Issues in Animal Science and Research / 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Animal Science and Research. The editors have built Issues in Animal Science and Research: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Animal Science and Research in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Animal Science and Research: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

*The Candle and the Flame* Academic Press  
When brilliant FBI agent Kendra Donovan stumbles back in time and finds herself in a 19th century English castle under threat from a vicious serial killer, she scrambles to solve the case before it takes her life—200 years before she was even born. Beautiful and brilliant, Kendra Donovan is a rising star at the FBI. Yet her path to professional success

hits a speed bump during a disastrous raid where half her team is murdered, a mole in the FBI is uncovered and she herself is severely wounded. As soon as she recovers, she goes rogue and travels to England to assassinate the man responsible for the deaths of her teammates. While fleeing from an unexpected assassin herself, Kendra escapes into a stairwell that promises sanctuary but when she stumbles out again, she is in the same place - Aldrich Castle - but in a different time: 1815, to be exact. Mistaken for a lady's maid hired to help with weekend guests, Kendra is forced to quickly adapt to the time period until she can figure out how she got there; and, more importantly, how to get back home. However, after the body of a young girl is found on the extensive grounds of the county estate, she starts to feel there's some purpose to her bizarre circumstances. Stripped of her twenty-first century tools, Kendra must use her wits alone in order to unmask a cunning madman.

Ever since its original publication in Germany in 1938, Max Schweidler's *Die Instandsetzung von Kupferstichen, Zeichnungen, Buchern usw.* has been recognized as a seminal modern text on the conservation and restoration of works on paper. This volume, based on the authoritative revised German edition of 1950, makes Schweidler's work available in English for the first time, in a meticulously edited and annotated scholarly edition. An extensively illustrated appendix presents case studies of eleven Old Master prints that were treated using the techniques Schweidler discusses.

This is the first English book dedicated solely to the historical development of psychotherapy in Korea. It is an archaeological research of literature relating to the care and treatment of mind in Korean history in dialogue with spiritual, philosophical, cultural, social, and medical perspectives. It reviews the evolution of different approaches on mental illnesses covering autochthonous practices, psychiatry, clinical psychology, counseling, Western psychotherapy, and Korean psychotherapy. *Archaeology of Psychotherapy in Korea* inspects: *Folk Treatment First Psychiatry Influence from Clinical Psychology* *Counselling Development Implementation of Western Psychotherapy* *Shaping of Korean Psychotherapy* Its discussion engages firmly with the Korean culture and perspective while acknowledging various extrinsic influences and the fact that Korean psychotherapy continues to evolve in its own unique manner. It aims to refine the understanding of psychotherapy development in Korea in connection with its historical and social backgrounds, and to interpret a way to highlight the culturally relevant psychotherapy that is more suitable as a Korean psychotherapy better attuned to the distinct cultural and societal expectation of Korea.

It's cold and dark and Evelyn is in the morgue. In a drawer. She doesn't know how she got there, and Tammi, the morgue attendant who hustles her out into the night, doesn't have time to answer questions. Evelyn has been robbed of the gift of immortality her absent lover promised her, and plunged instead, alone, into the night-time world of the vampire. In her search for love and belonging Evelyn must contend with a series of lovers who have their own ideas about what being a vampire means, and who she should be. When her

vampire lover returns Evelyn soon finds that he is a psychopath, and his obsessive courtship includes torture and murder.

