The Axzo Press Lotus Notes 7 FastCARD is the perfect tool to get you using the basic tools of Lotus' integrated desktop client for accessing e-mail, calendars, and applications on a Domino server. This quick start guide shows you how to navigate the Notes 7 interface and access the tools you need to complete common tasks, such as working with email, creating calendar entries, scheduling meetings,

and managing contacts. It also provides you with skills for using the unique Web browsing and collaborative features of Notes. There's even a section with answers to the most frequently asked questions by new Notes 7 users. Need a Custom Solution? All of our quick reference guides can be branded or customized to meet your organization's needs. We can add your logo, corporate colors, help desk information or tailor the content to meet your requirements. The process is simple and easy. Contact your Account Executive to get started. Minimum order 1000 guides.

The Consumer Action Handbook
American Library Association
The Generalized LR parsing algorithm (some call it "Tomita's algorithm") was originally developed in 1985 as a part of my Ph.D thesis at Carnegie Mellon University. When I was a graduate student at CMU, I tried to build a couple of natural language systems based on existing parsing methods. Their parsing speed, however, always bothered me. I sometimes wondered whether it was ever possible to build a natural language parser that could parse reasonably long sentences in a reasonable time without help from large mainframe machines. At the same time, I was always amazed by the speed of programming language compilers, because they can parse very long sentences (i.e., programs) very quickly even on workstations. There are two reasons. First, programming languages are considerably simpler than natural languages. And secondly, they have very efficient parsing methods, most notably LR. The LR parsing algorithm first precompiles a grammar into an LR parsing table, and at the actual parsing time, it performs shift-reduce parsing guided deterministically by the parsing table. So, the key to the LR efficiency is the grammar precompilation; something that had never been tried for natural

languages in 1985. Of course, there was a good reason why LR had never been applied for natural languages; it was simply impossible. If your context-free grammar is sufficiently more complex than programming languages, its LR parsing table will have multiple actions, and deterministic parsing will be no longer possible.

Library Catalogue: Author catalogue M-Nuo Vervante THE HARD DRIVE BIBLE, EIGHTH EDITION is the definitive reference book for anyone who deals with personal computer data storage devices of any kind. This comprehensive work covers installations, drive parameters, & set up information for thousands of Hard Disk, Optical, DAT Tape, & CD-ROM Drives. A concise history of data storage devices is followed by the most expansive compilation of technical data offered to the public today. Specifications, drawings, charts & photos cover jumper settings, cabling, partitioning & formatting of disk drives. SCSI commands & protocols are addressed, in addition to chapters revealing the intricacies of different interface standards & common troubleshooting procedures. THE HARD DRIVE BIBLE contains the answers to anyone's questions concerning the purchase, installation & use of modern digital data storage devices. The difficulties caused by compatibility mismatches are addressed & solutions are offered. Also featured are controller card information & performance ratings, as well as valuable tips on increasing drive performance & reliability through

software. THE HARD DRIVE BIBLE is published by Corporate Systems Center, one of the leaders in the digital storage device field. A CD-ROM included with the book carries CSC's drive performance test software & formatting tools, as well as thousands of drive parameters, specifications, & technical drawings. To order contact: Corporate Systems Center, 1294 Hammerwood Avenue, Sunnyvale, CA 94089, 408-743-8787.

Oligonucleotides and Analogues Circuit Cellar
Focuses on the economic theory that is relevant to business decision making, examines business practice in the light of this theory and gives recent examples of business practice. This edition features "empirical cases" which require the student to analyze business situations using real data.

Over one third of the world's imports and exports are channelled through the EG. The Community represents the The alphabetical index in Volume 1 to companies within each world's largest integrated market.

Ask Byte McGraw Hill Professional Economic development is a priority for all nation-states, whether developing or developed. In recent times, a few among the developing nations – often referred to as the emerging economies – have attracted the world's attention because of their fast pace of economic growth. While the similarities among

these nations (for example the BRICS) in the pattern of their economic growth are highlighted and discussed, the differences are often glossed over. This book, therefore, attempts to present the diverse ways in which entrepreneurship is facilitated in emerging economies, through a compilation of research papers from six different countries (India, China, Singapore, Hong Kong, Nigeria and New Zealand) belonging to the class of emerging economies. The papers included in this book cover a variety of topics related to the creation and management of an entrepreneurial ecosystem, such as intercultural interactions, IPR issues, government policies for SMEs, social entrepreneurship, opportunity identification, green entrepreneurship, employee entrepreneurship, symbiotic ventures and social capital, social fluidity mapping for reducing failure stigma, green awareness in the corporate world and among entrepreneurs, venture capital for growth, immigrant entrepreneurs, entrepreneurial success and life satisfaction, among others. The contributions are supported by an

