Indispensable for the student or researcher studying women's history, this book draws upon a wide array of cultural settings and time periods in which women displayed agency by carrying out their daily economic, familial, artistic, and religious obligations. Since record keeping began, history has been written by a relatively few elite men. Insights into women's history are left to be gleaned by scholars who undertake careful readings of ancient literature, examine archaeological artifacts, and study popular culture, such as folktales, musical traditions, and art. For some historical periods and geographic regions, this is

the only way to develop some sense of what daily life might have been like for women in a particular time and place. This reference explores the daily life of women across civilizations. The work is organized in sections on different civilizations from around the world, arranged chronologically. Within each society, the encyclopedia highlights the roles of women within five broad thematic categories: the arts, economics and work, family and community life, recreation and social customs, and religious life. Included are numerous sidebars containing additional information, document excerpts, images, and suggestions for further reading. An introduction provides an overview the daily life of women through history, and a timeline highlights key events in women's history. Chronologically arranged sections on civilizations from across world history provide information on the daily life of women living in those societies. For each civilization, broad categories of daily life are broken into subsections, with each offering reference entries on specific topics. Photos help users visualize important topics, and sidebars provide interesting tangential information.

The Story of Civilization Oxford University Press

The ancient Greeks and Romans lived in a world teeming with animals. Animals were integral to ancient commerce, war, love, literature and art. Inside the city they were found as pets, pests, and parasites. They could be sacred, sacrificed, liminal, workers, or intruders from the wild. Beyond the city domesticated animals were herded and bred for profit and wild animals were hunted for pleasure and gain alike. Specialists like Aristotle, Aelian, Pliny and Seneca studied their anatomy and behavior. Geographers and travelers described new lands in terms of their animals. Animals are to be seen on every possible artistic medium, woven into cloth and inlaid into furniture. They are the subject of proverbs, oaths and dreams. Magicians, physicians and lovers turned to animals and their parts for their crafts. They paraded before kings, inhabited palaces, and entertained the poor in the arena. Quite literally, animals pervaded the ancient world from A-Z. In entries ranging from short to long, Kenneth Kitchell offers insight into this commonly overlooked world, covering representative and intriguing examples of mammals, reptiles, amphibians and invertebrates. Familiar animals such as the cow, dog, fox and donkey are treated along with more exotic animals such as the babirusa, pangolin, and dugong. The evidence adduced ranges from Minoan times to the Late Roman Empire and is taken from archaeology, ancient authors, inscriptions, papyri, coins, mosaics and all other artistic media. Whenever possible reasoned identifications are given for ancient animal names and the realities

behind animal lore are brought forth. Why did the ancients think hippopotamuses practiced blood letting on themselves? How do you catch a monkey? Why were hyenas thought to be hermaphroditic? Was there really a vampire moth? Entries are accompanied by full citations to ancient authors and an extensive bibliography. Of use to Classics students and scholars, but written in a style designed to engage anyone interested in Greco-Roman antiquity, *Animals in the Ancient World from A to Z* reveals the extent and importance of the animal world to the ancient Greeks and Romans. It answers many questions, asks several more, and seeks to stimulate further research in this important field.

Studies in World History Volume 1 (Teacher Guide)
Temple University Press

This innovative textbook demystifies the subject of world history through a diverse range of case studies. Each chapter looks at an event, person, or place commonly included in comprehensive textbooks, from prehistory to the present and from across the globe – from the Kennewick Man to gladiators and modern-day soccer and globalization – and digs deeper, examining why historians disagree on the subject and why their debates remain relevant today. By taking the approach of 'unwrapping the textbook,' David Eaton reveals how historians think, making it clear that the past is not nearly as tidy as most textbooks suggest. Provocative questions like whether ancient Greece was shaped by contact with Egypt provide an entry point into how history professors may sharply disagree on even basic narratives, and how historical interpretations can be influenced by contemporary concerns. By illuminating these historiographical debates, and linking them to key skills required by historians, *World History through Case Studies* shows how the study of history is relevant to a new generation of students and teachers.

World History through Case Studies A&C Black
The Book of the Ancient World is an account of our common heritage from the dawn of civilization to the coming of the Greeks. It is the story of how human beings began their great adventure of learning how to live; of how they have sought to satisfy the practical needs of their bodies, the questioning of their minds, and the searching of their spirits. To this end it subordinates details of political events to the record of things that lie at the foundation of our modern civilization. Dorothy Mills had an uncanny and unique ability to write history that is interesting and at the same time based on sound scholarship. Her direct, engaging approach is valued increasingly by the many parents in our day who are looking for reliable materials for home study, as well as by many private school educators. The highly-prized six volumes of her historical works (see below) have become very scarce on the used book market, and so Dawn Chorus has undertaken to reprint them as part of its effort to offer texts ideally suited to the needs of a new generation of teachers and students. In a world where the quality of education has so deteriorated, may the reissue of this wonderful historical series shine as a beacon to a new generation of young (and not so young) scholars. Dawn Chorus publishes these five other books by Dorothy Mills: *The Book of the Ancient Greeks*; *The Book of the Ancient Romans*; *The People of Ancient Israel*; *The Middle Ages*; and *Renaissance and Reformation Times*. Dawn Chorus has also republished another outstanding, and long-out-of-print historical series perfectly suited for home or school use (and highly recommended in home-school curricula), entitled *The Picturesque Tale of Progress*, by Olive Beaupre

Miller. It is available in large format (9 volumes), or smaller, double-bound format (5 volumes).

This work offers a sweeping re-assessment of the Jiankang Empire (3rd-6th centuries CE), known as the Chinese "Southern Dynasties." It shows how, although one of the medieval world's largest empires, Jiankang has been rendered politically invisible by the standard narrative of Chinese nationalist history, and proposes a new framework and terminology for writing about medieval East Asia. The book pays particular attention to the problem of ethnic identification, rejecting the idea of "ethnic Chinese," and delineating several other, more useful ethnographic categories, using case studies in agriculture/foodways and vernacular languages. The most important, the Wuren of the lower Yangzi region, were believed to be inherently different from the peoples of the Central Plains, and the rest of the book addresses the extent of their ethnogenesis in the medieval era. It assesses the political culture of the Jiankang Empire, emphasizing military strategy, institutional cultures, and political economy, showing how it differed from Central Plains-based empires, while having significant similarities to

Southeast Asian regimes. It then explores how the Jiankang monarchs deployed three distinct repertoires of political legitimization (vernacular, Sinitic universalist, and Buddhist), arguing that the Sinitic repertoire was largely eclipsed in the sixth century, rendering the regime yet more similar to neighboring South Seas states. The conclusion points out how the research re-orienting our understanding of acculturation and ethnic identification in medieval East Asia, generates new insights into the Tang-Song transition period, and offers new avenues of comparison with Southeast Asian and medieval European history.

A lively and engaging narrative history showing the common threads in the cultures that gave birth to our own. This is the first volume in a bold new series that tells the stories of all peoples, connecting historical events from Europe to the Middle East to the far coast of China, while still giving weight to the characteristics of each country. Susan Wise Bauer provides both sweeping scope and vivid attention to the individual lives that give flesh to abstract assertions about human history. Dozens of maps provide a clear geography of great events, while timelines give the reader an ongoing sense of the passage of years and cultural interconnection. This old-fashioned narrative history employs the methods of “history from beneath” —literature, epic traditions, private letters and accounts—to connect kings and leaders with the lives of those they ruled. The result is an engrossing tapestry of human behavior from which we may draw conclusions about the direction of world events and the causes behind them.
