New Year ' s resolution is an overused word, and we have rarely seen success in it. Somehow in our heart we all know that new year is full of possibilities, and it has the potential to bring drastic positive changes in our lives. But we do not know how. Can there be a way to really understand the concept of New Year ' s resolution? Can someone present a powerful, but simple technique to create the right New Year ' s resolution? The next big challenge is about the execution. Even if we have created the right New Year ' s resolution, it is rarely executed. It means that the expected outcomes from the

resolutions are not achieved. People after repeated failures either stop making the New Year ' s resolutions, or make it only for fun. It is a missed opportunity, which has the potential to transform our lives completely. The objective of this book is to create champions in the concept of New Year ' s resolutions and direct the energy and resources of the readers in the right direction so that they can achieve the expected results from their New Year ' s resolutions. We have discussed powerful ideas and effective techniques to support people in unleashing the power from their New Year ' s resolution. If the readers sincerely follow the techniques and the steps specified in the book, then they can transform their New Year ' s resolution into a big opportunity, which is full of possibilities and hope. Readers workbook attached with the chapters of the book to facilitate the development of their New Year ' s resolution, its evaluation, and

execution. We are sure that after completion of this book the readers will have powerful tools at their disposal to bring the desired changes in their lives, to become more successful, satisfied, and happy.

Computer-generated visual effects are now used extensively in feature films, commercials, music videos, and multimedia. The backbone of this process, the final and most important step, is known as digital compositing. *The Art and Science of Digital Compositing* is a comprehensive reference that provides a complete overview of the technical and the artistic nature of this process. This book covers a wide range of topics from basic image creation, representation, and manipulation, to a look at the visual cues that are necessary to create a believable composite. Designed as both an introduction to the field as well as a valuable technical reference, this book should be of interest to both novices and professionals alike. Written by a working professional in the visual effects industry, the book provides over 250 different images and illustrations (including a 40-page color insert) as well as a complete glossary of compositing and visual-effects terminology. Also included are in-depth case studies from well-known films such as *Speed*, *Independence Day*, and *Titanic*. Balances fundamental "hard science" topics with the more qualitative/artistic challenges which face anyone involved in a digital composition project Provides examples and illustrations from motion picture work CD-ROM contains additional composition examples, illustrations, and development software Includes 32 pages of colour

These proceedings of the international 2006 symposium 'The Theory and Practice of Life Writing: Auto/biography, Memoir and Travel Writing in Post/modern Literature' at Haliç University, Istanbul, include the majority of contributions to this event, some of them heavily revised for publication. A first group, treatments of more comprehensive and/or theoretical aspects of life and travel writing, concerns genre history (Nazan Aksoy; Manfred Pfister), typology (Manfred Pfister; Sidonie Smith and Julia Watson), issues of narration (Gerald P. Mulderig; Rana Tekcan), the recent phenomenon of blogging (Leman Giresunlu), and therapeutic narrative (Wendy Ryden). A second group—whose concern often heavily overlaps with the first in that it also pursues theoretical goals—concentrates on individual authors and artists: Sabâ Alt?nsay and Dido Sotiriou (Banu Özel), Samuel Beckett (Oya Berk), the sculptor Alexander Calder (Barbara B. Zabel), G. Thomas Couser and his filial memoir, Moris Farhi (Bronwyn Mills), Jean Genet (Clare Brandabur), Henry James (Laurence Raw), Orhan Pamuk (Dilek Dolta?; Ay?e F. Ece), Sylvia Plath (Richard J. Larschan), Edouard Roditi (Clifford Endres), Sara Rosenberg (Claire Emilie Martin), the dancer Mrinalini Sarabhai (Leena Chandorkar), Alev Tekinay (Özlem Ö?üt), Uwe Timm (Jutta Birmele), and female British and American Oriental travellers (Tea Jansson).

The Art of Debate - 14th Edition Springer Science & Business Media

In the western Pacific Ocean north of the equator, the far-flung islands of Micronesia extend across an area as large as that of the United States. Most of this area is administered by the United States as a trusteeship granted by the United Nations after World War II. Having been governed in turn by three other world powers— Spain, Germany, and Japan— the 91,000 Micronesian inhabitants are now at last in the process of working out their own political future. This book, a thorough, scholarly study of the development of the legislative process in the Trust Territory, focuses on the Congress of Micronesia, the legislature destined to carry the burden of the political development in the Territory. It examines institution-building over a period of two decades, describing how American forms and processes have been modified to fit the indigenous cultures of Micronesia, and how these cultures have accommodated to them. It also treats the impact of institutional change upon the role of indigenous leadership, highlighting the emergence of Micronesian leaders most capable of participating in the new political system. Here are detailed the day by day negotiations to set up a district legislature between the spokesmen for aboriginal Yap (of stone money fame) and the chiefs of the island empire which once paid it tribute. Here is described what happens when the U.S. Supreme Court's "one man, one vote" formula

is applied to people yet learning how to vote. The United States today has no defined policy for the eventual status of her Pacific island possessions. The future of Guam and American Samoa remains unclear. But the legislators of the Trust Territory have acted for the people they represent. Their adopted legislative institution will be central in determining whether or not the Trust Territory will become fully self-governing and independent.

By some counts, Model United Nations (MUN) has become the single most popular extracurricular academic activity among high school students. More than two million high school and college students have assumed the roles of ambassadors from real United Nations member countries, participated in spirited debate about the world's most pressing issues, and called, "Point of order, Mr. Chairman!" Now, in *Coaching Winning Model United Nations Teams*, Ed Mickolus and J. Thomas Brannan give MUN teachers and coaches the information they need to succeed. In this informative volume, the authors (MUN coaches themselves) provide detailed guidance for each step of the MUN path, from the first meeting in the teacher's classroom to the final days of an official MUN conference. Coaches will learn

about the ins and outs of parliamentary procedure and the most effective ways to help their students draft position papers and resolutions. Most important, Mickolus and Brannan illustrate the many ways that teachers can inspire their students to take an active role in making the world a better place. By the time their students move on, MUN coaches will have instilled in them such important qualities as empathy, self-confidence, and grace under pressure. *Coaching Winning Model United Nations Teams* is a fun, useful guide for teachers and coaches who are working to help develop tomorrow's leaders today.
