New Century Senior Physics meets the global objectives of

the 2007 Queensland Senior Physics syllabus in terms of Knowledge and Conceptual Understanding, Scientific Investigation and Evaluating and Concluding. All 10 key concepts of the syllabus have been developed in varied contexts along with an extensive range of mandatory and elective key ideas. Key Features: A contextual approach throughout--each chapter begins with questions, problems or situations that experienced teachers have found to spark students' interest. A familiar format allowing students to quickly find information, whatever the context they may be studying. Teachers can develop contexts of their own choosing without restriction to a narrow set of pre-chosen contexts. An easy to follow progression through focus questions to the underlying key concepts and ideas. Many and varied contextualised questions, problems and puzzles, including traditional closed-response questions as well as open-ended and stimulus-response questions - all essential for understanding. 'Novel Challenge' questions - drawn from unfamiliar situations and designed to develop the higher order thinking (HOT) skills. End-of-chapter review questions - ranging from simpler practice questions requiring straightforward use of principles and problem-solving (one and two star difficulty) to more challenging extension questions (three stars) requiring HOT skills. A focus on the tentative nature of scientific knowledge where throughout history accidents and serendipity have gone hand-in-hand with scientific investigation. An open, 'chatty' writing style that speaks directly to students but with sufficient depth to cover information they will need for tertiary studies in science and other physics-related areas such as engineering, medical science, computing, human movement etc. Gender-balanced contexts using material drawn from boys' and girls' spheres of experience. A video-coded stimulus

ideas for experimental and non-experimental investigations suggested by physics teachers throughout the state. Visit the authors' Web Page containing on-line worked solutions to the end-of-chapter extension (challenging, complex, novel) questions and the Novel Challenge text-box questions, suggestions for Extended Experimental Investigations and hints to students who are about to undertake them, as well as a host of other resource material useful in developing a school work program. Meet Jay.
Summer. And Dylan. Jay plays guitar, writes songs and dreams of being a rock star. But his ambitions are stifled by seven siblings and a terrible drummer. Summer works hard at school, looks after her nan and has a one-in-a-million singing voice. But can her talent triumph over her nerves? Dylan is happiest lying on his bunk smoking, but his school rugby coach has other ideas, and Dylan reluctantly joins a

band to avoid crunching tackles and icy mud. They're about to enter the biggest battle of their lives. And there's everything to play for. A spectacular start to the new series from Robert Muchamore, bestselling author of *CHERUB* - read on with *Rock War: The Audition*, a story especially written for World Book Day.

Publishers

The new edition of a textbook introducing the fundamental concepts and methods of macroeconomics. Blending economic theory, institutional material, and real-world applications, the authors discuss measuring national output and income, the affects of government and fiscal policy, money supply and the Federal Reserve system, and other issues of national macroeconomics. There is also a shorter section devoted to international issues, discussing comparative advantage and protectionism, balance of payments and exchange rates, and the economics of

developing and transitional economies. The CD-ROM contains tutorial walk-throughs for each chapter summarizing key concepts, as well as end-of-chapter quizzes and 20 graphs related material in the text. Annotation copyrighted by Book News, Inc., Portland, OR.
