Revision and revisionism are generally seen as standard parts of historical practice, yet they are underexplored within the growing literature on historiography. In this accessibly written volume, Marnie Hughes-Warrington discusses this paucity of work on revision in history theory and raises ethical questions about linear models and spatial metaphors that have been used to explain it. Revisionist Histories emphasises the role of the authors and audiences of histories alike as the writers and rewriters of history. Through study of digital environments, graphic novels and reader annotated texts, this book shows that the 'sides' of history cannot be disentangled from one another, and that they are subject to flux and even destruction over time. Incorporating diverse and controversial case studies, including the French Revolution, Holocaust Denial and European settlers' contact with Native Americans and Indigenous Australians, Revisionist Histories offers both a detailed account of the development of revisionism and a new, more spatial vision of historiography. An essential text for students of historiography.

From alcohol and drug addiction to rage on national highways and in airports, many human beings have kept themselves in perpetual turmoil and despair. From encroachment on individual rights and liberties to wars of attrition and mass genocide, human history has continually repeated itself due to a failure to see the light. Containing numerous skill-building exercises, Critical Thinking Unleashed seeks to cultivate the reasoning skills required to overcome such destructive human tendencies and to live meaningful and productive lives in a democratic society. In contrast to other treatments of practical reasoning, Elliot D. Cohen not only teaches students how to identify and refute irrational premises, he also teaches them how to construct rational antidotes to combat the personal, social, and political obstacles they confront in everyday life. Moreover, Cohen encourages students to use the theories and ideas embodied in the history of philosophy in order to construct these rational guides, drawing examples from many contemporary sources. Demonstrating the practical relevance and import of many historically significant philosophers (e.g. Socrates, Aristotle, Epictetus, Hume, Kant, Mill, Sartre, and Nietzsche), the book presents a practical, non-technical, and comprehensive approach to critical thinking.

Net Works offers an inside look into the process of successfully developing thoughtful, innovative digital media. In many practice-based art texts and classrooms, technology is divorced from the

socio-political concerns of those using it. Although there are many resources for media theorists, practice-based students sometimes find it difficult to engage with a text that fails to relate theoretical concerns to the act of creating. Net Works strives to fill that gap. Using websites as case studies, each chapter introduces a different style of web project--from formalist play to social activism to data visualization--and then includes the artists' or entrepreneurs' reflections on the particular challenges and outcomes of developing that web project. Scholarly introductions to each section apply a theoretical frame for the projects. A companion website offers further resources for hands-on learning. Combining practical skills for web authoring with critical perspectives on the web, Net Works is ideal for courses in new media design, art, communication, critical studies, media and technology, or popular digital/internet culture.

This book explores total information awareness empowered by social media. At the FBI Citizens Academy in February 2021, I asked the FBI about the January 6 Capitol riot organized on social media that led to the unprecedented ban of a sitting U.S. President by all major social networks. In March 2021, Facebook CEO Mark Zuckerberg, Google CEO Sundar Pichai, and Twitter CEO Jack Dorsey appeared before Congress to face criticism about their handling of misinformation and online extremism that culminated in the storming of Capitol Hill. With more than three billion monthly active users, Facebook family of apps is by far the world's largest social network. Facebook as a nation is bigger than the top three most populous countries in the world: China, India, and the United States. Social media has enabled its users to inform and misinform the public, to appease and disrupt Wall Street, to mitigate and exacerbate the COVID-19 pandemic, and to unite and divide a country. Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." He should have heeded his own words. In October 2021, former Facebook manager-turned-whistleblower Frances Haugen testified at the U.S. Senate that Facebook's products "harm children, stoke division, and weaken our democracy." This book offers discourse and practical advice on information and misinformation, cybersecurity and privacy issues, cryptocurrency and business intelligence, social media marketing and caveats, e-government and e-activism, as well as the pros and cons of total information awareness including the Edward Snowden leaks. "Highly recommended." - T. D. Richardson, Choice Magazine "A great book for social media experts." - Will M., AdWeek "Parents in particular would be well advised to make this book compulsory reading for their teenage children..." - David B. Post-traumatic stress disorder is both a gift and tool in God's hands. The Lord has designed a person's brain to adjust to the rigors of combat or abuse. Combat's despair can also drive us to Christ. Jim Carmichael, Ph.D. looks back at his service in Vietnam and how it impacted his life upon returning home in this book. More importantly, he reveals how God led him to find redemption, obedience to God, and transformation into the image of Jesus Christ through suffering. In sharing his story, the author seeks to answer questions such as: · What is the purpose of PTSD? · Why don't all combatants suffer from PTSD? · How can God deliver individuals from bondage? · What can be done to prevent PTSD victims from dying by suicide? The author stresses that the

Veterans Administration should do more to teach veterans and their families about how the brain changes when it's subjected to constant stress. He also highlights how combatants throughout history have been impacted by stress. Join the author as he praises and thanks God for using the horrors of Vietnam to drive him to Christ.

