In Respawn Colin Milburn examines the connections between video games, hacking, and science fiction that galvanize technological activism and technological communities. Discussing a wide range of games, from Portal and Final Fantasy VII to Super Mario Sunshine and Shadow of the Colossus, Milburn illustrates how they impact the lives of gamers and non-gamers alike. They also serve as resources for critique, resistance, and insurgency, offering a space for players and hacktivist groups such as Anonymous to challenge obstinate systems and experiment with alternative futures. Providing an essential walkthrough guide to our digital culture and its high-tech controversies, Milburn shows how games and playable media spawn new modes of engagement in a computerized world.

The Story of the Hymns and Tunes Penguin

This is a rigorous, carefully explained and motivated "beginner's bible" to power supply design. Between dense, mathematical textbooks on power electronics and tiny power supply "cookbooks" there exists no practical tutorial on the hazards of contemporary power supply design. Our Pressman book, the 800 lb gorilla in the field, is both mathematically dense and 7 years old. This new book, detailing cutting edge thermal management techniques, grouping key design equations in a special reference section, and containing a concise Design FAQ, will serve both as an invaluable tutorial and quick reference.

In Course of True Love Actar

Some say all love stories are the same. A boy meets a girl and they fall in love eventually. But is that where the story ends? What about the journey they make together, the feelings they share, and the moments they live?

Aarush is a reticent boy who has dreams of making it to a premier engineering college. Staying away from home and working hard towards his dreams, he falls in love under strange circumstances. That too, truly, madly, deeply. Can love happen at sixteen, or is it just a passing infatuation? A true yet unusual emotional love saga. In Course of True Love explores the reality of puppy love, and plumbs its depth, its warmth, and its true meaning.

Life and Other Inconveniences Goodheart-Willcox Pub

Between the postwar years and the 1980s in Britain, and in particular in London, a number of figurative painters simultaneously reinvented the way in which life is represented in art. Focusing on the depiction of the human figure, these artists rendered the frailty and vitality of the human condition. Offering a fresh account of developments that have since characterized postwar British painting, this catalogue focuses on Michael Andrews, Frank Auerbach, Francis Bacon, Lucian Freud, R. B. Kitaj, and Leon Kossoff—artists who worked in close proximity as they were developing new forms of realism. If for many years their efforts seemed to clash with dominant tendencies, reassessment in recent decades has afforded their work a central position in a richer and more complex understanding of postwar British art and culture. Rigorous and gorgeously illustrated, the essays reflect on the parallel yet diverse trajectories of these artists, their friendships and mutual admiration, and the divergence of their practice from the discourse of high modernism. The authors seek to dispel the notion of their work as a uniquely British endeavor by highlighting the artists' international outlook and ongoing dialogue with contemporary European and American painters as well as masters from previous generations. This book is published to coincide with an exhibition at the J. Paul Getty Museum from July 26 through November 13, 2016.

Aleksandr Deineka (1899-1969): An Avant-Garde for the Proletariat is the first exhibition and publication to present this outstanding figure of socialist realism - and, by extension, the historical period from which his work was borne - in a twofold context: the end of the avant-garde and the advent of Soviet socialist realism. It covers Deineka's entire oeuvre, from his early paintings of the 1920s to the twilight of his career in the 1950s, when the dreamlike quality of his first works gave way to the harsh materiality of everyday life, the life in which the utopian ideals of socialism seemed to materialize. Combining Deineka's graphic work, extraordinary posters and celebrated contributions to illustrated magazines and books with his imposing monumental paintings, this catalogue displays a variety of subjects: factories and enthusiastic masses, athletes and farmers, the ideal and idyllic image of Soviet life.

A Bible study about sex for women? Now that's different! This new study, *Passion Pursuit: What Kind of Love Are You Making?*, lets God's Word speak about sex as being holy and erotic, blessed by God, and satisfying far beyond what the world can even imagine. Picture that as a headline on the cover of *Cosmopolitan*! By using scripture throughout the Bible, *Passion Pursuit* not only urges women to pursue passion but details how God has given them permission to do so. Though there is fun to be had along the way in this study, it hits hard on the questions women have but are hesitant to ask, like: What does God say is okay and not okay in the bedroom? I'm 54 years old; how can my husband still be attracted to me? Why did God make men and women so different? This audaciously bold study combines the psychological expertise of Dr Juli Slatery, formerly of Focus on the Family, along with moving stories from trusted Bible teacher and best-selling author Linda Dillow. The groups who have already done this

study have seen their marriages come alive, whether they've been married four months or forty years; be next!

