**Nationalism from the Left** APH Publishing  
The book explores the intellectual history of Bulgaria between the 1960s and the 1980s at the intersections of the country's social and political history. Based on case studies, the research delves into three areas: the control and pressure mechanisms used on science and the university; the clash of ideas while performing the formal and hidden functions of academia in a communist regime setting; the processes whereby research and academia acquire a relative autonomy and alternative academic communities are being formed amidst the eroding ideological legitimacy of the regime. Centred on the concept of the "incident", this setup allowed us to eschew the narratives around the role of the dissidents or "freedom as a gift" and interpret society's transformation as the outcome of intersecting and overlaying sectoral events, which gathered strength down the years and lay the ground for the eruption labelled here as the "Big Event of 1989".

This title was first published in 2002: Examining the recent phenomenon in conflicts in Africa, this text addresses situations where African states and African military intervene in conflicts either in neighbouring states or beyond. While this trend has been widely observed, this is the first in-depth research that deals with such issues. It breaks new ground in identifying the key issues, actors and actions, and includes analysis of military capacities of African states and the way in which armies are used, including the increasing role of private security companies and mercenaries. The changing attitudes among members of the OAU are examined, in particular the increasing acceptance of interventionism and the blurring of boundaries. The most significant cases of intervention are examined together with less well-documented examples such as Lesotho and Guinea Bissau. This engaging account makes for a compelling resource for academics and practitioners alike.

This work uncovers the global history of the Black

Panther Party, a key post-civil-rights organization, and shows how an international approach broadens and changes our understanding of African American history. Given the increasing public interest in the Black Panthers, this study seeks to go beyond the myths and public persona of the organization. It examines the party's connections and activities in a variety of places, including Cuba, Algeria, and Europe, and demands that we look beyond national boundaries when discussing African American protest movements of the 1960s and 1970s. In addition, it provides an in-depth look at Panther activities in a seemingly unlikely place, Halifax, Nova Scotia, where the Panthers served as the catalyst for significant changes in race relations. This study also provides extensive background on the post-civil-rights era, including the effects of a shift to a post-industrial economy, the disillusionment of many African Americans with the traditional civil rights organizations, and the effects of large-scale national demographic changes.

**Confirmation Workbook Based on the 1979 Book of Common Prayer** Yale University Press

This book examines how intangible aspects of international relations – including identity, memory, representation, and symbolic perception – have helped to shape the development and contribute to the endurance of the Anglo-American special relationship. Challenging traditional interpretations of US-UK relations and breaking new ground with fresh analyses of cultural symbols, discourses, and ideologies, this volume fills important gaps in our collective understanding of the special relationship's operation and exposes new analytical spaces in which we can re-evaluate its strengths and weaknesses. Designed to breathe new life into old debates about the relationship's purported specialness, this book offers a multidisciplinary exploration of literary representations, screen representations, political representations, representations in memory, and the influence of cultural connections and constructs which have historically animated Anglo-American interaction.

Our current world is characterized by life in cities, the existence of social inequalities, and increasing individualization. When and how did these phenomena arise? What was the social and economic background for the development of hierarchies and the first cities? The authors of this volume analyze the processes of centralization, cultural interaction, and social differentiation that led to the development of the first urban centres and early state formations of ancient Eurasia, from the Atlantic coasts to China. The chronological framework spans a period from the Neolithic to the Late Iron Age, with a special focus on the early first millennium BC. By adopting an interdisciplinary approach structured around the concepts of identity and materiality, this book addresses the appearance of a range of key phenomena that continue to shape our world.
