The Urantia Book University provides a bold new of Chicago Press  
A masterful, thought-provoking, and wide-ranging study of how the vestiges of the imperial era shape society today. In this groundbreaking narrative, *The Shadows of Empire* explains (in the vein of *The Silk Roads* and *Prisoners of Geography*) how the world's imperial legacies still shape our lives—as well as the thorniest issues we face today. For the first time in millennia we live without formal empires. But that doesn't mean we don't feel their presence rumbling through history. From Russia's incursions in the Ukraine to Brexit; from Trump's America-First policy to China's forays into Africa; from Modi's India to the hotbed of the Middle East, Samir Puri

Organized by region, and covering vital topics such as security, foreign policy, national politics and commerce, *The Shadows of Empire* combines gripping history and astute analysis to explain why the history of empire affects us all in profound ways; it is also a plea for greater awareness, both as individuals and as nations, of how our varied imperial pasts have contributed to why we see the world in such different ways.

phenomena and that the way the past is actively historicized can be highly problematic and contested.

The Literary Digest CRC Press Search and Clear demonstrates that the seeds of war were implicit in American culture, distinguishes between literature spawned by Vietnam and that of other conflicts, reviews the literary merits of works both well and little known, and explores the assumptions behind and the persistence of stereotypes associated with the consequences of the Vietnam War. It examines the role of women in fiction, the importance of gender in Vietnam representation, and the mythic patterns in Oliver Stone ' s Platoon. Essayists sharply scrutinize American values, conduct, and conscience as they are

revealed in the craft of Tim O ' Brien, Philip Caputo, Michael Herr, Stephen Wright, David Rabe, Bruce Weigl, and others.

This assessment of the statesmanship, principles, and policies of Robert F. Kennedy places him "in the stream of history," to assess what came before his time in political life, what happened during that time, and what happened to his legacy after his assassination. Terrence Edward Paupp evaluates the themes and issues RFK confronted, responded to, and for which he provided visionary solutions. Paupp first chronicles the influence of Franklin D. Roosevelt's legacy as a prologue to the New Frontier and Great Society. During Robert F. Kennedy's time in power—both in his brother's administration and on his own

---

in the US Senate—he struggled with striking a balance between power and purpose. In the years after John F. Kennedy’s assassination, RFK emphasized the need to unite power and purpose, national and international concerns, ideals and practice. Much of this has been ignored, Paupp argues, by what C. Wright Mills called "the power elite." In assessing RFK’s statesmanship, Paupp examines his commitments to human and civil rights, which linked themes and ideals within the US to those struggles taking place outside the country. Robert F. Kennedy brought zeal and passion to these problems by discussing the moral necessity of honoring human dignity while articulating practical solutions, policies, and programs to structural injustice. His legacy remains a beacon of light, intelligence, and hope in today’s world.

How has the Ontario Agricultural College contributed to Canadian education?  
What role has the college played in the development of agriculture since it was founded in 1874?  
This history of Canada’s oldest agricultural college revolves around these two questions. It shows that the college’s mandate has changed in its attempt to serve both education and agriculture. The Ontario Agricultural College was established to enshrine science in farming, but it also

---

became the testing and extension arm of the provincial ministry of agriculture. Direct government control for ninety years provided financial resources not enjoyed by other post-secondary schools, but the results sometimes proved of greater benefit to agriculture than to education or science. Swept into the University of Guelph when it was created in 1964, the college rethought its role. It emerged as a centre for advanced scientific inquiry, for global agricultural programs, and for understanding rural societies. The controversies

surrounding these changes and the evolving nature of agriculture and science are brought out fully in this account of the past century and a quarter.

This collection of  
essays explores the  
legacy of the  
Reformation with  
regard to the person

As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks

Hans-Georg Gadamer on  
Education, Poetry, and  
History Crown

In these essays,  
appearing for the  
first time in English,  
Gadamer addresses  
practical questions  
about recent politics  
in Europe, about  
education and  
university reform, and  
about the role of  
poetry in the modern  
world. This book also

includes a series of  
interviews that the  
editors conducted in  
1986. Gadamer  
elaborates on his  
experiences in  
education and  
politics, touching on  
the collapse of the  
Weimar Republic, the  
early Frankfurt  
School, Heidegger and  
the Nazis, university  
life in East Germany,  
and the prospects for  
Europe in the coming  
years. Hans-Georg  
Gadamer was probably  
Heidegger's leading  
interpreter in  
Germany, and in the  
1950s and 1960s he  
became the world's  
leading exponent of  
hermeneutics. His  
hermeneutical theory  
explains how it is  
that ancient art and  
philosophy still speak  
to us today. His  
influential idea of  
the "fusion of

antiquity to the Zohar, written in thirteenth-century Spain. In the course of this investigation Arthur Green draws a wide arc including Talmudic, Midrashic, liturgical, Merkavah, German Hasidic, and Kabbalistic works, showing through this single theme the spectrum of devotional, mystical, and magical views held by various circles of Jews over the course of a millennium or more. The first portion of the work deals with late antiquity,

emphasizing the close relationship between texts of what is often depicted as "normative" Judaism and their mystical/magical analogues. The mythic imagination of ancient Judaism, he suggests, is shared across this spectrum. The latter portion of the work turns to the medieval Jews who inherited this ancient tradition and its evolution into Kabbalah, where keter plays a key role as the first of the ten divine emanations or sefirot. The nature of these sefirot as symbols

---

and the emergence of a structured and hierarchical symbolism out of the mythic imagery of the past are key themes in these later chapters. As a whole, Keter takes the reader on an exciting tour of the interior landscapes of the Jewish imagination, offering some remarkable insights into the nature of mystical and symbolic thinking in the Jewish tradition. Bringing together  
heritage studies and  
literary studies,  
this book examines  
heritage as a  
ubiquitous trope in  
contemporary  
Britain, a seemingly  
inescapable figure  
for relations to the  
past. Inheritance  
has been an  
important metaphor  
for characterizing  
cultural and  
political traditions  
since the 1970s, but  
one criticized for  
its conservatism and  
apparent  
disinheritance of  
"new" Britons.  
Engaging with  
contemporary  
literary and  
cinematic texts, the

book interrogates  
metaphoric  
resonances: that  
bestowing past,  
receiving present,  
and transmitted  
bounty are all  
singular and unified;  
that transmission  
between past and  
present is smooth,  
despite heritage  
depending on death;  
that the past enjoins  
the present to  
conserve its legacy  
into the future.  
However, heritage  
offers an alternative  
to modern market-  
driven relations,  
transactions  
stressing connection  
only through a  
momentary exchange,  
for bequest resembles  
gift-giving and  
connects past to  
present.  
Consequently,

---

heritage contains competing impulses, subtexts largely unexplored given the trope's lapse into cliché. The volume charts how these resonances developed, as well as charting more contemporary aspects of heritage: as postmodern image, tourist industry, historic environment, and metaculture. These dimensions develop the trope, moving it from singular focus on continuity with the past to one more oriented around different lines of relation between past, present, and future. Heritage as a trope is explored through a wide range of texts: core accounts of political theory (Locke and Burke); seminal documents within historic conservation; phenomenology and poststructuralism; film and television (Merchant-Ivory, Downton Abbey); and a broad range of contemporary fiction from novelists including Zadie Smith, Julian Barnes, Hilary Mantel, Sarah Waters, Alan Hollinghurst, Peter Ackroyd, and Helen Oyeyemi.
