This book is the fifth in the Cambridge Socio-Legal Group series and it concerns the evolving notions and practices of kinship in contemporary Britain and the interrelationship of kinship, law and social policy. Assembling contributions from scholars in a range of disciplines, it examines social, legal, cultural and psychological questions related to kinship. Rising rates of divorce and of alternative modes of partnership have raised questions about the care and well-being of children, while increasing longevity and mobility, together with lower birth rates and changes in our economic circumstances, have led to a reconsideration of duties and responsibilities towards the care of elderly people. In addition, globalisation trends and international flows of migrants and refugees have confronted us with alternative constructions of kinship and with the challenges of maintaining kinship ties transnationally. Finally, new developments in genetics research and the growing use of assisted reproductive technologies may raise questions about our notions of kinship and of kin rights and responsibilities. The book explores these changes from various perspectives and draws on theoretical and empirical data to describe practices of kinship in contemporary Britain.

Direct injection spark-ignition engines are becoming increasingly important, and their potential is still to be fully exploited. Increased power and torque coupled with further reductions in fuel consumption and emissions will be the clear trend for future developments. From today ' s perspective, the key technologies driving this development will be new fuel injection and combustion processes. The book presents the latest developments, illustrates and evaluates engine concepts such as downsizing and describes the requirements that have to be met by materials and operating fluids. The outlook at the end of the book discusses whether future spark-ignition engines will achieve the same level as diesel engines.

Advancements in boats, tackle, and equipment, as well as changes in the attitudes and ethics of shark fishermen, have revolutionized recreational sharking. Modern Sharking is about sustainable shark fishing, and in this book, anglers will learn the latest techniques for pursuing sharks while armed with rods, reels, and a higher level of knowledge and respect for their quarry. For more than three decades, Captain Mark Sampson stood watch over chum lines, ran shark tournaments, worked with biologists, chased IGFA records, and guided thousands of clients

to unique shark encounters. Now Captain, he shares the knowledge and experience that allowed him to guide friends and clients to 17 IGFA world records for sharks. In *Modern Sharking*, Sampson examines how to chum, rig for, bait, hook, land, clean, cook, or release 20 species of sharks you'll most likely encounter. If you want to challenge one of the strongest, fastest, most exciting creatures on planet Earth, then *Modern Sharking* is for you.
