Literature from Around the World McGraw-Hill Education

In *Science in World History*, James Trefil presents a comprehensive, thematic survey of the history of science from its roots in different cultures around the world through to the present day. He explores crucial milestones in scientific development and at the same time examines the enormous social and intellectual changes they initiated. Opening with a discussion of the key elements of modern scientific enterprise, the book goes on to

explore the earliest scientific activities, moving through Greece and Alexandria, science in the Muslim world, and then on to Isaac Newton, atomic theory and the major developments of the nineteenth century. After examining the most recent scientific activities across the world, the book concludes by identifying future directions for the field. Suitable for introductory courses and ideal for students new to the subject, this concise and lively study reconsiders the history of science from the perspective of world and comparative history.

Neutrality in World History provides a cogent synthesis of five hundred years of neutrality in global history. Author Leos Müller argues that neutrality and neutral states, such as Switzerland, Sweden, Belgium have played an important historical role in implementing the free trade paradigm, shaping the laws of nations and humanitarianism, and serving as key global centers

of trade and finance. Offering an intriguing alternative to dominant world history narratives, which hinge primarily on the international relations and policies of empires and global powers, *Neutrality in World History* provides students with a distinctive introduction to neutrality's place in world history.

This volume considers the confluence of World History and historical materialism, with the following guiding question in mind: given developments in the field of historical materialism concerned with the

intersection of race, gender, labour, and class, why is it that within the field of World History, historical materialism has been marginalized, precisely as World History orients toward transnational socio-cultural phenomenon, micro-studies, or global histories of networks? Answering this question requires thinking, in an inter-related manner, about both the development of World History as a discipline, and the place of economic determinism in historical materialism. This book takes the position that historical materialism (as applied to the field of World History) needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism. At the same time, World History needs to be more self-critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural, social, and intellectual dimensions of global processes.

Frameworks of World History is a groundbreaking text that uses a clear and consistent analytical approach to studying world history. Author Stephen Morillo--an award-winning teacher with more than twenty-five years of experience teaching World History--frames the study of this vast subject around a model that shows students how to do world history and not just learn about it. While this globally organized text contains all of the essential information, it is the only book

that does not just tell what happened, but also shows how and why it happened. Using a framework that examines networks, hierarchies, and culture in world history, Morillo presents a thesis and an argument that students--and instructors--can respond to.

Glencoe World History, Student

Edition John Wiley & Sons

World History: An Introduction

provides readers with the knowledge and tools necessary to understand the global historical perspective and how it can be used to shed light on both our past and our present.

A concise and original guide to the concepts, methods, debates and contents of world history,

it combines a thematic approach with a clear and ambitious focus. Each chapter traces connections with the past and the present to explore major questions in world history: How did humans evolve from an endangered species to the most successful of them all? How has nature shaped human history? How did agricultural societies push human history in a new direction? How has humankind organized itself in ever more complex administrative systems? How have we developed new religious and cultural patterns? How have the paths of 'The West' and 'The Rest' diverged over the

last five centuries? How, at the same time, has the world become more interconnected and "globalized"? How is this world characterized by growing gaps in wealth, poverty and inequality? Sharp and accessible, Eric Vanhaute's introduction to this exciting field demonstrates that world history is more of a perspective than a single all-encompassing narrative: an instructive new way of seeing, thinking and doing. It is an essential resource for students of history in a global context.

Drama-Free Relationships. Do they even exist? Today's dating scene is more complicated than ever, especially with social media, texting, and the endless pressure of the world's expectations. How can men and women overcome the interior and exterior battles and discover the love they desire? From "Hey" to "I do"—as well as the inevitable "gray areas" along the way—*Emotional Virtue* offers a compelling blueprint for how to thrive in every stage of a relationship—not just survive. *National Geographic World Cultures and Geography* Prentice Hall World History Teaching in Asia is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II, with many interesting parallels, including the issue of Eurocentrism, but also distinctive national trends, and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy-makers worldwide.
