World History McDougal Littell/Houghton Mifflin

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical "episodes" that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students. Everything You Should Know about Chicago and Washington DC Cengage Learning

In a period characterized by expanding markets, national consolidation, and social upheaval, print culture picked up momentum as the nineteenth century turned into the twentieth. Books, magazines, and newspapers were produced more quickly and more cheaply, reaching ever-increasing numbers of readers. Volume 4 of A History of the Book in America traces the complex, even contradictory consequences of these changes in the production, circulation, and use of print. Contributors to this volume explain that although mass production encouraged consolidation and standardization, readers increasingly adapted print to serve their own purposes, allowing for increased diversity in the midst of concentration and integration. Considering the book in larger social and cultural networks, essays address the rise of consumer culture, the extension of literacy and reading through schooling, the expansion of secondary and postsecondary education and the growth of the textbook industry, the growing influence of the professions and their dependence on print culture, and the history of relevant technology. As the essays here attest, the expansion of print culture between 1880 and 1940 enabled it to become part of Americans' everyday business, social, political, and religious lives. Two major dividing lines have formed the megastructure of Eurasia, determining the historical epochs of the continent's peoples. The first, vertical (longitudinal) line has separated East and West since the Paleolithic Age. The East was dominated by Mongol peoples speaking Sino-Tibetan, Manchu-Tungus, and Altaic languages. The Caucasoid peoples of the West spoke mostly Indo-

European, Semite, and Finno-Ugric languages. The second line divided the continent horizontally (by latitude) into North and South. This division was closely connected with the Eurasian Steppe Belt. To the north of it lay the world of hunter-gatherers and fishermen. To the south, settled agriculture was dominant. The Steppe Belt itself was the domain of pastoralists, the nomadic and semi-nomadic herders. These lines converged at the entrance to the Great Silk Road. With the swift development of horse domestication and horseback riding, the nomads moved--from the Early Metal Age (500-400 BCE) to Genghis Khan's and the Genghisid's Great Empire (1200-1400 CE)--to the forefront of Eurasian history as their world became increasingly involved in dramatic and sometimes tragic relationships with their southern neighbors. This book focuses on the tangle of problems in these nomadic peoples' history.
