An urgent examination of the world barreling toward a new Cold War. By 1990, the first Cold War was ending. The Berlin Wall had fallen and the Warsaw Pact was crumbling; following Russia's lead, cries for democracy were being embraced by young Chinese populace. The post-Cold War years were a time of immense hope and possibility. They heralded an opportunity for creative cooperation among nations, an end to ideological strife, perhaps even the beginning of a stable international order of liberal peace. But the days of optimism are over. As renowned international relations expert Michael Doyle makes hauntingly clear, we now face the devastating specter of a new Cold War, this time orbiting the trilateral axes of Russia, the United States, and China, and exacerbated by new weapons of cyber warfare and more insidious forms of propaganda. Such a conflict at this phase in our global history would have catastrophic repercussions, Doyle argues, stymieing global collaboration efforts that are key to reversing climate change, preventing the next pandemic, and securing nuclear nonproliferation. The recent, devastating invasion of Ukraine is both an example and an augur of the costs that lay in wait. However, there is hope. Putin is not Stalin, Xi is not Mao, and no autocrat is a modern Hitler. There is also an unprecedented level of shared global interest in prosperity and protecting the planet from environmental disaster. While it is unlikely that the United States, Russia, and China will ever establish a "warm peace," there are significant, reasonable compromises between nations that can lead to a *dé tentione*. While the future remains very much in doubt, the elegant set of accords and non-subversion pacts Doyle proposes in this book may very well save the world.

A searing indictment of US strategy in Afghanistan from a distinguished military leader and West Point military historian—"A remarkable book" (National Review). In 2008, Col. Gian Gentile exposed a growing rift among military intellectuals with an article titled "Misreading the Surge Threatens U.S. Army's Conventional Capabilities," that appeared in World Politics Review. While the years of US strategy in Afghanistan had been dominated by the doctrine of counterinsurgency (COIN), Gentile and a small group of dissident officers and defense analysts began to question the necessity and efficacy of COIN—essentially armed nation-building—in achieving the United States' limited core policy objective in Afghanistan: the destruction of Al Qaeda. Drawing both on the author's experiences as a combat battalion commander in the Iraq War and his research into the application of counterinsurgency in a variety of historical contexts, Wrong Turn is a brilliant summation of Gentile's views of the failures of COIN, as well as a trenchant reevaluation of US operations in Afghanistan. "Gentile is convinced that Obama's 'surge' in Afghanistan can't work. . . . And, if Afghanistan doesn't turn around soon, the Democrats . . . who have come to embrace the Petraeus-Nagl view of modern warfare . . . may find themselves wondering whether it's time to go back to the drawing board." —The New Republic

This book is about ways to understand masculinity as systemic and corporeal, structural and performative all at once. It argues that the tension between an understanding of "masculinity" in the singular and "masculinities" in the plural poses a problem that can better be understood in relation to a concomitant tension: between systems on the one hand, and bodies on the other - between abstract structures such as patriarchy, kinship or even language, and the various concrete forms taken by gendered, individuated corporeality. The contributions collected here investigate how masculinities become apparent, how they take shape and what systemic functions they have. What, they ask, are the relations between the abstract and corporeal, metaphorical and metonymic manifestations of masculinity? How are we to understand masculinity as a simultaneously systemic and corporeal, performative concept?

Ever since 1989, the Faculty of Organizational Sciences, University of Belgrade, has been the host of SymOrg, an event that promotes scientific disciplines of organizing and managing a business. Traditionally, the Symposium has been an opportunity for its participants to share and exchange both academic and practical knowledge and experience in a pleasant and creative atmosphere. This time, however, due the challenging situation regarding the COVID-19 pandemic, we have decided that all the essential activities planned for the International Symposium SymOrg 2020 should be carried out online between the 7th and the 9th of September 2020. We are very pleased that the topic of SymOrg 2020, "Business and Artificial Intelligence", attracted researchers from different institutions, both in Serbia and abroad. Why is artificial intelligence a disruptive technology? Simply because "it significantly alters the way consumers, industries, or businesses operate." According to the European Commission document titled Artificial Intelligence for Europe 2018, AI is a key disruptive technology that has just begun to reshape the world. The Government of the Republic of Serbia has also recognized the importance of AI for the further development of its economy and society and has prepared an AI Development Strategy for the period between 2020 and 2025. The first step has already been made: the Science Fund of the Republic of Serbia, after a public call, has selected and financed twelve AI projects. This year, more than 200 scholars and practitioners authored and co-authored the 94 scientific and research papers that had been accepted for publication in the Proceedings. All the contributions to the Proceedings are classified into the following 11 sections: Information Systems and Technologies in the Era of Digital Transformation Smart Business Models and Processes Entrepreneurship, Innovation and Sustainable Development Smart Environment for Marketing and Communications Digital Human Resource Management Smart E-Business Quality 4.0 and International Standards Application of Artificial Intelligence in Project Management Digital and Lean Operations Management Transformation of Financial Services Methods and Applications of Data Science in Business and Society We are very grateful to our distinguished keynote speakers: Prof. Moshe Vardi, Rice University, USA, Prof. Blaž Zupan, University of Ljubljana, Slovenia, Prof. Vladan Devedži?, University of Belgrade, Serbia, Milica ?uri?-Jovi?i?, PhD, Director, Science Fund of the Republic of Serbia, and Harri Ketamo, PhD, Founder & Chairman of HeadAI Ltd., Finland. This fourth edition of Roderic Camp's highly respected Mexican Political Biographies is an updated comprehensive biographical directory of leading state and national politicians in Mexico, covering the years 1935–2009. The original edition, published in 1976, was the first and only comprehensive

