In short, the input
range of Yamaha at the
time, it's still
quality. Cons: I was
asked several settings
at startup, I had some
sounds that are
triggered when I
tapped other elements
- I hit a bear - but
still, the crash that
fires alone during a
descent toms, it is
never significant. Not
too complicated
settings to manual in
hand.

The Yamaha DTXplorer is a great kit for a beginner, the casual and the more experimented player. If you have money

to spend on an electronic kit you may want to look at something bigger and more expensive but this is a great starting point for anyone. Bottom line is the DTXplorer feels great, is comfortable and you can adjust it to your liking.
