One may consider that engines making torque at a lower rpm tend to work better in marine applications due to the fact that “ most ” boats

tend to plane in the range of 2,000 – 3,000 rpm. It ' not by chance that most marine engine manufacturers continue using the larger displacement – lower rpm, cast iron marine engines because of this fact.

Does anyone know why  
Yamaha doesn't publish  
their engine specs? I  
think it is pretty widely  
accepted that the 1.8 HO  
puts out around 180-190  
hp and the 1.8 SHO is  
about 210-220hp (I  
honestly wouldn't be  
surprised if it is not on  
the higher side), but has  
anybody every heard  
rumors on torque specs?
