These studies aim to unveil the impact of mediating variables such as task type, mode of interaction, and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative, and mixed-methods designs as well as cognitive, social, and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content-based programs, online contexts, and after-school programs. To span the divide between research and practice, each study includes a section suggesting pedagogical implications.

Following on from Writers at Work: The Paragraph and Writers at Work: the Short Composition, Writers at Work: The Essay will teach the basics of academic writing to intermediate-level students. In Writers at Work: The Essay, college and university students use the process approach to write different genres of essays common at the post-secondary level, the most important being expository writing, persuasive writing, and timed essay exams. Each chapter uses the same five-step approach to writing that is used in the two lower-level books. In each chapter, students analyze a model essay, noticing key organizational and linguistic features; brainstorm ideas; write multiple drafts; revise their work; engage in peer reviews; and share their finished work. Chapters recycle and build upon previously taught material.
