Holt World History Outline Maps: Human Legacy Oxford University Press

From Jim Holt, the New York Times bestselling author of *Why Does the World Exist?*, comes an entertaining and accessible guide to the most profound scientific and mathematical ideas of recent centuries in *When Einstein Walked with Gödel: Excursions to the Edge of Thought*. Does time exist? What is infinity? Why do mirrors reverse left and right but not up and down? In this scintillating collection, Holt explores the human mind, the cosmos, and the thinkers who've tried to encompass the latter with the former. With his trademark clarity and humor, Holt probes the mysteries of quantum mechanics, the quest for the foundations of mathematics, and the nature of logic and truth. Along the way, he offers intimate biographical sketches of celebrated and neglected thinkers, from the physicist Emmy Noether to the computing pioneer Alan Turing and the discoverer of fractals, Benoit Mandelbrot. Holt offers a painless and playful introduction to many of our most beautiful but least understood ideas, from Einsteinian relativity to string theory, and also invites us to consider why the greatest logician of the twentieth century believed the U.S. Constitution contained a terrible contradiction—and whether the universe truly has a future.

Women in World History brings together the most recent scholarship in women's and world history in a single volume covering the period from 1450 to the present, enabling readers to understand women's relationship to world developments over the past five hundred years. Women have served the world as unfree people, often forced to migrate as slaves, trafficked sex workers, and indentured laborers working off debts. Diseases have migrated through women's bodies and women themselves have deliberately spread religious belief and fervor as well as ideas. They have been global authors, soldiers, and astronauts encircling the globe and moving far beyond it. They have written classics in political and social thought and crafted literary and artistic works alongside others who were revolutionaries and reform-minded activists. Historical scholarship has shown that there is virtually no part of the world where women's presence is not manifest, whether in archives, oral testimonials, personal papers, the material record, evidence of disease and famine, myth and religious teachings, and myriad other forms of documentation. As these studies mount, the idea of surveying women's past on a global basis becomes daunting. This book aims to redress this situation and offer a synthetic world history of women in modern times.

account of the first coinages and their living descendants in our pockets and purses. It explains how people from Jesus to The Beatles have used numismatics to explore the social, political, economic, and religious history of the world"--

What is the purpose of studying history? How do we reflect on contemporary life from a historical perspective, and can such reflection help us better understand ourselves, the world around us, and the God we worship and serve? Written by an accomplished historian, award-winning author, public evangelical spokesman, and respected teacher, this introductory textbook shows why Christians should study history, how faith is brought to bear on our understanding of the past, and how studying the past can help us more effectively love

God and others. John Fea shows that deep historical thinking can relieve us of our narcissism; cultivate humility, hospitality, and love; and transform our lives more fully into the image of Jesus Christ. The first edition of this book has been used widely in Christian colleges across the country. The second edition provides an updated introduction to the study of history and the historian's vocation. The book has also been revised throughout and incorporates Fea's reflections on this topic from throughout the past 10 years.
