Advanced Web Services Springer Science & Business Media

Web services and Service-Oriented Computing (SOC) have become thriving areas of academic research, joint university/industry research projects, and novel IT products on the market. SOC is the computing paradigm that uses Web services as building blocks for the engineering of composite, distributed applications out of the reusable application logic encapsulated by Web services. Web services could be considered

the best-known and most standardized technology in use today for distributed computing over the Internet. This book is the second installment of a two-book collection covering the state-of-the-art of both theoretical and practical aspects of Web services and SOC research and deployments. *Advanced Web Services* specifically focuses on advanced topics of Web services and SOC and covers topics including Web services transactions, security and trust, Web service management, real-world case studies, and novel perspectives and future directions. The editors present foundational topics in the first book of the collection, *Web Services Foundations* (Springer, 2013). Together, both books comprise approximately 1400 pages and are the result of an enormous community effort that involved more than 100 authors, comprising the world's leading experts in this field.

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

This book provides an overview on the molecular mode of action of carcinogenic polycyclic aromatic hydrocarbons (PAHs). PAHs are by-products arising from incomplete combustion of organic matter that are frequently released into our environment, and thus are ubiquitously detectable. Many PAHs are strong carcinogens in rodent bioassays and have been linked to increased incidences of various types of cancer in humans. The present book covers all aspects of PAH-induced carcinogenesis; it is a collection of articles

written by some of the most recognizable PAH researchers, reviewing the present knowledge in this field. The topics include: exposure to and biomonitoring of PAHs in the human population; metabolic activation of PAHs; genotoxicity and repair of PAH-induced DNA damage; and factors modulating individual susceptibility to the deleterious effects of PAHs.

Contents: Polycyclic Aromatic Hydrocarbon-Induced Carcinogenesis — An Introduction (A Luch) Metabolic Activation and Detoxification of Polycyclic Aromatic Hydrocarbons (A Luch & W M Baird) Biomonitoring of Polycyclic Aromatic Hydrocarbons — Human Exposure (A Seidel) Macromolecular Adducts as Biomarkers of Human Exposure to Polycyclic Aromatic Hydrocarbons (D H Phillips) DNA Damage and Mutagenesis Induced by Polycyclic Aromatic Hydrocarbons (A Besaratinia & G P Pfeifer) Mechanisms of Repair of Polycyclic Aromatic Hydrocarbon-Induced DNA Damage (H Naegeli & N E Geacintov) Aberrant Gene Expression and Cell Signalling/Epigenetic Effects Induced by Polycyclic Aromatic Hydrocarbons (P Steinberg) Indicator Assays for Polycyclic Aromatic Hydrocarbon-Induced Genotoxicity (H Glatt) Tumorigenicity of Polycyclic Aromatic Hydrocarbons (S Amin & K El-Bayoumy) Genetic Susceptibility to Polycyclic Aromatic Hydrocarbon-Induced Carcinogenesis (A Hirvonen) Polycyclic Aromatic Hydrocarbon-Induced Carcinogenesis — An Integrated View (A Luch) Readership: Graduate students, academics and researchers in toxicology, biochemistry, oncology and the life sciences.

Mastering the Nikon D810 by Darrell Young provides a wealth of experience-based information and insights for owners of the new D810 camera. Darrell is determined to help the user navigate past the confusion that often comes with complex and powerful professional camera equipment. This book explores the features and capabilities of the camera in a way that far surpasses the user's manual. It guides readers through the camera features with step-by-step setting adjustments; color illustrations; and detailed how, when, and why explanations for each option. Every button, dial, switch, and menu configuration setting is explored in a user-friendly manner, with suggestions for setup according to various shooting styles. Darrell's friendly and informative writing style allows readers to easily follow directions, while feeling as if a friend dropped in to share his knowledge. The information in this book goes beyond the camera itself and also covers basic photography technique.

A new approach to theory development for practice-driven research, proposing that theory is something made in and through design. Tendencies toward “academization” of traditionally practice-based fields have forced design to articulate itself as an academic discipline, in theoretical terms. In this book, Johan Redström offers a new approach to theory development in design research—one that is driven by practice, experimentation, and making. Redström does not theorize from the outside, but explores the idea that, just

as design research engages in the making of many different kinds of things, theory might well be one of those things it is making. Redström proposes that we consider theory not as stable and constant but as something unfolding—something acted as much as articulated, inherently fluid and transitional. Redström describes three ways in which theory, in particular formulating basic definitions, is made through design: the use of combinations of fluid terms to articulate issues; the definition of more complex concepts through practice; and combining sets of definitions made through design into “programs.” These are the building blocks for creating conceptual structures to support design. Design seems to thrive on the complexities arising from dichotomies: form and function, freedom and method, art and science. With his idea of transitional theory, Redström departs from the traditional academic imperative to pick a side—theory or practice, art or science. Doing so, he opens up something like a design space for theory development within design research.

