Richard Paterson has Scotch whisky running through his veins. His grandfather and father were both prominent in the Scotch whisky industry in Glasgow for decades before Richard joined a competing whisky brokerage firm to start his apprenticeship. But this is no dry textbook on blending. Far from it. Humour, insight, history, a love of people and an abiding and evangelical passion inform every page. For the first time one of the world's foremost whisky blenders reveals how he rose through the ranks to top of his profession. He also candidly reveals some of the secrets of his craft and gives his thoughts on where he feels the industry is heading today. Lavishly illustrated in colour and black and white with black and white line artwork, this is destined to become a whisky classic and an essential item on every whisky lover's bookshelf. CONTENTS 1. Raw Spirit - The Birth of a Blender 2.

Maturation Begins 3. The Spirit of Campbeltown - Glen Scotia 4. A Blender in the Making 5. The Spirit of the Highlands - Dalmore & Fettercairn 6. The Master Blender 7. The Art of Whisky Blending 8. The Spirit of the Islands - Jura 9. Going for Gold - Fully Matured

How we experience space by listening: the concepts of aural architecture, with examples ranging from Gothic cathedrals to surround sound home theater. We experience spaces not only by seeing but also by listening. We can navigate a room in the dark, and "hear" the emptiness of a house without furniture. Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony. The unique acoustics of religious spaces acquire symbolic meaning. Social relationships are strongly influenced by the way that space changes sound. In Spaces Speak, Are You Listening?, Barry Blesser and Linda-Ruth Salter examine auditory spatial awareness: experiencing space by attentive listening. Every environment has an aural architecture. The audible attributes of physical space have always contributed to the fabric of human culture, as demonstrated by prehistoric multimedia cave paintings, classical Greek open-air theaters, Gothic cathedrals, acoustic geography of French villages, modern music reproduction, and virtual spaces in home theaters. Auditory spatial awareness is a prism that reveals a culture's attitudes toward hearing and space. Some listeners can learn to "see" objects with their ears, but even without training, we can all hear spatial geometry such as an open door or low ceiling. Integrating contributions from a wide range of disciplines—including architecture, music, acoustics, evolution, anthropology, cognitive psychology, audio engineering, and many others—Spaces Speak, Are You Listening? establishes the concepts and language of aural architecture. These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well-being. Aural architecture is not the exclusive domain of specialists. Accidentally or intentionally, we all function as aural architects.

This best-selling book is also "#1 book in motorcycle safety" (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called "Motorcycle Dynamics," Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider's safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider's braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called "Cornering Habits" is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough's skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough's voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it's road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or "blind"

A memoir by the mustachioed baseball pitcher who went playing rocky, trash-ridden fields in Castro's Cuba to becoming a Boston Red Sox legend. Luis Tiant is one of the most charismatic and accomplished players in Boston Red Sox and Major League Baseball history. With a barrel-chested physique and a Fu Manchu mustache, Tiant may not have looked like the lean, sculpted ace he usually played against, but nobody was a tougher competitor on the diamond, and few were as successful. There may be no more qualified twentieth-century pitcher not yet enshrined in the National Baseball Hall of Fame. His big-league dreams came at a price: racism in the Deep South and the Boston suburbs, and nearly fifteen years separated from a family held captive in Castro's Cuba. But baseball also delivered World Series stardom and a heroic return to his island home after close to a half-century of forced exile. The man whose name—"El Tiente"—became a Fenway Park battle cry has never fully shared his tale in his own words, until now. In Son of Havana, Tiant puts his heart on his sleeve and describes his road from torn-up fields in Havana to the pristine lawns of major league ballparks. Readers will share Tiant's pride when appeals by a pair of US senators to baseball-fanatic Castro secure freedom for Luis's parents to fly to Boston and witness the 1975 World Series glory of their child. And readers will join the big-league ballplayers for their spring 2016 exhibition game in Havana, when Tiant—a living link to the earliest, scariest days of the Castro regime—threw out the first pitch.