introductory chapter that provides an integrative framework by unifying the diverse patterns of economic development in the different countries under various institutional inadequacies as a process of " muddling-through to development" , necessitated by the non-systematic development of the ecosystem for new venture creation. This book is indeed a must-read for those interested in understanding the process of entrepreneurship and economic development in emerging economies.

(EDMS) Pearson Education India
Set in Afghanistan's capital city of Kabul, this extraordinary novel "puts a human face on the suffering inflicted by the Taliban" (San Francisco Chronicle), taking readers into the seemingly divergent lives of two couples—and depicting with compassion and exquisite details the mentality of Islamic fundamentalists and the complexities of the Muslim world. Mohsen comes from a family of wealthy shopkeepers whom the Taliban has destroyed; Zunaira, his wife, exceedingly beautiful, was once a brilliant teacher and is now no longer allowed to leave her home without an escort or covering her face. Intersecting their world is Atiq, a prison keeper, a man who has sincerely adopted the Taliban ideology and struggles to keep his faith, and his wife,

Musarrat, who once rescued Atiq and is now dying of sickness and despair. Desperate, exhausted Mohsen wanders through Kabul when he is surrounded by a crowd about to stone an adulterous woman. Numbed by the hysterical atmosphere and drawn into their rage, he too throws stones at the face of the condemned woman buried up to her waist. With this gesture the lives of all four protagonists move toward their destinies. Yasmina Khadra brings readers into the hot, dusty streets of Kabul and offers them an unflinching but compassionate insight into a society that violence and hypocrisy have brought to the edge of despair. <u>Ringing Ballads, Including Curfew Must Not Ring To-night</u>
Springer Science & Business Media
How contemporary photographers from Hank Willis Thomas to Libita Clayton have subverted the constructions and complicities of whiteness From the advent of early colonial photography in the 19th century to contemporary "white savior" social-media images, photography continues to play an integral role in the maintenance of white

sovereignty. As various scholars have shown, the technology of the camera is not innocent, and neither are the images it produces. The invention and continuation of the "white race" is not just a political, social and legal phenomenon; it is also a complexly visual one. What does whiteness look like, and how might we begin to trace an antiracist history of artistic resistance that works against it? The Image of Whitenessseeks to introduce its reader to some important extracts from the troubling story of whiteness, to describe its falsehoods, its paradoxes and its oppressive nature, and

to highlight some of the crucial work photographic artists have done to subvert and critique its image. The Image of Whitenessincludes the work of artists Abdul Abdullah, Agata Madejska, Broomberg & Chanarin, Buck Ellison, John Lucas & Claudia Rankine, David Birkin, Hank Willis Thomas, Kajal Nisha Patel, Michelle Dizon & Viet Le, Nancy Burson, Nate Lewis, Libita Clayton, Paul Mpagi Sepuya, Richard Misrach, Sophie Gabrielle, Stacy Kranitz and Stanley Wolukau-Wanambwa.

Calendar pads and stands IBM.Com/Redbooks The ABCs of z/OS System Programming is an eleven volume collection that provides an introduction to the z/OS operating system and the hardware architecture. Whether you are a beginner or an experienced system programmer, the ABCs collection provides the information that you need to start your research into z/OS and related subjects. If you would like to become more familiar with z/OS in your current environment, or if you are evaluating platforms to consolidate your e-business applications, the ABCs collection will serve as a powerful technical tool. This IBM Redbooks publication describes the functions of the Infoprint Server. It will help you install, tailor, configure, and use the z/OS Version 1 Release 7 version of Infoprint Server. Topics covered in this volume are the following: Infoprint Server UNIX System Services overview Infoprint Server customization Print