Sharing our stories, who we are, what we love, how we feel, why we fear, connects us to one another. Weaving moments of grace with spiritual practices that have grounded her through life's challenges, Laurie Blefeld

invites the reader into her sacramental stories. You will find yourself in Laurie's stories and reclaim bits and pieces of your own. "Our days are a stream of moments - some devastating, some down to earth and some filled with ineffable meaning. Laurie Blefeld has written a book full of tender moments that warm the heart and remind us to be grateful for and conscious of how laced with grace our lives really are. This is a book to enjoy and treasure."-Gunilla Norris, author of *Sheltered in the Heart and Companions on the Way: A Little Book of Heart-full Practices* "Laurie's transformational stories, told in her authentic and lyrical voice, are evocative of the highs and lows in everyone's life. Laurie's generous prose connects us to her family's living history - and through it to our own. She is a natural spiritual teacher. Moments of Grace is luminous, warm, comforting and filled with such good practices."- Dr. Joan Borysenko, from the Foreword

Pro DNS and BIND 10 guides you through the challenging array of features surrounding DNS with a special focus on the latest release of BIND, the world's most popular DNS implementation. This book unravels the mysteries of DNS, offering insight into origins, evolution, and key concepts like domain names and zone files. This book focuses on running DNS systems based on BIND 10, the first stable release that includes support for the latest DNSSEC standards. Whether you administer a DNS system, are thinking about running one, or you simply want to understand the DNS system, then this book for you. Pro DNS and BIND 10 starts with simple concepts, then moves on to full security-aware DNSSEC configurations. Various features, parameters, and Resource Records are described and illustrated with examples. The book contains a complete reference to zone files, resource records, and BIND's configuration file parameters.

You can treat the book as a simple paint-by-numbers guide to everything from a simple caching DNS to the most complex secure DNS (DNSSEC) implementation. Background information is included for when you need to know what to do and why you have to do it, and so that you can modify processes to meet your unique needs.

The first complete account in English of the evolution of 'pataphysics from its French origins, with explications of key ideas and excerpts from primary sources, presented in reverse chronological order. Of all the French cultural exports over the last 150 years or so, 'pataphysics—the science of imaginary solutions and the laws

governing exceptions—has proven to be one of the most durable. Originating in the wild imagination of French poet and playwright Alfred Jarry and his schoolmates, resisting clear definition, purposefully useless, and almost impossible to understand, 'pataphysics nevertheless lies around the roots of Absurdism, Dada, futurism, surrealism, situationism, and other key cultural developments of the twentieth century. In this account of the evolution and influence of 'pataphysics, Andrew Hugill offers an informed exposition of a rich and difficult territory, staying aloft on a tightrope stretched between the twin dangers of oversimplifying a serious subject and taking a joke too seriously. Drawing on more than twenty-five years' research, Hugill maps the 'pataphysical presence (partly conscious and acknowledged but largely unconscious and unacknowledged) in literature, theater, music, the visual arts, and the culture at large, and even detects 'pataphysical influence in the social sciences and the sciences. He offers many substantial excerpts (in English translation) from primary sources, intercalated with a thorough explication of key themes and events of 'pataphysical history. In a Jarryesque touch, he provides these in reverse chronological order, beginning with a survey of 'pataphysics in the digital age and working backward to Jarry and beyond. He looks specifically at the work of Jean Baudrillard, Georges Perec, Italo Calvino, J. G. Ballard, Asger Jorn, Gilles Deleuze, Roger Shattuck, Jacques Prévert, Antonin Artaud, René Clair, the Marx Brothers, Joan Miró, Max Ernst, Marcel Duchamp, James Joyce, Flann O'Brien, Raymond Roussel, Jean-Pierre Brisset, and many others.

This new volume in the Encyclopaedia of Sports Medicine series, published under the auspices of the International Olympic Committee, provides a state-of-the-art account of the epidemiology of injury across a broad spectrum of Olympic sports. The book uses the public health model in

describing the scope of the injury problem, the associated risk factors, and in evaluating the current research on injury prevention strategies described in the literature. *Epidemiology of Injury in Olympic Sports* comprehensively covers what is known about the distribution and determinants of injury and injury rates in each sport. The editors and contributors have taken an evidence-based approach and adopted a uniform methodology to assess the data available. Each chapter is illustrated with tables which make it easy to examine injury factors between studies within a sport and between sports. With contributions from internationally renowned experts, this is an invaluable reference book for medical doctors, physical therapists and athletic trainers who serve athletes and sports teams, and for sports medicine scientists and healthcare professionals who are interested in the epidemiological study of injury in sports.
