygone era and pays tribute to the pioneers, entrepreneurs, and hard-work men and women who built and operated these historic accommodations.

*The Mental Floss History of the World* Bloomsbury Publishing USA  
How empires have used diversity to shape the world order for more than two millennia  
Empires—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. *Empires in World History* departs from conventional European and nation-

---

centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Jane Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an emphasis on how empires accommodated, created, and manipulated differences among populations. Burbank and Cooper

examine Rome and China from the third century BCE, empires that sustained state power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty, the

---

limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the "empire of liberty"—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, *Empires in World History* offers a fresh approach to understanding the impact of empires on the past and present.

This *Festschrift* celebrates the great Mendelssohn scholar R. Larry Todd, Arts & Sciences Professor at Duke University, whose dedication to, study of, and mentorship in 19th-century music has shaped two generations of musicological study. Encompassing former/current students and colleagues, the contributing authors to this book investigate the life and work of the Mendelssohns, their circle, and issues of reception history; Beethoven

---

and piano-related studies; and special musical relationships. The book's title references a famous quote by Felix Mendelssohn: "The essence of the beautiful is unity in variety." It also acknowledges the thematic diversity of this volume and the unifying effect that Todd's outstanding monographs on Felix and Fanny have had on a variety of musicians and scholars.

After more than 55 years of transmedia storytelling, 'Star Trek' is a global phenomenon that has never been more successful than it is today. 'Star Trek' fandom is worldwide, time tested, and growing, and academic interest in the franchise, both inside and outside of the classroom, is high; at the moment, more 'Star Trek' works are underway or in development simultaneously than at any other moment in history. Unlike works that focus on a limited number of stories/media in this franchise or

---

only offer one expert's or discipline's insights, this accessible and multidisciplinary anthology includes analyses from a wide range of scholars and explores 'Star Trek' from its debut in 1966 to its current incarnations, considers its implications for and collaborations with fandom, and trace its ideas and meanings across series, media, and time. 'Star Trek: Essays Exploring the Final Frontier' will undoubtedly speak to academics in the field,

students in the classroom, and informed lay readers and fans. A Commentary on the Holy Scriptures: Critical, Doctrinal, and Homiletical: The Gospel according to Matthew CRC Press New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. Discovering Our World's History

This textbook gives a lively introduction to the search for extraterrestrial life. It is a guidebook to understanding the possibility of life elsewhere, pointing out landmarks and providing background information to facilitate further exploration of those areas of most interest to the reader. We are a planet of winners - winners of a cosmic lottery that has been in play since the universe began approximately 13.7 billion years ago. Our winnings include

sentience and an underlying unease that has driven us to contemplate our place in the universe and the possibility of finding kindred spirits in the cosmos spreading out before us. To understand our origins and the possibility of life beyond Earth, we must look back and retrace the steps that have brought us to this point in space and time. In doing so, we will find the investigation of life to be a unifying theme in nature, requiring us to touch on all branches of the tree of knowledge. Using the Drake Equation as a theme, we begin with an overview of the topic and then go

---

into the story of how instructors, and we have acquired, or undergraduate plan to acquire, the students, as well as knowledge to solve anyone with an it. As we make our interest in journey, we will astrophysics or encounter some very astrobology. interesting people - Investigating Life in some you will likely the Universe know, while others Unity in Variety may be new to you. Keep an open mind and allow this text to be **Star Trek: Essays** your guide. Written **Exploring the Final** in an engaging style, **Frontier** this textbook provides a foundational understanding of the rapidly advancing fields associated with the search for life in the universe. Each chapter includes illustrative figures and review questions for self-study. It will appeal to professionals, researchers,