Interface IP PrintWay NetSpool Infoprint Central User interfaces to Infoprint Server The contents of the volumes are as follows: Volume 1: Introduction to z/OS and storage concepts, TSO/E, ISPF, JCL, SDSF, and z/OS delivery and installation Volume 2: z/OS implementation and daily maintenance, defining subsystems, JES2 and JES3, LPA, LNKLST, authorized libraries, SMP/E, Language Environment Volume 3: Introduction to DFSMS, data set basics storage management hardware and software, catalogs, and DFSMStvs Volume 4: Communication Server, TCP/IP, and VTAM Volume 5: Base and Parallel Sysplex, System Logger, Resource Recovery Services (RRS), global resource serialization (GRS), z/OS system operations, automatic restart management (ARM), Geographically Dispersed Parallel Sysplex (GDPS) Volume 6: Introduction to security, RACF, Digital certificates and PKI, Kerberos, cryptography, zSeries firewall technologies, LDAP, and Enterprise identity mapping (EIM) Volume 7: Printing in a z/OS environment, Infoprint Server and Infoprint Central Volume 8: An introduction to z/OS problem diagnosis Volume 9: z/OS UNIX System Services Volume 10: Introduction to z/Architecture, zSeries processor design, zSeries connectivity, LPAR concepts, HCD, and HMC Volume 11: Capacity planning, performance management, WLM, RMF, and SMF

This book represents the eighth edition of what has become an established reference work, MAJOR COMPANIES OF THE Guide to the FAR EAST & AUSTRALASIA. This volume has been carefully researched and updated since publication of the previous arrangement of the book edition, and provides more company data on the most important companies in the region. The information in the This book has been arranged in order to allow the reader to book was submitted mostly by the companies themselves, find any entry rapidly and accurately. completely free of charge. For the second time, a third volume has been added to the series, covering major companies in Company entries are listed alphabetically within each section; Australia and New Zealand. in addition three indexes are provided on coloured paper at the back of the book. The companies listed have been selected on the

grounds of the size of their sales volume or balance sheet or their The alphabetical index to companies throughout Australia & importance to the business environment of the country in New Zealand lists all companies having entries in the book which they are based. irrespective of their main country of operation. The book is updated and published every year. Any company The alphabetical index to companies within Australia & New that considers it is eligible for inclusion in the next edition of Zealand lists companies by their country of operation. **Content Manager**

OnDemand Backup, Recovery, and High Availability Spbh Editions A collection of narrative and ballad-style poems by Rose Hartwick Thorpe, including her most famous work, the Civil War-era ballad 'Curfew Must Not Ring To-Night'. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and

thank you for being an important part of keeping this knowledge alive and relevant.

History in the House Pearson College Division Interest in oligonucleotide synthesis has expanded dramatically since the publication of M. Gait's book in this series in 1984. The process has been automated, new reagents have been developed, and the range of uses for the compounds produced has increased and continues to grow. This volume provides practical guidance on oligonucleotide synthesis and methods for introducing modifications into these molecules. State- of-the-art techniques for automated synthesis are covered in two chapters on the production of oligodeoxynucleotides and oligoribonucleotides. Synthesis of modified oligodeoxynucleotides is also detailed, including modification of the phosphate backbone to produce phosphorothioates, phosphorodithiolates and methyl phosphonates, all of which are of considerable importance due to thier potential therapeutic applications. Other chapters decsribe production of sugar-modified ilgodeoxynucleotides and the attachment of various reported groups; these techniques are useful to those interested in non-radioactive probes for hybridization and for the study of DNA-DNA and DNA protein interactions. This book will be of interest to academic and

industrial researchers, enabling both chemists and non-chemists to synthesize oligonucleotides and analogues for a wide variety of experimental purposes.

IEEE Membership Directory Springer Science & Business Media This IBM Redbooks publication helps you understand backup, recovery, high availability, business continuity strategies, and options available for IBM DB2 Content Manager OnDemand. We begin with an introduction of the basic concepts of backup and recovery, high availability, disaster recovery, and business continuity. We also provide an overview of IBM DB2 Content Manager OnDemand. Because OnDemand is available on multiplatforms, iSeries, and z/OS, we address each platform separately, and discuss the backup and recovery strategies and options for each platform. In addition, we discuss various high availability and business continuity strategies and options. When applicable, we provide practical procedures and steps to accomplish backup, recovery, and high availability with sample commands and scripts. In some instances, case studies are presented to show you how real-world businesses implement backup procedures, high availability configurations, and disaster recovery plans. This book is intended for IT architects, IT specialists, and OnDemand system administrators who are responsible for designing, implementing, and maintaining OnDemand systems for various platforms.
