Organized both chronologically and thematically, Encounters with the People is an edited, annotated compilation of unique primary sources related to Nez Perce history--Native American oral histories, diary excerpts, military reports, maps, and more. Generous elders shared their collective memory of carefully guarded stories passed down through multiple generations. One described the level of attentiveness required to preserve their oral history as “so still to listen that you could hear a bird take a drink of water on the other side of the mountain.” The work begins with early Nimiipuu/Euro-American contact and extends to the period immediately after the Treaty of 1855 held at Walla Walla. The editors scoured archives, federal document repositories, and state and local historical museums in search of little-known documents related to regional cultural and environmental history. Most of the selected material is published for the first time or is found only in obscure sources. Complete documents are included wherever possible, and any excisions carefully noted. Part of the Voices from Nez Perce Country series, Encounters with the People includes a thorough, up-to-date, annotated bibliography. Those interested in the Nez Perce, Native American Studies, Lewis and Clark, early missionary work, and Inland Northwest settlement will find it an essential reference work. Recipient of a 2016 CHOICE Academic Book of the Year, the 2016 Western History Association Dwight L. Smith Award, and a 2015 Idaho Book Award Honorable Mention, from the Idaho Library Association.

"The anxiety caused by the thought of nuclear war causes some people to avoid the topic altogether, some to despair, and others to place unwarranted confidence in scientific or governmental control. However, the vivid characters and realistic settings of fiction can bring home the impact of a nuclear war in a way that makes the topic difficult to avoid and allows readers to confront their fears and phobias. This bibliography study is the only compliation of its kind to deal exclusively with nuclear war in fiction. The first five chapters provide a historical survey of the development of the nuclear war theme and a study of the causes and aftermath of nuclear war as treated in literature. In addition, Brians considers the significant failure of some works to confront the subject and the success of others as educational tools. With a clear focus on the subject of war, this work does not deal with such related topics as nuclear accidents, reactor disasters, or near-war situations. The bulk of the book is given over to the detailed, annotated bibliography which consists of over 800 entries with associated checklists. Intended to provide scholars, librarians, and general readers with ready access to a great variety of information about his body of writing, the bibliography lists both hardcover and paper editions of books and the reprinting of each short story and corrects several errors in other standard reference works. In his critical analysis and through the annotations in the bibliography, Brians attempts to improve our understanding of cultural attitudes toward the dangers posed by the ever-present reality of nuclear weaponry"--Jacket.

The results presented in this WSU publication serve as a general guide for evaluating the feasibility of producing potatoes in the Columbia Basin as of 2015, with a capital and machinery endowment suited to a 1,000-acre potato enterprise. This publication is not intended to be a definitive guide to production practices, but is helpful in estimating the physical and financial requirements of comparable plantings. To avoid drawing unwarranted conclusions for any particular farm, readers must closely examine the assumptions made in this study, and then adjust the costs, returns, or both as appropriate for their operation.

Rising Above the Gathering Storm Petrogav International

Before the LDS Church was organized, Joseph Smith received a revelation telling him that twelve men would be called as latter-day apostles. Their assignment would be to warn men and women that the end was near. Although the determination of who would fill these positions was delayed for five years, when it finally happened, God reiterated that these men were to "prune the vineyard for the last time" because the Second Coming was nigh. In fact, "fifty six years would wind up the scene," they were told. Of the twelve men selected, nine would eventually be pruned from the vineyard themselves, to varying degrees. Seven were excommunicated, one of whom was reinstated to his position in the Twelve. Of the other six, the subjects of this book, none returned to the apostleship and four never came back to the Church at all. Those who left faded into obscurity except for when they are occasionally still mentioned in sermons as cautionary tales. But two of them made their marks in other areas of society, John Boynton becoming a successful dentist, a popular lecturer, geologist, and inventor with dozens of important patents to his name, while Lyman Johnson became a prominent attorney and business owner. Even though Luke Johnson, Thomas B. Marsh, William McLellin, and William Smith became religious wanderers and tried unsuccessfully to adjust to life outside of the Church, their experiences were interesting and comprise valuable case studies in belief and disaffection.

Questions and answers for job interview Offshore Oil & Gas Platforms McGraw Hill Professional Foundations for Community Health Workers Foundations for Community Health Workers is a training resource for client- and community-centered public health practitioners, with an emphasis on promoting health equality. Based on City College of San Francisco's CHW Certificate Program, it begins with an overview of the historic and political context informing the practice of community health workers. The second section of the book addresses core competencies for working with individual clients, such as behavior change counseling and case management, and practitioner development topics such as ethics, stress management, and conflict resolution. The book's final section covers skills for practice at the group and

community levels, such as conducting health outreach and facilitating community organizing and advocacy. Praise for Foundations for Community Health Workers "This book is the first of its kind: a manual of core competencies and curricula for training community health workers. Covering topics from health inequalities to patient-centered counseling, this book is a tremendous resource for both scholars of and practitioners in the field of community-based medicine. It also marks a great step forward in any setting, rich or poor, in which it is imperative to reduce health disparities and promote genuine health and well-being." Paul E. Farmer, MD., PhD, Maude and Lillian Presley Professor of Social Medicine in the Department of Global Health and Social Medicine at Harvard Medical School; founding director, Partners In Health. "This book is based on the contributions of experienced CHWs and advocates of the field. I am confident that it will serve as an inspiration for many CHW training programs." Yvonne Lacey, CHW, former coordinator, Black Infant Health Program, City of Berkeley Health Department; former chair, CHW Special Interest Group for the APHA. "This book masterfully integrates the knowledge, skills, and abilities required of a CHW through storytelling and real life case examples. This simple and elegant approach brings to life the intricacies of the work and espouses the spirit of the role that is so critical to eliminating disparities a true model educational approach to emulate." Gayle Tang, MSN, RN., director, National Linguistic and Cultural Programs, National Diversity, Kaiser Permanente "Finally, we have a competency-based textbook for community health worker education well informed by seasoned CHWs themselves as well as expert contributors." The past half-century has witnessed a dramatic increase in the scale and complexity of scientific research. The growing scale of science has been accompanied by a shift toward collaborative research, referred to as "team science." Scientific research is increasingly conducted by small teams and larger groups rather than individual investigators, but the challenges of collaboration can slow these teams' progress in achieving their scientific goals. How does a team-based approach work, and how can universities and research institutions support teams? Enhancing the Effectiveness of Team Science synthesizes and integrates the available research to provide guidance on assembling the science team; leadership, education and professional development for science teams and groups. It also examines institutional and organizational structures and policies to support science teams and identifies areas where further research is needed to help science teams and groups achieve their scientific and translational goals. This report offers major public policy recommendations for science research agencies and policymakers, as well as recommendations for individual scientists, disciplinary associations, and research universities. Enhancing the Effectiveness of Team Science will be of interest to university research administrators, team science leaders, science faculty, and graduate and postdoctoral students.
