Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

Lubricants and Lubrication, 2 Volume Set Springer

Enacting History is a collection of new essays exploring

the world of historical performances. The volume focuses on performances outside the traditional sphere of theatre, among them living history museums, battle reenactments, pageants, renaissance festivals, and adventure-tourism destinations. This volume argues that the recent surge in such performances have raised significant questions about the need for, interest in, and value of such nontraditional theater. Many of these performances claim a greater or lesser degree of historical "accuracy" or "authenticity," and the authors tease out the representational and historiographic issues related to these arguments. How, for instance, are issues of race, ethnicity, and gender dealt with at museums that purport to be accurate windows into the past? How are politics and labor issues handled in local- or state-funded institutions that rely on volunteer performers? How do tourists' expectations shape the choices made by would-be purveyors of the past? Where do matters of taste or censorship enter in when reconciling the archival evidence with a family-friendly mission? Essays in the collection address, among other subjects, reenactments of period cookery and cuisine at a Maryland renaissance festival; the roles of women as represented at Minnesota's premiere living history museum, Historic Fort Snelling; and the Lewis and Clark bicentennial play as cultural commemoration. The editors argue that historical performances like these-regardless of their truth-telling claims-are an important means to communicate, document, and even shape history, and allow for a level of participation and accessibility that is unique to performance. Enacting History is an entertaining and informative account of the public's fascination with acting out and watching history and of the diverse methods of fulfilling this need.
