Today's early literacy programs are more demanding than ever. No longer is it sufficient to teach letters, letter sounds, sight words, and simple texts in kindergarten through second grade. Children are expected to

read and comprehend texts in a variety of genres with increasing complexity. Then they must integrate the ideas and concepts from those texts into their own writing. Two Books are Better Than One: Reading and Writing (and Talking and Drawing) Across Texts in K-2 helps teachers meet those demands. Each chapter contains an anchor lesson focused on a

different way of connecting texts, including: by theme, characters, perspective, structure, or genre. The lessons feature research-based and common core aligned strategies: interactive read-alouds; shared reading and writing; scaffolded small group reading; accountable talk; close reading; and opinion, narrative, and

explanatory writing. Each anchor lesson features two high-quality children's books, and each chapter is rounded out with a list of other recommended book pairs to support you in creating your own lessons.

This book shows scientists how to apply their

analysis and synthesis skills to overcoming the challenge of how to write, as well as what to write, to maximise their chances of publishing in international scientific journals. The book uses analysis of the scientific article genre to provide clear processes

for writing each section of a manuscript, starting with clear 'story' construction and packaging of results. Each learning step uses practical exercises to develop writing and data presentation skills based on reader analysis of well-written example papers. Strategies are
