""The Yellow Wallpaper"" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in The New England Magazine. It is regarded as an important early work of American feminist literature, due to its illustration of

the attitudes towards mental and physical health of women in the 19th century.

Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a ""temporary nervous depression - a slight hysterical tendency"", a diagnosis common to women during that period"

What makes a good story or a screenplay great? The vast majority of writers begin the storytelling process with only a partial understanding where to begin. Some labor their entire lives without ever learning that successful stories are as dependent upon good engineering as they are artistry. But the truth is, unless you are master of the form, function and criteria of successful storytelling, sitting down and pounding out a first draft without planning is an ineffective way to begin. *Story Engineering* starts with the criteria and the architecture of storytelling, the engineering and design of a story--and uses it as the basis for narrative. The greatest potential of any story is found in the way six specific aspects of storytelling combine and empower each other on the page. When rendered artfully, they become a sum in excess of their parts. You'll learn to wrap your head around the big pictures of storytelling at a professional level through a new approach that shows how to combine these six core competencies which

include:

- Four elemental competencies of concept, character, theme, and story structure (plot)
- Two executional competencies of scene construction and writing voice

The true magic of storytelling happens when these six core competencies work together in perfect harmony. And the best part? Anyone can do it!

The Psychology Major ' s Handbook Que Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.