biographical work on contemporary political figures in any language and served as the prototype for the Mexican government's brief foray into its own official biographical directory. The Mexican Supreme Court has cited every biography of justices in the third edition as the basis of its biographies in the late 1980s. With updates of the existing biographies and appendices, plus almost 1,000 additional biographies, this fourth edition now features close to 3,000 entries and serves as a unique resource list of the chronological occupants of all leading national political posts. The need for such information has become even more pronounced since Mexico's political transformation from a semi-authoritarian to a democratic model. This latest edition allows readers access to information about Mexican politicians into the new century, and like its earlier versions, will be a valuable tool for government officials, journalists, historians, social scientists, the business community, and students. Finally, it includes a detailed bibliographic essay that identifies and explains the significance of biographical sources and has been enhanced by numerous up-to-date Internet sources. An added convenience is an accompanying CD that allows readers to search the biographies and appendices, enhancing the longevity, usefulness, and uniqueness of this edition.

**Pride Used to Be a Sin—Now It Is the Flag of Our Occupation.** In this shocking new book, Joy Pullmann shows how radical ideologues and sexual revolutionaries captured local schoolboards, major corporations, the Democratic Party, and the federal government. Their goals are remorselessly totalitarian. Their bureaucratic enforcers, without batting an eye, would gladly take away your job, close down your parochial school, and even separate you from your children. America is undergoing nothing less than a regime change. The country we once knew—its history, its Constitution, its Christian morality, its dedication to God-given individual rights—is under relentless attack by our own government, courts, and institutions. And lest we fail to appreciate our subjugation, every year we are forced for an entire month to bend the knee to the rainbow banner of conquest. Despite their enormous power, however, the cultural Marxists and their liberal enablers can still be beaten if Americans recognize what is at stake—before it is too late. Indeed, thousands of intrepid parents, working with conservative governors and legislators, are off to a good start. This essential book provides counterrevolutionaries with a strategy to build on those efforts. With courage, conviction, and faith, patriots can—and must—bring an end to the woke occupation of America. It's the only country we have.

When Singapore declared independence in 1965, it faced the monumental task of building a military from scratch. Aristocracy of Armed Talent tells the story of the development of the Singapore Armed Forces through a collective portrait of its leaders. This book is based on interviews with twenty-eight flag officers, offering a firsthand look at Singapore's military from the very leaders who helped shape it. It addresses the challenges Singapore faced in building its officer corps and encouraging individuals to stay and make a career out of military service. In a society where the majority Chinese population traditionally devalued military careers, and where military service was associated with foreign occupiers and colonizers, Singapore had to learn to build a culture of leadership for its armed forces. It also dispels some of the myths that have shrouded military culture in the country. As former flag officers are often recruited into senior civil service and political roles, understating the military elite culture is central to understanding Singapore's politics. This book provides a rare window on an exceptional and globally influential institution.

This book explores total information awareness empowered by social media. At the FBI Citizens Academy in February 2021, I asked the FBI about the January 6 Capitol riot organized on social media that led to the unprecedented ban of a sitting U.S. President by all major social networks. In March 2021, Facebook CEO Mark Zuckerberg, Google CEO Sundar Pichai, and Twitter CEO Jack Dorsey appeared before Congress to face criticism about their handling of misinformation and online extremism that culminated in the storming of Capitol Hill. With more than three billion monthly active users, Facebook family of apps is by far the world's largest social network. Facebook as a nation is bigger than the top three most populous countries in the world: China, India, and the United States. Social media has enabled its users to inform and misinform the public, to appease and disrupt Wall Street, to mitigate and exacerbate the COVID-19 pandemic, and to unite and divide a country. Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." He should have heeded his own words. In October 2021, former Facebook manager-turned-whistleblower Frances Haugen testified at the U.S. Senate that Facebook's products "harm children, stoke division, and weaken our democracy." This book offers discourse and practical advice on information and misinformation, cybersecurity and privacy issues, cryptocurrency and business intelligence, social media marketing and caveats, e-government and e-activism, as well as the pros and cons of total information awareness including the Edward Snowden leaks. "Highly recommended." - T. D. Richardson, Choice Magazine "A great book for social media experts." - Will M., AdWeek "Parents in particular would be well advised to make this book compulsory reading for their teenage children..." - David B. Henderson, ACM Computing Reviews