As a sequel to Archaeogaming: an Introduction to Archaeology in and of Video Games, the author focuses on the practical and applied side of the discipline, collecting recent digital fieldwork together in one place for the first time to share new methods in treating interactive digital built environments as sites for archaeological investigation. Fully executed examples of practical and applied archaeogaming include the necessity of a rapid archaeology of digital built environments, the creation of a Harris matrix for software stratigraphy, the ethnographic work behind a human civilization trapped in an unstable digital landscape, how to conduct photogrammetry and GIS mapping in procedurally generated space, and how to transform digital artifacts into printed three-dimensional objects. Additionally, the results of the 2014 Atari excavation in Alamogordo, New Mexico are summarized for the first time.

What follows here, just a brief insight into Pain and Purpose in the Pacific. This book did not begin with the idea of a chronology of the battles of the Pacific War, although an overview is included. But instead it was intended to be a brief account of the battles on Saipan, Tinian, and Okinawa as I retrace the travels of one Marine from the farmland of Minnesota to Japan and back. Carl J. Johnson spent 30 months in the Pacific. Four of those months were in bitter combat on the islands of Saipan, Tinian, and Okinawa. He is my uncle. I have been blessed to travel, & to spend time at many of the places he traveled during World War II. My travels didn't stop there. As a Continental Airlines pilot based in Guam, now retired and having lived on Saipan, I have had the opportunity over a seven year period to visit other islands that were the scene of horrific battles of World War II. In addition to Saipan, Tinian, and Okinawa, I will mention a few of them. Included are Guam where I was based during the closing years of my airline career; also Belau, which is Palau, and includes Peleliu. Included too in this book are Iwo Jima, Corregidor and the Philippines. In my travels beyond Hawaii and Pearl Harbor, which was my introduction into the Pacific, were Yap, and Truk, which is Chuuk, and Pohnpei in the Carolines. And I've spent time in Japan. During my time in the Pacific, I have been presented with the opportunity to speak with several of the veterans of the Pacific War. Doing so has in some cases allowed me in some small way to understand a sense of the hell they had to suffer through. Included in this report are a few of their stories, as well as stories from some of the people of the islands who in one way or another were involved in the conflict. It is with a depth of gratitude that I acknowledge the Military Historical Tours of Alexandria, Virginia for allowing me to be a part of their tours to the islands of Iwo Jima, and Okinawa, as well as Guam, Tinian and Saipan. I appreciate this organization, dedicated to preserving the memories of the war, and to the honoring of the military personnel who were there at the time. While living on either Guam or Saipan I also was able to visit on my own most of the islands mentioned on this page. But it was the Military Historical Tours, and its President USMC Colonel Warren Wiedhahn (mht@miltours.com) that made it possible for me to visit Iwo Jima. They allowed me to join them once a year for 4 consecutive years. I have since returned a 5th time in March of 2010. It was through this great organization that over a 7 year period (while living on both Guam and Saipan in the Marianas Islands), I was able to meet most of the WWII veterans mentioned here; and these aging veterans of the War in the Pacific whom I have met, have touched my heart. In addition to my uncle, this book is for them too.

Accepting the challenge of rethinking connections of food, space and identity within everyday spaces of “ public ” eating in Malaysia and Singapore, the authors enter street stalls, hawker centers, markets, cafes, restaurants, “ food streets,” and “ ethnic ” neighborhoods to offer a broader picture of the meaning of eating in public places. The book creates a strong sense of the ways different people live, eat, work, and relax together, and traces negotiations and accommodations in these dynamics. The motif of rojak (Malay, meaning “ mixture ”), together with Ien Ang ’ s evocative “ together-in-difference,” enables the analysis to move beyond the immediacy of street eating with its moments of exchange and remembering. Ultimately, the book traces the political tensions of “ different ” people living together, and the search for home and identity in a world on the move. Each of the chapters designates a different space for exploring these cultures of “ mixedness ” and their contradictions—whether these involve “ old ” and “ new ” forms of sociality, struggles over meanings of place, or frissons of pleasure and risk in eating “ differently. ” Simply put, Eating Together is about understanding complex forms of multiculturalism in Malaysia and Singapore through the mind, tongue, nose, and eyes.

The online economy offers challenges to traditional businesses as well as incredible opportunities. Chris Anderson makes the compelling case that in many instances businesses can succeed best by giving away more than they charge for. Known as "Freemium," this combination of free and paid is emerging as one of the most powerful digital business models. In Free, Chris Anderson explores this radical idea for the new global economy and demonstrates how it can be harnessed for the benefit of consumers and businesses alike. In the twenty-first century, Free is more than just a promotional gimmick: It's a business strategy that is essential to a company's successful future.

World War I was one of the bloodiest conflicts in modern history - and yet it produced some of the best poetry of the 20th century. Many people's first encounter with poetry is through writers like Wilfred Owen and Siegfried Sassoon, and the passion and power they find in it makes a very deep impact. This collective biography of poets like Owen, Sassoon, Brooke, Graves, Rosenberg, Brittain, Sorley, and Seeger, along with potted biographies of many other war poets, gives the background of the poets' experiences to explain how the war created so much important poetry - and why we keep coming back to this work a hundred years later.
