cables are included in the
package – It runs engine
tests while it collects and
registers data to diagnose
problems. – It can help you
to determine the fault faster
and much more efficiently. –
Has an easy-to-read, user-
friendly interface.
How to Troubleshoot Yamaha

ATV Starting Problems ...

Yamaha Grizzly 700 Starting Problems Troubleshooting Test #5
After reconnecting the starter relay, the next step is to check the brake light relay. Turn the ignition on your machine, push the brake, and then hit the start button. If your machine doesn't start up right away, your starting problem could be a bad brake light relay.

The Yamaha outboard alarm system can fail just like any other system on your outboard.

Troubleshooting the alarm system includes making sure the horn associated with the alarm works, making sure the warning light comes on and the horn sounds when the oil level drops below acceptable levels and ensuring the warning sounds if the engine overheats.

Hello there can anyone help me

out with this yamaha trouble code 203 (52 1110) ? The check engine light turned on & upon checking that code showed. Thanks. Menu. Forums. New posts Search forums Your purchases. What's new. New posts New media New media comments Latest activity Unanswered Threads. [Ownership Thread]: Yamaha FZ16 version 2.0 - Page 79 When I took it back I stopped down the road and put the plug back on but the check engine light still stayed on. I'm thinking maybe the previous owner pulled the speedo plug to stop getting miles on it before they sold it. I'm sure Yamaha would have the codes etc and would be able to reset the light. Look inside the jet intake.
Remove any seaweed or
other debris that may have
become lodged in the
intake, taking care not to
damage the intake itself. A
clogged intake can cause the
warning light to come on

and make the engine
overheat.

Yamaha Engine Light

I have a 2008 700fi the check
engine light has been coming
on with code 37 on dash. It
also dies every time you try to
give it a little gas and let off
quick. My dealer has yet to fix
it they put a CDI box on and
no luck. Have you all had any
problems like this. Thanks

Problems with NEW Yamaha
waverunners | Jet Boaters ...
Today the engine light came on.
It blinks in a 3 time pattern with
just the key turned on and when
I start it the light stays lit steady.

Does anyone know what exactly this indicates? It sounds and runs the same as it did before. Hubby has an '06 1100 and the only time his light ever came on it was supposedly indicating it needed an oil change.

2008 700 check engine light |
Yamaha Rhino Forum

When you fall, the engine light of the bike will blink and will not start - this is an automatic response of the ECU to falls/accidents, and it's there in many bikes. The tip-over sensor detects the fall via lean angle & impact, and shuts the engine for sometime.

Everything comes back to normal after a while.

Long story short, replaced my 08 700 FI motor with one from an 09. The engine light came on on the dash. How do i check to see what is causing this light. The only changes I made to the rhino was stage 2 cam and new MSD. Is there a way to pull codes without having to go to the dealer?
