The craft of

writing is a lot like spinning a web: You take threads and weave them skillfully together, and only you know where this intricate network of twists and turns begin and how it will end. Now, with Lawrence Block's expert advice, you can learn this art of entrapping your reader in a maze of fascinating fiction. *Spider, Spin Me a Web* is the perfect companion volume to Block's previous book on writing, *Telling Lies for Fun and Profit*, which Sue Grafton noted "should be a permanent part of every writer's library." As helpful and supportive as always, Block shares what he's learned over the course of writing over one hundred published books: techniques to help you to write a solid piece of fiction; strategies for getting a reader (or editor) to read—and buy—your book; ideas for increasing your creativity and developing an environment that will nourish you and your craft. *Spider, Spin Me a Web* is a complete guide to achieving your full potential as a writer. New York cop Edward X. Delaney (Kirkus Reviews). New York Police Department Captain Edward Delaney is called to the scene of a brutal murder. A Brooklyn councilman was struck from behind, the back of his skull punctured and crushed with an unknown weapon. The victim wasn't robbed, and there's no known motive. The commissioner appoints Delaney to head up a clandestine task force, but soon this effort ignites an internecine war of departmental backstabbing. Distracted by the serious illness of his wife, Barbara, Delaney begins his secret investigation. Then the killer claims another victim—slain in the exact same way, leaving the strange puncture wound. As more young men are found murdered, Delaney starts putting the pieces together. Soon, he's faced with a cop's dilemma: He knows who the killer is, but the man is untouchable. That's when

Delaney lays a trap to bring a monster to justice . . .

Tower—a riveting thriller and all-too-convincing chronicle of science, espionage, action and speculation” (The Wall Street Journal) At an internment camp in Indonesia, forty-seven people are pronounced dead with acute hemorrhagic fever. When epidemiologist Henry Parsons travels there on behalf of the World Health Organization to investigate, what he finds will have staggering repercussions.

Halfway across the globe, the dismantling of U.S. Homeland Security scrambles to mount a response to the rapidly spreading pandemic leapfrogging around the world, which she believes may be the result of an act of biowarfare. And a rogue experimenter in man-made diseases is preparing his own terrifying solution. As already-fraying global relations begin to snap, the virus slashes across the United States, institutions and decimating the population. With his own wife and children facing the diminishing odds of survival, Henry travels from Indonesia to Saudi Arabia to his home base at the CDC in Atlanta, searching for a cure and for the origins of this seemingly unknowable disease. The End of October is a one-of-a-kind thriller steeped in real-life political and scientific implications, filled with the insight that has been the

hallmark of Wright's acclaimed nonfiction and the full-tilt narrative suspense that only the best fiction can offer.

Stephen Lawrence was a bright, athletic, young man with high hopes for the future. He lived in south-east London with his parents, younger brother and younger sister. On 22 April 1993,

he was brutally murdered while he was waiting for the bus. He was eighteen years old. He didn't know his killers; his killers didn't know him. This is his story. He will be remembered. This paperback edition revised with added material about the trial, the legacy of Stephen Lawrence and a final note from Doreen Lawrence.

You could describe D.H. Lawrence as the great multi-instrumentalist among the great writers of the twentieth century. He was a brilliant, endlessly controversial novelist who transformed, for better and for worse, the way we write about sex and emotions; he was a wonderful poet; he was an essayist of burning curiosity, expansive lyricism, odd humor, and radical

intelligence, equaled, perhaps, only by Virginia Woolf. Here Geoff Dyer, one of the finest essayists of our day, draws on the whole range of Lawrence's published essays to reintroduce him to a new generation of readers for whom the essay has become an important genre. We get Lawrence the book reviewer, writing about *Death in Venice* and welcoming Ernest Hemingway; Lawrence the travel writer, in Mexico and New Mexico and Italy; Lawrence a fundamental, the memoirist, depicting his strange sometime-friend Maurice Magnus; Lawrence the restless inquirer into the possibilities of the novel, writing about the novel and morality and addressing the question of why the novel matters; and, finally, the Lawrence who meditates on birdsong or the death of a porcupine in the Rocky Mountains. Dyer's selection of Lawrence's essays is a wonderful introduction to

a fundamental, dazzling writer. Song Without Words Tuttle Publishing The untold story of Dr. Oliver Sacks, his own most singular patient "[An] engrossing biographical memoir. This is Sacks at full blast: on endless ward rounds, observing his post-encephalitic patients . . . exulting over horseshoe crabs and chunks of Iceland spar."

—Barbara Kiser, Nature The author Lawrence Weschler began spending time with Oliver Sacks in the early 1980s, when he set out to profile the neurologist for his own new employer, The New Yorker. Almost a decade earlier, Dr. Sacks had published his masterpiece Awakenings—the account of his long-dormant patients' miraculous but troubling return to life in a Bronx hospital ward. But the book had hardly been an immediate success, and the ruffled clinician was still largely unknown. Over the ensuing four years, the two men worked closely together until, for wracking personal reasons, Sacks asked Weschler to abandon the profile, a request to which Weschler acceded. The two remained close friends, however, across the next thirty years and then, just as Sacks was dying, he urged Weschler to take up the project once again. This book is the result of that entreaty. Weschler sets Sacks's brilliant table talk and extravagant personality in vivid relief,

casting himself as a beanpole Sancho to Sacks's capacious Quixote. We see Sacks rowing and ranting and caring deeply; composing the essays that would form *The Man Who Mistook His Wife for a Hat*; recalling his turbulent drug-fueled younger days; helping his patients and exhausting his friends; and waging intellectual war against a

medical and scientific establishment that failed to address his greatest concern: the spontaneous specificity of the individual human soul. And all the while he is pouring out a stream of glorious, ribald, hilarious, and often profound conversation that establishes him as one of the great talkers of the age. Here is the definitive

portrait of Sacks as our preeminent romantic scientist, a self-described "clinical ontologist" whose entire practice revolved around the single fundamental question he effectively asked each of his patients: How are you? Which is to say, How do you be? A question which Weschler, with this book, turns back on the good doctor
