Good Morning, Dearie Abrams

The Khmer Rouge held power in Cambodia from 1975 to 1979 and aggressively pursued a policy of radical social reform that resulted in the deaths of hundreds of thousands of Cambodians through mass executions and physical privation. In January 1979, the government was overthrown by former Khmer Rouge functionaries, with substantial backing from the army of Vietnam. In August of that year a special court, the People's Revolutionary Tribunal, was constituted to try two of the Khmer Rouge government's most powerful leaders, Pol Pot and Ieng Sary. The charge against them was genocide as it was defined in the United Nation's genocide convention of 1948. At the time, both men were in the Cambodian jungle leading the Khmer Rouge in a struggle to regain power; they were, therefore, tried in absentia. Genocide in Cambodia assembles documents from this historic trial and contains extensive reports from the People's Revolutionary Tribunal. The book opens with essays that discuss the nature of the primary documents, and places the trial in its historical, legal, and political context. The documents are divided into three parts: those relating to the establishment of the tribunal; those used as evidence, including statements of witnesses, investigative reports of mass grave sites, expert opinions on the social and cultural impact of the actions of Pol Pot and Ieng Sary, and accounts from the foreign press; and finally the record of the trial, beginning with the prosecutor's indictment and ending with the concluding speeches by the attorneys for the defense and prosecution. The trial of Pol Pot and Ieng Sary was the world's first genocide trial based on United Nations's policy as well as the first trial of a head of government on a human rights-related charge. This documentary record is significant for the history of Cambodia, and it will be of the highest importance as well to the international legal and human rights communities.

This book brings together a range of perspectives on the governance of surrogacy in Canada. It offers insight into how to address the challenges of regulating, and how to (re)think the governance of surrogacy in ways that address the health, well-being, and autonomy of surrogates. It also provides long-awaited data about how surrogacy is occurring.

Brothers in Blood

Ever since she escaped the city within the Wall, Lark Ainsley's wanted one thing: to find her brother Basil. She's always believed he would be the one to put an end to the constant fear and flight. And now, hidden underground in the chaotically magical city of Lethe, Lark feels closer to him than ever. But Lethe is a city cowering in fear of its founder, the mysterious Prometheus, and

of his private police force. To get the truth about Basil, Lark has no choice but to face Prometheus. Facing her fears has become second nature to Lark. Facing the truth is another matter. Lark never asked to be anyone's savior. She certainly never wanted to be anyone's weapon. She might not have a choice.

Pota-Toes

A practical, clinically-oriented handbook of iron overload disorders giving a compact guide to normal iron metabolism, iron-related pathobiology, and the diagnosis and management of heritable and acquired iron overload disorders. Many of these disorders were discovered and characterized only in the last decade, and are unmentioned or inadequately described in most texts. Written by clinicians for clinicians, this handbook summarizes information on diverse iron overload conditions, including their history, signs, symptoms, physical examination findings, genetics, genotype-phenotype correlations, pathophysiology, differential diagnosis and treatment. Most physicians, regardless of specialty, encounter patients with systemic or organ-specific iron overload conditions. This book contains essential information for practising adult and pediatric medical specialists in the fields of hematology, gastroenterology, hepatology, rheumatology, endocrinology, diabetology, neurology, oncology, dermatology and internal medicine. Pathologists, pharmacologists, geneticists, genetic counselors and epidemiologists will also find substantial, up-to-date sections in this handbook that are pertinent to their respective fields of interest.

The Passenger Pigeon

To be asked to prepare a second edition of a book is heartening for any author or editor. Apart from the opportunity to make the corrections and amendments which are inevitable in a practical manual there is also the possibility to make additions which enhance its usefulness. Above all a further edition usually means that the book has been found to be accept able to a large number of readers and has fulfilled a need. This is indeed the case with Offshore Medicine, which in its description of the medical aspects of offshore work has provided a unique guide to the occupational health of a new industry. The rapid development of offshore exploration for gas and oil which began in the 1960s created a whole new range of related industries. Most attention was focused on the problems of deep diving in the North Sea because of the great expansion of the diving industry, its technological advances and the high mortality of divers in the early years. Diving, however, is only a fraction of the total endeavour concerned with the offshore industry. The much larger population of workers offshore who man the rigs and barges, the toolpushers, helicopter pilots, crane drivers, scaffolders and roustabouts, geologists and so on, so sympathetically described by A. Alvarez in his recent book Off shore, A North Sea Journey, and the harsh and difficult conditions in which they often have to work are sometimes forgotten.

Flying Start to Literacy Level 22: the Sleeping Prince

Drawing on a range of European cases, this edited volume analyses the offshoring and outsourcing of foreign companies, with a focus on territorial embeddedness. The book opens by developing a theoretical framework and then presents a range of international case studies exploring the experiences of the service hub cities of Brno, Bratislava, Budapest, Krakow, and Prague. Attention is also given to internal and external determinants of embeddedness, with chapters on the employee perspective, the Fintech industry, corporate social responsibility, and the role of universities. This volume will be of interest to advanced students and researchers in regional economics, economic geography, innovation studies, industrial economics, European economics, and international business.
