Using a small custom script, for the entire month of June 2011 Martin Howse registered each chunk of data which had changed within the file system from the previous day's image. Excluding binary data, one day's sedimentation has been published in this book, a novel of data archaeology in progress tracking the overt and the covert, merging the legal and illegal, personal and administrative, source code and frozen systematics. Martin Howse (London 1969 - www.1010.co.uk) is a programmer, writer, performer and explorer. He is a co-founder of micro-research, a mobile platform for psychogeophysical research with ongoing projects in Berlin, London, Suffolk and Peenemuende. A brilliant virtuoso of violence, Richard Marcinko rose through Navy ranks to create and command one of this country’s most elite and classified counterterrorist units, SEAL TEAM SIX. Now this thirty-year veteran recounts the secret missions and Special Warfare madness of his worldwide military career—and the riveting truth about the top-secret Navy SEALs. Marcinko was almost inhumanly tough, and proved it on hair-raising missions across Vietnam and a war-torn world: blowing up supply junks, charging through minefields, jumping at 19,000 feet with a chute that wouldn't open, fighting hand-to-hand in a hellhole jungle. For the Pentagon, he organized the Navy's first counterterrorist unit: the legendary SEAL TEAM SIX, which went on classified missions from Central America to the Middle East, the North Sea, Africa and beyond.

Then Marcinko was tapped to create Red Cell, a dirty-dozen team of the military's most accomplished and decorated counterterrorists. Their unbelievable job was to test the defenses of the Navy's most secure facilities and installations. The result was predictable: all hell broke loose. Here is the hero who saw beyond the blood to ultimate justice—and the decorated warrior who became such a maverick that the Navy brass wanted his head on a pole, and for a time, got it. Richard Marcinko—ROGUE WARRIOR.

But you're stuck simmering on it because you just don't know if it's the right one to pursue. You're wondering whether people will even use your product, let alone pay for it. The uncertainty is overwhelming, so you do ... nothing. But what if you were confident that your idea would help people? How would you feel if you turned your passion into a living, breathing software product ... and you made money from it? Poornima Vijayashanker has founded 3 startups and personally guided 100+ people who have launched products that make 6 and 7 figures per year. Everyone started with varying levels of technical and business know-how-or none at all-but everyone was passionate about an idea. Now, Poornima travels around the country teaching people how to bring their ideas to life. With the right roadmap in front of you, you can launch a winning software product too. "But I don't know how to code or run a business." The tangled world of startups and software development is intimidating and hard to navigate. To start with, not every entrepreneur knows how to code. Even the ones who do still need other skills to succeed; they need to design a good user experience, figure out how to attract paying customers, and hire and fire technical talent. There are hundreds of tools and services to help build products, and they need to know which ones are useless and which ones will save them time. They'll eventually run out of cash to keep paying rent and developing, and will need to figure out whether to get investors, apply to an accelerator, or bootstrap. Trial and error takes years of research, setbacks, and heartache ... not to mention a lot of money. You could go to design school, teach yourself how to code in the off-hours, and spend thousands of dollars testing marketing campaigns. Or you could... Follow a proven guide for turning your ideas into successful products (and even 6- to 7-figure businesses). This book will teach you how to: - Validate your idea before you spend time and money on it. - Talk to prospective customers without feeling awkward or pushy. - Leave competitors in the dust with good design and positioning. - Save time and heartache by building only the features people will actually use. - Hire talented people to build your product for you. - Get more paying customers with scrappy marketing strategies. - Find money to fund your business. This guide includes time-tested strategies and tools that entrepreneurs love: Over 13 case studies with the inside scoop on companies like Mint.com, AirBnB, and Zappos. Scooterboys are the lost tribe of British youth culture. Unrecognised, uncelebrated and unwanted; misunderstood by a general public who mistook us for Mods. We weren't Mods though. By the 1980s myself and tens of thousands of scooter riders collectively rejected that label. Instead, we took the roadmap of British youth disaffection and carved a new bypass. This route took us beyond the UK's faded seaside resorts, allowing us to spread our creed across the continents. Tuned and customised Vespa and Lambretta scooters gave us freedom to roam; transport to live for the weekend. Shared experiences of riots, local hostility and police harassment built strong fraternal bonds that endure to this day. Despite decades of two-wheeled rebellion our threat level was never high enough to put us on the national security radar. This low profile has its benefits. We aren't doomed to follow the same cycle as Mods. First feared, then pilloried, accepted and finally adopted as part of UK's rich culture. As British as a vindaloo. The cult of Scooterboy has escaped death-by-public-acceptance, simply by remaining too underground. Too difficult to distinguish from what came before. And that's just perfect. You'll never see Scooterboys parodied in TV insurance adverts or low budget fly-on-the-walls. The poorly-rendered caricature is always some clich   Mod on a 'Christmas Tree' scooter. If you rode to rallies in the 80s and 90s then this book will mirror your experiences. If you've never had a scooter then it offers a rare glimpse of life inside the lost tribe of two-stroke terrorists.
