Philosophy, Science, and History: A Guide and Reader is a compact overview of the history and philosophy of science that aims to introduce students to the groundwork of the field, and to stimulate innovative research. The general introduction focuses on scientific theory change, assessment, discovery, and pursuit. Part I of the Reader begins with classic texts in the history of logical empiricism, including Reichenbach's discovery-justification distinction. With careful reference to Kuhn's analysis of scientific revolutions, the section provides key texts analyzing the relationship of HOPOS to the history of science, including texts by Santayana, Rudwick, and Shapin and Schaffer. Part II provides texts illuminating central debates in the history of science and its philosophy. These include the history of natural philosophy (Descartes, Newton, Leibniz, Kant, Hume, and du Châtelet in a new translation); induction and the logic of discovery (including the Mill-Whewell debate, Duhem, and Hanson); and catastrophism versus uniformitarianism in natural history (Playfair on Hutton and Lyell; de Buffon, Cuvier, and Darwin). The editor's introductions to each

section provide a broader perspective informed by contemporary research in each area, including related topics. Each introduction furnishes proposals, including thematic bibliographies, for innovative research questions and projects in the classroom and in the field.

Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues. "Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century." —Bill Gates, *The New York Times* Book Review NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, *KQED* How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari's *21 Lessons for the 21st Century* is a probing and visionary investigation into today's most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than

In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari's unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, *21 Lessons for the 21st Century* is essential reading. "If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari's *21 Lessons for the 21st Century* would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: 'What is happening in the world today, and what is the deep meaning of these events?'" —BookPage (top pick)

The primary goal of the book is to provide undergraduate and graduate students in the field of education, professors of education, and teachers with a valuable resource as they engage in research and practice in relation to

teaching about social issues. In the introductory essays, authors present an overview of their respective topics (e.g., The Hunt/Metcalf Model, Science/Technology/Society, Genocide Education). Teaching World History Thematically McGraw Hill Professional

Effective and impartial public administration is the foundation of state legitimacy. This was understood 4,500 years ago when Urukagina, the ruler of a small country in Mesopotamia, proclaimed the first known reform of public service. The quality of public administration will be even more important in the 21st century. Successful states will be those that recognise public service as a key determinant of national competitive advantage. That realisation will generate a radical change in the image of the civil servant — from dull, uninspired public official to passionate advocate of the common good. This transformation will be the product of the complex challenges arising from the interweaving of globalisation with the '4th Industrial Revolution.' These and related developments are forcing governments around the world to search for public service that can respond to the unprecedented range of opportunities and threats emerging from a rapidly evolving international context. In an increasingly frenetic world ruled by 'Wicked Ostriches' and 'Black Elephants', governments require a civil service capable of achieving five outcomes: i) unlocking the creativity and collaborative spirit needed to solve complex problems; ii) overcoming the fallacy that the private sector is inherently more innovative and efficient than the public service; iii) developing societies that are perceived by their citizens as fair; iv) fostering the trust of citizens in their governments; and v) bolstering the legitimacy of the state. The author, who is Director of the United Nations Development Programme's Global Centre for Public Service Excellence in Singapore, suggests that these interconnected aims will result in a new phenomenon: the public recognition by political leaders and citizens that future prosperity, political stability, environmental sustainability and social cohesion are dependent on committed and creative civil servants passionate about promoting the long-term national interest. 'I shall pass through this world but once. Any good therefore that I can do or any kindness that I can show to any human being, let me do it now. Let me not defer or neglect it, for I shall not pass this way again.' Mahatma Gandhi