Vacation Rambles and Thoughts The Book of the Thousand Nights and a Night Captain Sir Richard Francis Burton KCMG FRGS (1821-1890) was an English explorer, translator, writer, soldier, orientalist, ethnologist, linguist, poet, hypnotist, fencer and diplomat. He was known for his travels and explorations within Asia and Africa as well as his extraordinary knowledge of languages and cultures. According to one count, he spoke 29 European, Asian, and African languages. He was a captain in the army of the East India Company serving in India. Following this he was engaged by the Royal Geographical Society to explore the east coast of Africa and led an expedition guided by the locals which discovered Lake Tanganyika. His best-known achievements include travelling in disguise to Mecca, making an unexpurgated translation of The Book of One Thousand Nights and a Night. Burton was considered a controversial figure in his day; many considered him a hero, others jealous of his achievements called him a scoundrel. Burton remains possibly the greatest explorer ever because of his remarkable research and uncensored documentation of the lifestyles of the various cultures he encountered in his adventures. Bringing a unique joint practitioner and academic perspective to the topic, this is the only available text on private equity truly international in focus. Examples are drawn from Europe the Middle East, Africa and America with major case studies from a wide range of business sectors, from the prestigious collection of the London Business School's Collier Institute of Private Equity. Much more than a simple case book, however, International Private Equity provides a valuable overview of the private equity industry and uses the studies to exemplify all stages of the deal process, and to illustrate such key topics as investing in emerging markets; each chapter guides the reader with an authoritative narrative on the topic treated. Covering all the main aspects of the private equity model, the book includes treatment of fund raising, fund structuring, fund performance measurement, private equity valuation, due diligence, modeling of leveraged buyout transactions, and harvesting of private equity investments.

?Since the introduction of coronary angiography, a key technique in understanding coronary artery disease, a number of paradigms regarding its study and interpretation have taken place. Following an emphasis on improved angiographic and subsequent intracoronary imaging techniques, functional assessment of coronary circulation has demonstrated to have major implications for diagnosis and treatment of coronary artery disease. Fractional flow reserve, a pressure derived index of stenosis severity, constitutes the best example of the current importance of physiological assessment in clinical practice. However, the acceptance of FFR by cardiologists contrasts with important voids in knowledge on the basic principles of coronary physiology and of other available techniques that, as an alternative to FFR, allow a more comprehensive assessment of coronary circulation. This is particularly noticeable in the assessment of microcirculation, an unavoidable compartment of coronary circulation that is frequently affected in acute coronary syndromes of in the presence of cardiovascular risk factors or non-coronary heart disease. A deeper understanding of the relationship between epicardial vessel and microcirculatory involvement has started with the advent of newer imaging techniques like invasive optical coherence tomography, and non-invasive CT and NMR techniques. This book aims to be an indispensable tool for clinicians and researchers in the field of coronary artery disease. It provides a balanced, comprehensive review of anatomy, physiology and available techniques, discusses both the diagnosis of epicardial vessel and microcirculatory disease, the impact of different diseases at different levels of coronary circulation, and the best way to address a separate or combined assessment of different levels of coronary circulation. ?

The principles of the First Edition--to teach students and engineers the fundamentals of electrical transients and equip them with the skills to recognize and solve transient problems in power networks and components--also guide this Second Edition. While the text continues to stress the physical aspects of the phenomena involved in these problems, it also broadens and updates the computational treatment of transients. Necessarily, two new chapters address the subject of modeling and models for most types of equipment are discussed. The adequacy of the models, their validation and the relationship between model and the physical entity it represents are also examined. There are now chapters devoted entirely to isolation coordination and protection, reflecting the revolution that metal oxide surge arresters have caused in the power industry. Features additional and more complete illustrative material--figures, diagrams and worked examples. An entirely new chapter of case studies demonstrates modeling and computational techniques as they have been applied by engineers to specific problems.

When a member of the Police Scotland team fails to clock-in for work, concern for her whereabouts is immediate... and the discovery of her burnt-out car in remote woodland to the south of Edinburgh sets off a

desperate search for the missing woman. Meanwhile, DCI Tony McLean and the team are preparing for a major anti-corruption operation - one which may raise the ire of more than a few powerful people in the city. Is Anya Renfrew's disappearance a co-incidence or related to the case? McLean's investigations suggest that perhaps that Anya isn't the first woman to have mysteriously vanished in these ancient hills. Once again, McLean can't shake the feeling that there is a far greater evil at work here...
