The XPAG, 'A' and 'B' series engines used this system, until BMC fitted neoprene sprung lip-seals in the early 1960's. Morris were also clever with their pre-war sv units, putting a 'cover' on the top similar to a rocker cover, but was in fact a air silencer/fume collector for the carburetters.

Morris Engines The X Series - MGTD

XPAG Engine For Sale 1 Jan Ron Ward is a time-served toolmaker at Standard Motor Company and has spent his working life in the machine tool industry worldwide. He has owned a much modified '47 TC (90BHP un-supercharged) for 30 years and a 1963 Mini Cooper S 'look alike' (100BHP) for 40 years.

1954-1955 MG XPEG Engine | HowStuffWorks

"There are TF1500s that have had their XPAG engine replaced with an 1250 XPEG". A TF1500 would/should have a XPEG (1466cc) engine. TD's as well as some TF's would have a XPAG (1250cc) engine. Because the TF was first built with a 1250 it was simply called a TF. Later in production the XPEG engine was introduced and was then badged as a TF1500.

MG T-type - Wikipedia

The XPAG has a bad name for being a pig to prime once fitted in the car. Early engines like mine have no priming plug on the oil pump either. We will be doing this winding-priming bit with the engine installed later to get oil up into the main oil gallery, but as I ' m not fitting my filter until the engine is in situ (to give me more maneuvering room with the block) it will have to wait.

That, in turn, led to the engine you see here, the XPAG. It was derived from the OHV engine used in the new-for-1938 Morris Ten sedan, displacing 1,250cc, albeit with a shorter 90mm stroke. This was the heart of the new MG TB, of which only 379 were assembled before the hostilities commenced.

Peter Edney

The XPAG engine is well known for its tunability. The TC engine was a slightly improved version of the XPAG first introduced to MG in the TB. Notable improvement was through the

addition of a hydraulically (oil pressure) adjusted timing chain tensioner. All TCs utilized a (single battery) 12 volt electrical system.

Xpag Engine

The XPAG engine was not designed on a clean sheet of paper. Morris had modified their 1930 's Morris Ten/4 side-valve engine into an over-head-valve engine. You can see this by the huge sheet steel pressing that covers the cam-followers and pushrods, this was where access was gained to adjust the tappets on the sv engine.

The XPAG engine as found in quite a number of M.G. cars from 1938 to 1955 shares much with the family of Morris engines it grew from. For those unaware of the engines parentage, the designation XPAG can be read as Morris 'X' Series engine, (known as the short-stroke Morris Ten engine) the P standing for push-rod unit,

A large number of cars with XPAG or XPEG engines have had Morris Motors or BMC (Gold Seal) replacement engines fitted. These usually did not have an XPAG number on an octagonal plate, but instead a letter prefix (A, B, C, E, G & RS have been seen) followed by a larger than usual number (E99794 has been seen) on a square 'replacement engine' plate.