This book explores the structure-property-process relationship of biomaterials from engineering and biomedical perspectives, and the potential of bio-inspired materials and their applications. A large variety of natural materials with outstanding physical and mechanical properties have appeared in the course of evolution. From a bio-inspired viewpoint, materials design requires a novel and highly cross disciplinary approach. Considerable benefits can be gained by providing an integrated approach using bio-inspiration with materials science and engineering. The book is divided into three parts; Part One focuses on mechanical aspects, dealing with conventional material properties: strength, toughness, hardness, wear resistance, impact resistance, self-healing, adhesion, and adaptation and morphing. Part Two focuses on functional materials with unique capabilities, such as self-cleaning, stimuli-response, structural color, anti-reflective materials, catalytic materials for clean energy conversion and storage, and other related topics. Part Three describes how to mimic natural materials processes to synthesize materials with low cost, efficient and environmentally friendly approaches. For each chapter, the approach is to describe situations in nature first and then biomimetic materials, fulfilling the need for an interdisciplinary approach which overlaps both engineering and materials science. United States Imports of Merchandise for Consumption Springer The Blue Valley series is not your typical love story. It is a journey through one's past ? maybe even a story resembling someone close to you. It's our story. Welcome to the college years ? Love has not been easy for Tessa Ross and Lucas Links, but they have managed to overcome situations that so many others in their lives haven't. And through all of their difficulties, neither have ever denied the love they have for one another. But sometimes love isn't enough ? What new joys, pains, and decisions will they make as they take their first steps into adulthood? This is love, not a fairy tale. Warning: Highly Emotional! This book contains volatile characters in real-life situations that may be triggers to some readers.

Sad Love Createspace Independent Publishing Platform

Within the last few decades, arachnology in the Neotropical region has experienced a great development filling the knowledge gap in one of the most diverse regions of the world. Nevertheless, large geographical areas remain poorly sampled, especially within the Amazon, and new genera and species have been continuously discovered, even in urban areas. In congruence with the recent improvements in research, several aspects of the ecology, behaviour and natural history of spiders, such as interactions with other predators and parasitoids, social interactions, dispersal patterns, habitat requirements, mating behaviors, among others, are being carefully investigated. These recent contributions incorporate substantial information on the preexisting knowledge on these subjects every year. Our main objective with this book is to present a summary on these new researches and on the currently knowledge on the main subjects involved in the general theme, emphasizing the contribution of the rich fauna of the Neotropical region to the research of behaviour and ecology of the spiders.

A Murder in Time Wrapped In Silk Irons 1

The practical need to partition the world of viruses into distinguishable, universally agreed upon entities is the ultimate justification for developing a virus classification system. Since 1971, the International Committee on Taxonomy of Viruses (ICTV) operating on behalf of the world community of virologists has taken on the task of developing a single, universal taxonomic scheme for all viruses infecting animals (vertebrate, invertebrates, and protozoa), plants (higher plants and algae), fungi, bacteria, and archaea. The current report builds on the accumulated taxonomic construction of the eight previous reports dating back to 1971 and records the proceedings of the Committee since publication of the last report in 2005. Representing the work of more than 500 virologists worldwide, this report is the authoritative reference for virus organization, distinction, and structure.

Issues in Animal Science and Research: 2011 Edition Oxford University Press Bodzia is a unique, elite cemetery in Poland from the Late Viking Age. Its peculiarities are defined by the number of rich burials of incomers whose origins were connected with the Slavic, Nomadic Khazarian and Scandinavian milieus.

Broken John Wiley & Sons

"As World War I rages ... young, ambitious jewelry maker [and Parisian] Opaline Duplessi spends her time making trench watches for soldiers at the front, as well as mourning jewelry for the mothers, wives, and lovers of those who have fallen. People say that Opaline's creations are magical ... Opaline does have a rare gift even she can't deny, a form of lithomancy that allows her to translate the energy emanating from stones. Certain gemstones, combined with a personal item, such as a lock of hair, enable her to receive messages from beyond the grave. In her mind, she is no mystic, but merely a messenger, giving voice to soldiers who died before they were able to properly express themselves to loved ones. Until one day, one of these fallen soldiers communicates a message

-- directly to her"--Provided by publisher.

Sexual Selection BoD – Books on Demand

Max Appleton and his mother Celia are on the run, hiding from an abusive father and husband who's also a notoriously bad pack leader. When Max hit puberty and it became obvious he'd never make an alpha wolf, his father turned the brunt of his anger toward his inferior son and his beta wolf wife for producing him. Max and Celia find sanctuary in a garden cottage at Holly Court, the sprawling estate where Celia's oldest friend lives with her pack alpha husband, three daughters, and teenaged son Jonah. Jonah Spellman has what seems like the perfect life. His family is close, his dad is respected by their whole pack, and he's been groomed to take over for as long as he can remember. Everything is set, his whole life planned, and Jonah works hard to be exactly what everyone expects. He's under enough pressure without a runaway from a bad pack complicating his life. When two teenaged werewolves from very different worlds meet one snowy January day, both of their worlds get turned inside out. From the moment they meet, nothing will be the same for Jonah or Max ever again.

