treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

Audiences never have a lukewarm opinion of a Subiela film. They either love it passionately or hate it profoundly. That Eliseo Subiela (Buenos Aires, 1944-2016), an original and sensitive thinker, survived, and indeed thrived in economically challenged Argentina while garnering more accolades abroad than in his own country, is a tribute to his grit, intelligence, imagination and persistence of vision. With an astounding list of prizes and honors, he was a world-class auteur. Even when he was making a TV commercial, his surreal style and poetic sensibility were unmistakable. This book represents the culmination of 20 years of research and personal correspondence with Eliseo Subiela. Through ten scholarly studies and five interviews, it sheds light on his life, esthetics, obsessions, struggles with madness, and, of course, his films. It addresses his earlier career in advertising, lifelong artistic influences, screenwriting techniques, critical reactions to his films, and what Subiela's example has to offer aspiring filmmakers, especially those in Latin America.

Someone said recently that the only true Canadian last names are those of our aboriginal peoples. Certainly Inuit, Cree and Ojibwa names were the first heard across that land that would become Canada. (Consider pop singer Shania Twain, whose aboriginal name is Ojibwa for "on my way"). But surnames from all over the earth are Canadian too, brought here by immigrants speaking French, English, German, Italian, Gaelic, Ukrainian, Chinese, Russian, Spanish, Japanese and so on. In *WHAT'S IN A CANADIAN NAME?* you'll learn startling stories behind famous (and not so famous) Canadian names. Perhaps more importantly, Bill Casselman here gives you a bright and amusing introduction to how last names operate in many languages all over the world. For any reader interested in genealogy and surnames, this is a perfect introduction.

Al Rashid Mosque, Canada's first and one of the earliest in North America, was erected in Edmonton in the depth of the Depression of the

1930s. Over time, the story of this first mosque, which served as a magnet for more Lebanese Muslim immigrants to Edmonton, was woven into the folklore of the local community. —Baha Abu-Laban, Foreword  
Edmonton's Al Rashid Mosque has played a key role in Islam's Canadian development. The mosque continues to be a concrete expression of social good, a symbol of a proud Muslim Canadian identity. Al Rashid Mosque provides a welcome introduction to the ethics and values of homegrown Muslims. The book traces the mosque's role in education and community leadership and celebrates the numerous contributions of Muslim Canadians in Edmonton and across Canada. Al Rashid Mosque is a timely and important volume of Islamic and Canadian history. "Forty years ago, as a young scholar in Islamic Studies at the University of Alberta, Al Rashid's Muslims welcomed my queries, tolerated my ignorance, and joyfully opened their homes and their hearts." —Earle H. The new realities of airline travel came into full focus after the September 11 terrorist attacks. These horrific events escalated air rage incidents by 400%, but more importantly they put the entire airline industry under the spotlight. In subsequent years, the general public began to voice frustrations with the industry in very dramatic ways, a marked shift in consumer behavior from that of before 9/11. The International Transport Workers Federation responded with a call to action to bring about major changes to raise the airline industry to a level of service quality sufficient to meet the needs of 21st Century passengers. The quality of services that airline customers expect and the propensity toward air rage needs to be understood. Undoubtedly, some passengers are prone to air rage by factors in no way related to customer service. However, a better understanding of the customer's perception of service and airlines' offerings is one way of addressing the air rage crisis, combating the contributing factors long before they conspire to provoke a damaging incidence. Anger in the Air: Combating the Air Rage Phenomenon provides airlines with valuable input to help them better meet the service expectations of their customers and avoid instances of air rage on their flights. What do today's customers need and expect? What do airline customers perceive as the quality of services and how

can the gap be closed between expectations and perceptions? The book addresses these key issues in five stages: 1. Discussing air rage incidents that have caused us to focus not just on the rage levels that some passengers reach during flight but, more importantly, why these rage levels are happening more often worldwide. 2. Considering what we know to be problematic within airline industry culture and what is questionable; what can be redesigned and how. 3. Presenting the key information regarding the psychology of air rage as a means to identify new areas to be considered in airline attendant training programs. 4. Learning directly from airline passengers what it is that they really value from customer service. 5. Looking to the future and planning changes in the context of additional pressing issues such as security, pricing and safety.

Quantitative land remote sensing has recently advanced dramatically, particularly in China. It has been largely driven by vast governmental investment, the availability of a huge amount of Chinese satellite data, geospatial information requirements for addressing pressing environmental issues and other societal benefits. Many individuals have also fostered and made great contributions to its development, and Prof. Xiaowen Li was one of these leading figures. This book is published in memory of Prof. Li. The papers collected in this book cover topics from surface reflectance simulation, inversion algorithm and estimation of variables, to applications in optical, thermal, Lidar and microwave remote sensing. The wide range of variables include directional reflectance, chlorophyll fluorescence, aerosol optical depth, incident solar radiation, albedo, surface temperature, upward longwave radiation, leaf area index, fractional vegetation cover, forest biomass, precipitation, evapotranspiration, freeze/thaw snow cover, vegetation productivity, phenology and biodiversity indicators. They clearly reflect the current level of research in this area. This book constitutes an excellent reference suitable for upper-level undergraduate students, graduate students and professionals in remote sensing.
