Originally developed by James McCartney in 1996 and now an open source project, SuperCollider is a software package for the synthesis and control of audio in real time. Currently, it represents the state of the art in the field of audio programming: there is no other software available that is equally powerful, efficient or flexible. Yet, SuperCollider is often approached with suspicion or awe by novices, but why? One of the main reasons is the use of a textual user interface. Furthermore, like most software packages that deal with audio, SuperCollider prerequisites a series of skills, ranging from expertise in analog/digital signal processing, to musical composition, to computer science. However, as the beginner overcomes these initial obstacles and understands the powerful flexibility of SuperCollider, what once were seen as weaknesses become its strengths. SuperCollider's features also mean versatility in advanced software applications, generality in terms of computer modelling, and expressivity in terms of symbolic representations. This book aims at providing a brief overview of, and an introduction to, the SuperCollider programming environment. It also intends to informally present, by employing SuperCollider, a series of key notions relevant to what is broadly referred to as computer music. Andrea Valle is a researcher/aggregate professor in film, photography and television at the University of Turin-DAMS, and is active as a musician and composer. He has been a SuperCollider user since 2005.

From every " beautiful mornin ' " to " some enchanted evening, " the songs of Oscar Hammerstein II are part of our daily lives, his words part of our national fabric. Born into a theatrical dynasty headed by his grandfather and namesake, Oscar Hammerstein II breathed new life into the moribund art form of operetta by writing lyrics and libretti for such classics as *Rose-Marie* (music by Rudolf Friml), *The Desert Song* (Sigmund Romberg), *The New Moon* (Romberg) and *Song of the Flame* (George Gershwin). Hammerstein and Jerome Kern wrote eight musicals together, including *Sweet Adeline*, *Music in the Air*, and their masterpiece, *Show Boat*. The vibrant *Carmen Jones* was Hammerstein ' s all-black adaptation of the tragic opera by Georges Bizet. In 1943, Hammerstein, pioneer in the field of operetta, joined forces with Richard Rodgers, who had for the previous twenty-five years taken great strides in the field of musical comedy with his longtime writing partner, Lorenz Hart. The first Rodgers and Hammerstein work, *Oklahoma!*, merged the two styles into a completely new genre—the musical play—and simultaneously launched the most successful partnership in American musical theater. Over the next seventeen years, Rodgers and Hammerstein wrote eight more Broadway musicals: *Carousel*, *Allegro*, *South Pacific*, *The King and I*, *Me and Juliet*, *Pipe Dream*, *Flower Drum Song*, and *The Sound of Music*. They also wrote a movie musical (*State Fair*) and one for television (*Cinderella*). Collectively their works have earned dozens of awards, including Pulitzers, Tonys, Oscars, Grammys, and Emmys. Throughout his career, Hammerstein created works of lyrical beauty and universal feeling, and he continually strove—sometimes against fashion—to seek out the good and beautiful in the world. " I know the world is filled with troubles and many injustices, " he once said. " But reality is as beautiful as it is ugly . . . I just couldn ' t write anything without hope in it. " All of his lyrics are here—850, more than a quarter published for the first time—in this sixth book in the indispensable *Complete Lyrics* series that has also brought us the lyrics of Cole Porter, Lorenz Hart, Ira Gershwin, Irving Berlin, and Frank Loesser. From the young scribe ' s earliest attempts to the old master ' s final lyric— " Edelweiss " —we can see, read, and, yes, sing the words of a theatrical and lyrical genius.

Laying the foundations of a theory of ' international social closure ' this book examines how actors compete for a seat at the table in the management of international society and how that competition stratifies the international domain. In a broad historical survey from the ' Family of Civilised Nations ' , through the Great Powers ' club, to the G7 and G20 today, Naylor investigates the politics of membership in the exclusive clubs that manage international society and ensure its survival, providing us with a new way to think about how status competition has changed over time and what this means for international politics today. With its sociologically grounded theory, this book advances English School scholarship and transforms the study of contemporary summitry, providing a ground-breaking approach rooted in archival research, elite interviews, and ethnographic participant observation. This book is of interest to international relations scholars interested in the ' expansion ' and globalisation of international society, the history of international summits, and transformations in international order, as well as to those examining concepts including stratification, hierarchy, and networked governance. With its emphasis on non-state actors in global governance, scholars and practitioners alike working on/for civil society will also find this research of great value.