Composite materials, often shortened to composites, are engineered or naturally occurring materials made from two or more constituent materials with significantly different physical or chemical properties which remain separate and distinct at the macroscopic or microscopic scale within the finished structure. The aim of this book is to provide comprehensive reference and text on composite materials and structures. This book will cover aspects of design, production, manufacturing, exploitation and maintenance of composite materials. The scope of the book covers scientific, technological and practical concepts concerning

---

research, development and realization of composites.

Simon and Schuster

In this volume, papers by leading Roman historians and archaeologists discuss trade within the Roman Empire and beyond its frontiers between c.100 BC and AD 350, and the role of the state in shaping the institutional framework for trade. Documentary, historical and archaeological evidence forms the basis of a novel interdisciplinary approach

Bodzia CRC Press

She wasn't part of the plan. Jax I was born and bred to be the man I am today. My father and his father were both graduates from The United States Naval Academy in Annapolis. Both went on to become helicopter pilots. Both had seen plenty of action. Both had met and caused devastation. Both men, who I respect more above all, had served and protected the United States and her people honorably for decades. My best friend, William Cruz, who attended the academy with me, had flown beside me, had lived the same life as I had and shared the same ambitions in life, was gone now. This was not part of the plan. Will and I were supposed to have each other's backs, support each other and never let anything supersede our bond. Francesca I sat on Norfolk Beach needing to feel close to him on the anniversary of his death. It was a beautiful day in May and I was cutting class. I had done the same every year since he passed. His best friend, Jaxson Irons, was only supposed to be in Pensacola for a year. But now three years later I still hadn't heard from him. I saw a man running down the beach and I knew immediately who it was. Jaxson didn't respond the way I had dreamed he would. He told me we would catch up someday soon. I stood and watched until he was gone. Thump, thump. I placed my hand on my chest as I felt my heart beat again for what felt like the first time in three years. Thump, thump. I felt the blood moving quickly through my body. It's heat once again present. Thump, thump. I looked up at the sky and let out a breath. A breath that I had been holding forever. Thump, thump. I felt tears fall down my face as I raised my hands in the air and laughed out loud. Just then the clouds parted for the first time in forever. I saw the sun smiling down on me.

Memphis Black Simon and Schuster

Sexual Selection: Perspectives and Models from the Neotropics presents new sexual selection research based upon neotropical species. As neotropical regions are destroyed at an alarming rate, with an estimated 140 species of rainforest plants and animals going extinct every day, it is important to bring neotropical research to the fore now. Sexual selection occurs when the male or female of a species is attracted by certain characteristics such as form, color or behavior. When those features lead to a greater probability of

successful mating, they become more prominent in the species.

Although most theoretical concepts concerning sexual selection and reproductive strategies are based upon North American and European fauna, the Neotropical region encompasses much more biodiversity, with as many as 15,000 plant and animal species in a single acre of rain forest. This book illustrates concepts in sexual selection through themes ranging from female cryptic choice in insects, sexual conflict in fish, interaction between sexual selection and the immune system, nuptial gifts, visual and acoustic sexual signaling, parental investment, to alternative mating strategies, among others. These approaches distinguish Sexual Selection from current publications in sexual selection, mainly because of the latitudinal and taxonomic focus, so that readers will be introduced to systems mostly unknown outside the tropics, several of which bring into question some well-established patterns for temperate regions. Synthesizes sexual selection research on species from the Neotropics Combines different perspectives and levels of analysis using a broad taxonomic basis, introducing readers to systems mostly unknown outside the tropics and bringing into question well-established patterns for temperate regions Includes contributions exploring concepts and theory as well as discussions on a variety of Neotropical vertebrates and invertebrates, such as insects, fish, arthropods and birds
